

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

This Management's Discussion and Analysis ("**MD&A**") reviews the activities of Canterra Minerals Corporation ("**Canterra**", or the "**Company**") and compares the financial results for the year ended December 31, 2015 (the "**fiscal year 2015**") with the comparable period in 2014 (the "**fiscal year 2014**"). This MD&A should be read in conjunction with the audited consolidated financial statements and accompanying notes for the year ended December 31, 2015, copies of which are filed under the Company's profile on the SEDAR website, www.sedar.com.

The Company was incorporated as 580312 B.C. Ltd. in British Columbia on February 18, 1999 and adopted the name "Diamondex Resources Ltd." on March 23, 1999. The Company adopted its present name on December 9, 2009, in connection with the business combination of Diamondex and Triex Minerals Corporation ("Triex"). The Company's head office and principal address is Suite 1410 - 650 West Georgia Street, Vancouver, British Columbia, Canada, V6B 4N8. The Company's registered and records office is Suite 2300 - 550 Burrard Street, Vancouver, British Columbia, Canada, V6C 2B5. The Company's functional currency is the Canadian dollar.

The information in this MD&A is provided as of the date of this MD&A, April 26, 2016 (the "**Report Date**").

DESCRIPTION AND OVERVIEW OF BUSINESS

The Company is a Canadian resource exploration company that has returned to diamond exploration with a focus on the Northwest Territories.

During fiscal year 2014, the Company increased its land holdings in the southern portion of the Slave Province, Northwest Territories by staking four new diamond properties and expanding two existing diamond properties. The Company's current projects in the Northwest Territories now include Gwen, Hilltop, King, Marlin, Prism and Rex Properties. The Company also holds a 33% interest in the Buffalo Hills Diamond Project in Northern Alberta.

During the last half of fiscal 2013 and first quarter of 2014, the Company divested of its uranium holdings in the Athabasca Basin of Saskatchewan and Hornby Basin of Nunavut, as it no longer considers uranium a component of its exploration activities. In addition, during the first quarter of 2014 the Company terminated two option agreements, whereby the Company had the right to earn-in a 51% interest in the Highland and East Manhattan precious metal properties located in Nevada.

As of December 31, 2015, the Company had working capital of approximately \$317,000. The Company's ability to continue as a going concern is dependent upon its ability to continue to raise adequate financing, monetize its marketable securities holdings and to commence profitable operations in the future and repay its liabilities arising from normal business operations as they become due.

MINERAL PROJECTS

The Company's core assets are the exploration rights to its mineral properties. These rights are held by means of claims located by staking and prospecting permits or leases issued by government departments for prospecting and exploration purposes. In several instances, the mineral rights may be held under Purchase Option Agreements. Such agreements typically require the Company to make cash payments and share issuances and to incur exploration expenditures on multi-year schedules, as set forth in each agreement.

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

NORTHWEST TERRITORIES

Gwen Property

In fiscal year 2014, the Company acquired the Gwen Property by staking 10 mineral claims covering an area of approximately 10,450 ha. The property is located 30 kilometres ("**km**") east of the Snap Lake Diamond Mine owned and operated by De Beers Canada. The Gwen Property surrounds two diamond-bearing kimberlite pipes, CL-25 and CL-174, discovered in 1994-1995 by Winspear Resources Ltd. Kimberlite indicator minerals on the property indicate the potential for the discovery of new kimberlites pipes on the Gwen Property.

Hilltop Property

The Company initially acquired the Hilltop Property in 1999 and held four mineral leases. In fiscal year 2014, an additional eight mineral claims were staked, increasing the property size to approximately 11,060 ha. A previously identified 7 km long kimberlite indicator mineral train contains G10 garnets, chromites and ilmenites, as well as numerous kimberlite fragments. Evaluation of airborne geophysical data has identified 15 anomalies for future follow up. The Hilltop Property is strategically located approximately 45 km southwest of the Snap Lake Diamond Mine.

King Property

The Company initially acquired the King Property in 2000 and held six mineral leases covering an area of approximately 6,200 ha. In fiscal year 2014, seven mineral claims were staked northeast of the existing six mineral leases, increasing the property size to approximately 13,330 ha. Subsequent to year end the Company has elected to let the seven mineral claims expire.

