As required by the international accounting standard IFRS 9 - Financial Instruments - these instruments were recorded at Fair value at the reference date:

This credit line was converted into a structured medium-term loan during 2022. On 25 February 2022 Intesa Sanpaolo and Fine Foods carried out a financing transaction for € 70 million to support its growth and development projects. Intesa Sanpaolo acted as the loan's sole financial arranger. The € 70 million seven-year loan will partly reorganise the current financial debt, and partly open the door to Fine Foods' further growth-by-acquisition plans.

The loan provides for financial covenants based on the following indicators:

- NFP / EBITDA
- NFP / EQUITY
- EBITDA/Financial charges

Total Revenues from contracts with customers	50,754,911	51,330,701

The Food Business Unit showed a decrease (-23%) compared to the same period of the previous year, while the Pharma BU showed a growth of 19%. The Cosmetics Business Unit showed an increase in revenues due to a growth in turnover of Pharmatek (+6% compared to the first quarter of 2021) and the acquisition of Euro Cosmetic, which took place in the last quarter of 2021.

Despite the reduction in revenues between Q1 2022 and Q1 2021 for the Food BU, the result is in line with the average historical trend of recent years: Q1 2021 recorded extraordinary revenue generated by the pandemic.

Pharma BU, which had contracted during the pandemic, returned to average pre-COVID 19 sales levels in the quarter.

The decline in the Food Business Unit is almost entirely offset by increases in turnover in the Pharma and Cosmetics BUs.

EBITDA in the first quarter was € 4 million, down from € 6.8 million of the first quarter of the previous financial year. The EBITDA margin decreased from 13% to 8%, due to the current economic situation that generated, as in Q4 2021, inefficiencies in the production chain and a significant increase in energy costs (which impacted more than 2% of the reduction in EBITDA margin), transport and logistics.

EBITDA Margin in Q1 2022 compared to Adjusted EBITDA Margin in Q4 2021 showed a significant increase from 4.7% to 7.8%.

This improvement is due to the actions implemented by the Group including the chargeback of increased raw and packaging material costs to customers and the reduction of production downtime, due to stock management policies.

The Group's EBIT in the first quarter of 2022 was € 0.4 million compared to € 3.7 million in the same period of the previous financial year, with a decrease mainly due to the reduction in EBITDA and a slight increase in depreciation and amortisation for the period.

Changes in Fair Value in the first quarter of 2022 of financial assets and liabilities showed a negative balance of € 2,357,415 compared to a negative balance of € 400,109 in the first quarter of 2021. This is detailed below:

<i>(Amounts in Euro units)</i>	31 March 2022	31 March 2021
Change in fair value of other securities	(2,357,415)	1,373,395
Change in fair value of warrants		(1,773,504)
Total changes in Fair Value on financial assets and liabilities	(2,357,415)	(400,109)

The "Changes in fair value of other securities" item showed the change in fair value of securities held by the parent company.

The "Change in fair value of warrants" item is the change in the market value of Fine Foods listed and unlisted warrants between 1 January and 31 March 2021. These financial instruments were fully converted as of 30 June 2021.

Adjusted Income Before Taxes was net of the change in fair value of the warrants, totalling € 1.8 million as of 31 March 2021; this non-recurring charge is shown net of the tax effect (only IRES) on Adjusted profit in the first quarter of 2021.

Business outlook

Despite the continuation of difficulties in 2022 reported at the end of 2021, including increasing energy costs, material shortages, and the problems arising from the geo-political situation, the Management believes that the Group can face the current year's challenges due to the actions it has taken. It expects to return to historical growth trends by the end of this year or as soon as these critical issues are resolved.

In addition to the policies on the chargeback of raw and packaging materials to its customers and management of inventories, the Group has installed two photovoltaic systems at the Trenzano (BS) and Brembate (BG) plants. Benefits of these initiatives are expected in Q2 2022. The parent Company applied to the relevant authorities for the "White Certificates" deriving from the activation of the co-generators.

Development and integration activities of the companies acquired in 2021 continue to generate future business opportunities in the cosmetics sector due to synergies with the parent company.
