

FOR IMMEDIATE RELEASE

AIRTEST PRESIDENT GEORGE GRAHAM STEPS DOWN

Delta, BC, January 17, 2022 – ATI AirTest Technologies Inc. (“AirTest” or the ‘Company’) (TSXV:AAT, OTC AATGF) announces a change in top management. President George Graham advises: “After founding AirTest 26 years ago and working as President of the company since that time, I have reached the age where I think its time to step aside. We have developed some new products over the past 3 years which we expect will move AirTest into a different dimension of company. There is a great deal of interest in the Company’s capability to save considerable energy in commercial buildings having variable occupancy, as well as our more recently developed ability to help manage air quality in smaller spaces such as school classrooms, retail stores, and smaller sized offices.”

“I am resigning as President and will carry on as a Management Consultant and Board Chairman until we are able to recruit a new President and provide him with sufficient support to enable him to take control of the various responsibilities of the presidential role. I am very appreciative of the support I have received from my employees, our key suppliers, and major customers over the years.”

Ted Konyi, CEO, commented “the Board wishes to thank George for his years of service and perseverance. We welcome his assistance during this transitional phase and with his ongoing relationships with key customers. Under his guidance the company has developed the new IAQEye™. After enduring several supply chain issues, this revolutionary product is now in inventory with several initial pilot projects planned. We anticipate signing some launch customers in school systems and multi-site retailers very shortly. This is an exciting time for the Company and our focus is now on rapidly increasing sales and marketing efforts.”

About AirTest: AirTest Technologies is a Green-Tech company specializing in Demand Control Ventilation systems that improve commercial building operating efficiency and generate proven energy savings. The company has developed new wireless sensors with dynamic real-time communication and control technologies, which builds upon ten years of experience and thousands of installations amongst clients such as Lowe’s, Shoppers Drug Mart and Ikea. Airtest solutions provide data on levels of Indoor Air Quality required by schools, retail stores and offices.

Legal Notice Regarding Forward Looking Statements

This news release contains "forward looking statements". Forward-looking statements are projections of financial performance or future events. Forward-looking statements can be identified by the use of words such as "expect", "anticipate", "intend", "plan", "believe", "estimate" and words of similar meaning. Forward-looking statements are based on management's current expectations and assumptions and they are subject to risks that may cause actual results to differ materially from those expressed or implied by such forward looking statements. Forward-looking statements in this news release include those concerning the Company's belief in the energy savings that can be achieved through installation of the Company's products and that these installations lead to reduced maintenance, downtime expenses, future cost savings, and improvements in the bottom line. These statements are subject to risks that may cause the actual results to be materially different in future periods from those expressed or implied by such forward looking statements. Risks that may prevent or delay the forward-looking statements from coming to fruition as anticipated include the availability of working capital, risks inherent in product development, as well as market factors that may increase costs or time to market. It is our policy not to update forward looking statements except to the extent required under applicable securities laws. Further information on the Company is available at www.sedar.com or at the Company's website, www.airtest.com.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