Marlin Property

In fiscal year 2014, the Company acquired the Marlin Property by staking 23 mineral claims covering an area of approximately 25,830 ha. The property is located approximately 20 km northwest of the Gahcho Kue Project, which is being advanced by De Beers Canada and Mountain Province Diamonds Inc. The Marlin Property was staked based on the presence of anomalous indicator minerals including G10 garnets and chromites which appear to have been sourced from within the acquired claim block, as well as seven geophysical anomalies identified from a previous airborne magnetic and electromagnetic survey.

In August 2014, the Company entered into an option agreement with Margaret Lake Diamonds ("**MLD**") granting MLD the right to acquire up to a 49% interest in the Marlin Property. To acquire an initial 30% interest, MLD must make cash payments of \$80,000 (\$60,000 received to date), issue 300,000 common shares (300,000 received to date at a value of \$44,000) and incur \$1,000,000 (\$524,333 incurred to date) in exploration expenditures by September 15, 2016. MLD has the option to earn an additional 19% interest by paying an additional \$20,000 and incurring no less than \$750,000 in additional exploration expenditures on or before September 15, 2017. Upon MLD having earned either 30% or 49% interest, MLD and the Company will enter into a Joint Venture Agreement and at which time MLD will issue the Company an additional 300,000 common shares.

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

Prism Property

In fiscal year 2014, the Company acquired the Prism Property by staking 11 mineral claims covering approximately 11,500 ha. The property is located approximately 25 km south of the Snap Lake Diamond Mine. The Prism Property hosts three or more kimberlite indicator mineral trains with favourable chemistry, indicating a high potential for diamondiferous kimberlites to exist at the head of the trains. Geophysical and geochemical work has identified three potential areas for kimberlite discovery, northern and central areas which are defined by a change in indicator mineral chemistry and a southern area defined by both geophysical anomalies and kimberlite indicator mineral chemistry. Both areas are located at heads of kimberlite indicator mineral trains and appear to be cutoff in the up-ice direction.

Rex Property

In January 2015, the Company acquired the Rex Property by staking 21 mineral claims covering an area of approximately 25,030 ha. The property is located approximately 35 km west of the Gahcho Kue diamond project, 45 km southeast of the Snap Lake Diamond Mine and contiguous to the Company's Marlin property to the east. The property encompasses several kimberlite indicator anomalies that contain G9 and G10 garnets, kimberlitic ilmenites and chromites. In addition, two kimberlite indicator mineral trains cross the property. Previous exploration focused on the kimberlite indicator mineral train that appears to be sourced from the MZ kimberlite dykes, 15 km to the east. This train may mask subtle kimberlite indicator mineral anomalies which previous exploration may have overlooked. These subtle anomalies may be sourced from as yet undiscovered kimberlite bodies within the Rex Property.

Exploration Activities

During the second half of 2014, the Company collected 694 till samples from its total land holdings in the Southern Slave Region and conducted a heli-borne gradiometry geophysical survey over the northern portion of the Marlin Project. During the second half of 2015 the Company collected a further 204 till samples and visual picking results are pending on certain properties. In addition, ground work was completed at the Hilltop Property in preparation for a 60 line km OhmMapper survey completed in early 2016. The survey expands upon the initial results obtained from the survey conducted earlier in 2015 which identified several targets for follow-up work.

The samples from the 2015 program will be incorporated into the Company's proprietary database which includes detailed datasets compiled over a fifteen year period and covers the NWT exclusively. The database now comprises results from 22,850 till samples, with 42,000 microprobe analyses and more than 71,500 line km of airborne and ground geophysics. Ongoing evaluation continues to advance the search for new diamond districts and kimberlite discoveries.

The Company's 2014 and 2015 exploration work meets the requirement to maintain the Company's priority land package for an additional year through assessment credits. The Company is reviewing the results from its 2015 field program and the OhmMapper survey to determine how best to continue to explore.

Buffalo Hills Property, Alberta

The Buffalo Hills Property ("Buffalo Hills") is held by the Buffalo Hills Joint Venture ("BHJV"), which has three participants: EnCana Corporation (34%), Shore Gold (33%) and the Company (33%). The Company is the Operator of the BHJV. The Buffalo Hills is comprised of 22 mineral leases covering 5,104 hectares, located in north central Alberta centered approximately 120 km northeast of Peace River and 400 km northwest of Edmonton. To date, a total of 41 kimberlites have been discovered in the region, of which 28 are diamondiferous. Kimberlite bodies range in size from 1 – 47 ha. In addition, four metallic and industrial mineral permits were staked north and northwest of the main lease holdings in 2015. Buffalo Hills is currently on care and maintenance.

