

## **Diamcor and Tiffany & Co. Canada Sign Agreement to Amend Outstanding Loans**

KELOWNA, December 18, 2024 – Diamcor Mining Inc. (TSX-V.DMI), (OTCQB-DMIFF), (FRA:DC3A), ("Diamcor" or the "Company"), a well-established Canadian diamond mining company with a proven history in the mining, exploration, and sale of rough diamonds announces that the Company and Tiffany & Co. Canada ("Tiffany" or "The Lender") have entered into an agreement (the "Agreement") to amend the total balance of the outstanding loans between the companies. Under the terms of the Agreement, Diamcor will pay Tiffany CAD \$2,000,000 (the "Initial Payment") 90 days from signing of the Agreement, followed by a second and final payment of CAD \$1,505,256 on the one-year anniversary of the Initial Payment to retire all remaining principal and accrued interest associated with the outstanding loans. As a result of this agreement, the total current carrying balance currently recorded in the Company's financials for these loans of CAD \$6,753,045 will be adjusted to reflect a new amount of CAD \$3,505,256 as outstanding for these loans.

### **About Diamcor Mining Inc.**

Diamcor Mining Inc. is a fully reporting publicly traded Canadian diamond mining company with a well-established proven history in the mining, exploration, and sale of rough diamonds. The Company's primary focus is on the mining and development of its Krone-Endora at Venetia Project which is co-located and directly adjacent to De Beers' Venetia Diamond Mine in South Africa. The Venetia diamond mine is recognized as one of the world's top diamond-producing mines, and the deposits which occur on Krone-Endora have been identified as being the result of shift and subsequent erosion of an estimated 50M tonnes of material from the higher grounds of Venetia to the lower surrounding areas in the direction of Krone and Endora.

Diamcor also focuses on the acquisition and development of mid-tier projects with near-term production capabilities and growth potential and uses unique approaches to mining that involves the use of advanced technology and techniques to extract diamonds in a safe, efficient, and environmentally responsible

manner. The Company has a strong commitment to social responsibility, including the support of local people, communities, and the environment.

### **About the Krone-Endora at Venetia Project**

Diamcor acquired the Krone-Endora at Venetia Project from De Beers Consolidated Mines Limited, consisting of the prospecting rights over the farms Krone 104 and Endora 66, which represent a combined surface area of approximately 5,888 hectares directly adjacent to De Beers' flagship Venetia Diamond Mine in South Africa. The Company subsequently announced that the South African Department of Mineral Resources had granted a Mining Right for the Krone-Endora at Venetia Project encompassing 657.71 hectares of the Project's total area of 5,888 hectares. The Company has also submitted an application for a mining right over the remaining areas of the Project. The deposits which occur on the properties of Krone and Endora have been identified as a higher-grade "Alluvial" basal deposit which is covered by a lower-grade upper "Eluvial" deposit. These deposits are proposed to be the result of the direct-shift (in respect to the "Eluvial" deposit) and erosion (in respect to the "Alluvial" deposit) of an estimated 1,000 vertical meters of material from the higher grounds of the adjacent Venetia Kimberlite areas. The deposits on Krone-Endora occur with a maximum total depth of approximately 15.0 metres from surface to bedrock, allowing for a very low-cost mining operation to be employed with the potential for near-term diamond production from a known high-quality source. Krone-Endora also benefits from the significant development of infrastructure and services already in place due to its location directly adjacent to the Venetia Mine, which is widely recognised as the largest diamond mine in South Africa, and one of the most prolific diamond mines in the world.

### **Qualified Person Statement:**

Mr. James P. Hawkins (B.Sc., P.Geo.), is Manager of Exploration & Special Projects for Diamcor Mining Inc., and the Qualified Person in accordance with National Instrument 43-101 responsible for overseeing the execution of Diamcor's exploration programmes and a Member of the Association of Professional Engineers and Geoscientists of Alberta ("APEGA"). Mr. Hawkins has reviewed this press release and approved of its contents.
