Red Cliff Project Update.

Vancouver, BC - Decade Resources Ltd. ("Decade") and Mountain Boy Minerals Ltd. ("Mountain Boy") are pleased to provide an update for the Red Cliff project in Northwestern British Columbia. Seventy three holes were completed and assays were received for most holes up to and including DDH-12-61. The remaining core and portions of core have been logged, cut and shipped for assay.

It has been decided to produce a more complete analysis of the cores that include silver and base metal values. This will provide a more detailed analysis and be more effective to prepare for the upcoming 43-101 calculations. The Companies are also working on a complete list of all intersections greater than 1 g/t. Receipt of only portions of drill holes from DDH-12 and Mon-50-61 have delayed completion of this list, as well as the additional and more detailed assay requirement.

Ed. Kruchkowski, P. Geo., a qualified person under National Instrument 43-101, is in charge of the exploration program on behalf of the Companies and responsible for the contents of this release. Mr. Kruchkowski has conducted all the exploration on this property from 2007 to present.

For further information, please contact investor relations at Ed Kruchkowski at 250-636-2264 or 250-636-9232 or on each company web page: www.mountainboyminerals.ca or www.decaderesources.ca.