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

RESULTS OF OPERATIONS

For the year ended December 31, 2015 and 2014

The net loss for the year ended December 31, 2015 was \$954,315 compared to \$1,656,563 for the prior year's comparative period.

Expenses for the year ended December 31, 2015 amounted to \$965,521 (2014 - \$1,513,310). Exploration expenditures were lower at \$423,479 (2014 - \$894,221) due to reduced level of activity. During the third quarter of 2014, the Company issued 700,000 options resulting in share-based compensation of \$49,010. No options have been issued in 2015.

The unrealized loss on marketable securities amounted to \$8,815 (2014 - \$192,781). During the year ended December 30, 2014, the Company sold marketable securities resulting in a realized loss of \$280,597. In 2014, the Company sold certain properties that were previously written off, and realized a gain on sale in the amount of \$129,888.

In 2015, write down of mineral properties amounted to \$80,588 as a result of the decision to write-down the acquisitions costs of the King mineral claims located in Northwest Territories.

The operating losses are a reflection of the Company's status as a non-revenue producing mineral exploration company. As the Company has no main source of income, losses are expected to continue for the foreseeable future.

For the three months ended December 31, 2015 and 2014

The net loss for the three months ended December 31, 2015 was \$258,596 compared to \$378,727 for the prior comparative period.

Expenses for the current three month period amounted to \$224,548 (2014 - \$550,432). Exploration expenditures were lower at \$90,759 (2014 - \$351,310) due to reduced level of activity. During the third quarter of 2014, the Company issued 700,000 options resulting in share-based compensation of \$49,010. No options were issued in current quarter.

Summary of Quarterly Results

The following table summarizes information derived from the Company's financial statements for each of the eight most recently completed quarters.

Year:	2015	2015	2015	2015	2014	2014	2014	2014
Quarter Ended:	Dec 31	Sep 30	Jun 30	Mar 31	Dec 31	Sep 30	Jun 30	Mar 31
Net sales or total revenue:	\$Nil	\$Nil	\$Nil	\$Nil	\$Nil	\$Nil	\$Nil	\$Nil
Net income (loss):								
(i) in total (000s)	\$(259)	\$(222)	\$(224)	\$(249)	\$(379)	\$(496)	\$(471)	\$(310)
(ii) per share ⁽¹⁾	\$(0.00)	\$(0.01)	\$(0.01)	\$(0.01)	\$(0.01)	\$(0.01)	\$(0.01)	\$(0.01)

(1) Fully diluted loss per share amounts are not shown as they would be anti-dilutive.

While the information set out in the foregoing table is mandated by *National Instrument 51-102*, it is management's view that the variations in financial results that occur from quarter to quarter are not particularly helpful in analyzing the Company's performance. It is in the nature of the business of junior exploration companies that unless they sell a mineral interest for a sum greater than the costs incurred in acquiring such interest, they have no significant net sales or total revenue.

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

Significant variances in the Company's reported loss from quarter to quarter most commonly arise from several factors that are difficult to anticipate in advance or to predict from past results. These factors include: (i) level of exploration and project evaluations expenses incurred, (ii) decisions to write off acquisition costs when management concludes there has been an impairment in the carrying value of a mineral property, or the property is abandoned, and (iii) the vesting of incentive stock options, which results in the recording of amounts for share-based compensation expense that can be quite large in relation to other general and administrative expenses incurred in any given quarter.

Selected Annual Information

Year	2015	2014	2013
Net sales or total revenue	\$Nil	\$Nil	\$Nil
Net income (loss):			
(i) in total (000's)	(\$954)	(\$1,657)	(\$8,678)
(ii) per share ⁽¹⁾	(\$0.01)	(\$0.03)	(\$0.17)
Total Assets (000's)	\$1,071	\$1,545	\$1,263

(1) Per Share amounts are calculated using the weighted average number of shares outstanding. Fully diluted loss per share amounts have not been calculated, as they would be anti-dilutive.

Financing Activities

In October 2015, the Company completed a non-brokered placement raising a total of \$0.5 million consisting of 4,682,547 units (the "**Units**") at a price of \$0.06 per Unit and 2,738,096 flow-through units (the "**Flow-Through Units**") at a price of \$0.08 per Flow-Through Unit (the "**Offering**").

Each Unit consisted of one common share ("**Common Share**") and one-half of one common share purchase warrant (each whole warrant being a "**Common Share Warrant**") of the Company. Each Common Share Warrant entitles the holder to purchase one Common Share at \$0.08 until October 19, 2017.

Each Flow-Through Unit consisted of one flow-through common share and one-half of one common share purchase warrant (each whole warrant being a "**Non Flow-Through Warrant**") of the Company. Each Non Flow-Through Warrant entitles the holder to purchase one Common Share at \$0.10 until October 19, 2017.

The Company paid finder's fee totaling \$3,390 and issued 49,500 finders warrants. The finders' warrants are exercisable until October 19, 2016 at a price of \$0.10 per share.

Investing Activities

During the year ended December 31, 2015, the Company's cash flow from investing activities amounted to \$625 as two new claims were acquired on Prism Property. Exploration expenditures incurred on the Company's mineral properties for fiscal year 2015 were \$423,479 (2014 - \$894,221).

Off Balance Sheet Arrangements

The Company does not have any off balance sheet arrangements.

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

Transactions with Related Parties

The Company entered into the following transactions with related parties and key management personnel during fiscal year 2015:

Paid or accrued the following to Rand Explorations Ltd. ("Rand") a company controlled by Randy Turner, the Chief Executive Officer of the Company:

	2015	2014
Management Fees	\$ 102,000	\$ 102,000
Geological consulting fees	\$ 18,000	\$ 18,000

Paid or accrued the following to Susan Neale, the Chief Financial Officer of the Company:

	2015	2014
Management fees	\$ 29,900	\$ 8,450
Share based compensation*	\$ -	\$ 10,502

Paid or accrued the following to Walter Melnyk, the former Vice President - Exploration of the Company:

	2015	2014
Geological consulting fees	\$ -	\$ 83,153

Paid or accrued the following to non-executive directors:

	2015	2014
Share based compensation*	\$ -	\$ 10,502

Paid or accrued the following to Independence Gold Corp. a company with common directors and/or officers:

	2015	2014
Rent	\$ 60,000	\$ 60,000
Wages and benefits	88,637	203,320

**Share based compensation consists of the fair value of options that were granted to related parties during the period. The fair value has been calculated using the Black-Scholes Option Pricing Model as set out in these Consolidated Financial Statements and does not represent actual amounts received by the related party.*

Included in receivables at December 31, 2015 is \$2,225 (December 31, 2014 - \$2,639) due from companies with common directors and/or officers.

Included in accounts payable and accrued liabilities at December 31, 2015 is \$154,180 (December 31, 2014 - \$4,771) due to companies with common directors and/or officers.

LIQUIDITY AND CAPITAL RESOURCES

The Company has no operations that generate cash flow. The Company's future financial success will depend on the discovery of one or more economic mineral deposits. This process can take many years, can consume significant resources and is largely based on factors that are beyond the control of the Company and its management.

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

To date, the Company has financed its activities by the private placement of equity securities, consisting of a combination of flow-through and non-flow-through securities, as well as option payments received on properties it has optioned to third parties. In order to continue funding their exploration activities and corporate costs, exploration companies are usually reliant on their ongoing ability to raise financing through the sale of equity. This is dependent on positive investor sentiment, which in turn is influenced by a positive climate for the commodities that are being explored for, a company's track record, and the experience and caliber of a company's management. There is no assurance that equity funding will be accessible to the Company at the times and in the amounts required to fund the Company's activities.

Cash and Financial Condition

As of December 31, 2015, the Company had working capital of \$317,146 (December 31, 2014 - \$801,648). The Company continues to monitor its operating costs closely, to ensure that no non-essential expenditures are incurred.

The Company has no debt, does not have any unused lines of credit or other arrangements in place to borrow funds, and has no off-balance sheet arrangements. The Company has no current plans to use debt financing and does not use hedges or other financial derivatives.

The Company manages its liquidity risk (i.e., the risk that it will not be able to meet its obligations as they become due) by forecasting cash flows from operations together with its investing and financing activities. Expenditures are adjusted to ensure liabilities can be funded as they become due. Management and the Board of Directors are actively involved in the review, planning, and approval of significant expenditures and commitments.

Financial Instruments

The Company classifies its financial assets into four categories: (i) fair value through profit or loss, (ii) loans and receivables, (iii) held-to-maturity investments, and (iv) available-for-sale. All financial assets other than those measured at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is objective evidence of impairment as a result of one or more events that have occurred after initial recognition of the asset and such event(s) has an impact on the estimated future cash flows of the financial asset or the group of financial assets.

The Company classifies its financial liabilities into one of two categories: (i) fair value through profit or loss, and (ii) other financial liabilities.

Further information regarding the Company's financial instruments is set forth in Note 3 and 13 to the consolidated audited financial statements for the year ended December 31, 2015.

NEW IFRS STANDARDS ADOPTED

During fiscal year 2015, the Company adopted the following IFRS standards:

- IFRS 2 – Share Based Payment (Amendment): This amendment clarifies vesting conditions by separately defining a performance condition and a service condition, both of which were previously incorporated within the definition of a vesting condition.
- IAS24 – Related Party Disclosure (Amendments): These amendments clarify that management entity, or any member of a group of which it is a part, that provides key management services to a reporting entity, or its parent is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity. This replaces the more detailed disclosure by category required for other key management personnel compensation.

These new accounting standards had no material impact on the results or financial position of the Company.

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

NEW IFRS STANDARDS NOT YET ADOPTED

The following new standards, amendments to standards and interpretations have been issued but are not effective during the year ended December 31, 2015:

- IFRS 9 – Financial Instruments (effective for annual periods beginning on after January 1, 2018), provides guidance on the classification and measurement of financial assets. It also introduced a new expected credit loss model for calculating impairment for financial assets.

The Company is assessing the effect of this new standard on our financial statements.

OUTSTANDING SECURITIES AT THE REPORT DATE

As of the report date, the Company has the following securities outstanding:

Security	Number	Exercise Price	Expiry Date
Common Shares	82,195,937		
Warrants	8,107,143	\$0.10	Jul 29, 2016
	13,153,266	\$0.25	Jun 21, 2016
	49,500	\$0.10	Oct 19, 2016
	1,369,048	\$0.10	Oct 19, 2017
	2,341,274	\$0.08	Oct 19, 2017
Options	2,460,000	\$0.10	Apr 24, 2018
	670,000	\$0.15	August 14, 2019

A finder's fee may be payable on a certain portion of the second tranche of the private placement. A finder's fee, where applicable, will be payable in cash equal to 6% of the proceeds raised from the Offering. In addition, the Finders' will receive compensation warrants ("Compensation Warrants") exercisable for non-flow through common shares equal to 6% of the total number of Flow-Through Units and Common Share Units sold. The Compensation Warrants will be exercisable at a price of \$0.10 per share for a period of twelve (12) months after the closing of the second tranche.

OUTLOOK

As part of the Company's return to diamond exploration, the Company increased its diamond land holdings by staking four new properties and expanding one existing property located in the southern portion of the Slave Province, Northwest Territories. The Slave Province, including the prolific Lac de Gras and South Slave areas, has a proven history of diamond discovery and development. Each of these properties host indicator mineral trains which are composed of numerous G10 garnets, chromites and ilmenites sourced from within the diamond stability field, and which are potentially associated with diamond bearing kimberlite sources. In addition, the Buffalo Hills project has been expanded with the addition of four Metallic and Industrial covering two separate areas of interest, first near the K91 kimberlite and the second near the K8 kimberlite in Alberta.

During the second half of 2015, the Company collected a further 204 till samples to identify and further define potential drill targets on its Northwest Territories properties. These samples will be added to the Company's proprietary database which comprises approximately 22,850 till samples, 42,000 microprobe analysis and 71,500 km of airborne and ground geophysics. In addition, ground work was completed at the Hilltop Property in preparation for the 60 line km OhmMapper survey completed in early 2016. The survey expands upon the initial results obtained in an initial survey conducted earlier in 2015 which identified several targets for follow-up work. The Company is reviewing the results from its 2015 field program and the OhmMapper survey to determine how best to continue to explore.

CANTERRA MINERALS CORPORATION

MANAGEMENT'S DISCUSSION & ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS - FORM 51-102F

For the year ended December 31, 2015

RISK FACTORS RELATING TO THE COMPANY'S BUSINESS

As a company involved in the mineral resource exploration and development industry, the Company is exposed to a number of risks, including the financial risks associated with the fact that it has no operating cash flow and must access the capital markets to finance its activities.

Exploration is a capital intensive business activity, typically with long lead times between the dates exploration expenses are incurred and the time the exploration company can derive a profit from such investments. As a consequence, junior exploration companies such as Canterra are very reliant upon accessing the equity markets, as they are not generally in a position to generate cash flow internally. Share prices of companies in the junior exploration sector can be quite volatile and at times there can be a lack of liquidity, if trading volumes decrease to very low levels.

Negotiations with First Nations' and or aboriginal groups can add an additional layer of risk and uncertainty to efforts of exploration and development of mineral deposits in many areas of Canada. The nature and extent of First Nations and or aboriginal rights and title remains the subject of active debate, claims and litigation in Canada, including with respect to intergovernmental relations between First Nation and or aboriginal authorities and federal, provincial and territorial authorities. There can be no guarantee that such claims will not cause permitting delays, or additional costs for the Company's interest in Canada.

There can be no assurances the Company will continue to be able to access the capital markets for the funding necessary to acquire and maintain exploration properties and to carry out its desired exploration programs. The Company may need to further reduce activities if funding is unavailable when required. In addition to this having an impact on its wholly-owned projects, the Company could find itself in a position at a future time where it is unable to fund its share of costs incurred under joint venture agreements or meet earn-in requirements under purchase options agreements to which it is a party and its interest or right to the underlying property interest could be reduced or eliminated as a result.

The Company is very reliant upon its existing management and if the services of such personnel were withdrawn for any reason, this could have a material adverse impact on the Company's operating activities.

There is intense competition within the minerals industry to acquire properties of merit and the Company competes with other companies possessing greater technical and financial resources than itself. Even if desirable properties are secured, there can be no assurances that the Company will be able to execute its exploration programs on its proposed schedules and within its cost estimates, whether due to weather conditions in the areas where it operates, increasingly stringent environmental regulations and other permitting restrictions, or other factors related to exploring in areas that lack infrastructure and where essential supplies and services may not be readily available.

Ultimately, even if the Company is successful in identifying mineral resources on its properties, the economics of potential projects may be affected by many factors beyond the capacity of the Company to anticipate and control, such as the marketability of the mineral products under profitable conditions, government regulations relating to health, safety and the environment, the scale and scope of royalties and taxes on production and demands for "value added" processing within Canada of the minerals produced here. One or more of these risk elements could have a material adverse impact on costs of an operation, which, if significant enough, could reduce or eliminate the profitability of a particular project.

The Company's exploration activities require permits from various governmental agencies charged with administering laws and regulations governing exploration, labour standards, occupational health and safety, control of toxic substances, waste disposal, land use, environmental protection and other matters. Failure to comply with laws, regulations and permit conditions could result in fines and/or stop work orders, costs for conducting remedial actions and other expenses. In addition, legislated changes to existing laws and regulations could result in significant additional costs to comply with the revised terms and could also result in delays in executing planned programs pending compliance with those terms.

FORWARD LOOKING INFORMATION

Certain of the statements made and information contained herein is "forward-looking information" within the meaning of the British Columbia Securities Act, the Alberta Securities Act and the Ontario Securities Act. This includes statements concerning the Company's plans at its mineral properties, which involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking information. Forward-looking information is subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking information, including, without limitation, the ability of the Company to continue to be able to access the capital markets for the funding necessary to acquire and maintain exploration properties and to carry out its desired exploration programs; inability to fund the Company's share of costs incurred under joint venture agreements or meet the earn-in requirements under purchase options agreements to which it is a party, and reduction or elimination of its interest in the underlying mineral property as a result; competition within the minerals industry to acquire properties of merit, and competition from other companies possessing greater technical and financial resources; difficulties in executing exploration programs on the Company's proposed schedules and within its cost estimates, whether due to weather conditions in the areas where it operates, increasingly stringent environmental regulations and other permitting restrictions, or other factors related to exploring in the north, such as the availability of essential supplies and services; factors beyond the capacity of the Company to anticipate and control, such as the marketability of diamonds, government regulations relating to health, safety and the environment, the scale and scope of royalties and taxes on production, and demands for "value added" processing of rough diamonds; unusually mild winter conditions affecting or delaying the opening of the winter roads and resulting difficulties in transporting materials needed to support various exploration projects and resulting increased costs of transport by air; the availability of experienced contractors and professional staff to perform work in a competitive environment and the resulting adverse impact on costs and performance and other risks and uncertainties, including those described in each management's discussion and analysis of financial condition and results of operations. In addition, forward-looking information is based on various assumptions including, without limitation, assumptions associated with exploration results and costs and the availability of materials and skilled labour. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements. Accordingly, readers are advised not to place undue reliance on forward-looking information. Except as required under applicable securities legislation, the Company undertakes no obligation to publicly update or revise forward-looking information, whether as a result of new information, future events or otherwise.
