

This is the form of material change report required under section 85(1) of the *Securities Act* and section 151 of the *Securities Rules*.

**FORM 53-901F  
(Previously From 27)**

**MATERIAL CHANGE REPORT UNDER  
SECTION 85(1) OF THE *SECURITIES ACT* (BRITISH COLUMBIA)**

This form is intended as a guideline. A letter or other document may be used if the substantive requirements of this are complied with.

Every report required to be filed under section 85(1) of the *Securities Act* (the "Act") shall be sent to the British Columbia Securities Commission (the "Commission") in an envelope addressed to the Commission and marked "Continuous Disclosure".

WHERE THIS REPORT IS FILED ON A CONFIDENTIAL BASIS PUT AT THE BEGINNING OF THE REPORT IN BLOCK CAPITALS "CONFIDENTIAL - SECTION 85", AND EVERYTHING THAT IS REQUIRED TO BE FILED SHALL BE PLACED IN AN ENVELOPE ADDRESSED TO THE SECRETARY OF THE COMMISSION MARKED "CONFIDENTIAL".

**1 Reporting Issuer**

International Bethlehem Mining Corp.  
2489 Bellevue Avenue  
West Vancouver, British Columbia V7V 1E1

Telephone (604) 922-2030

(the "Company")

**2 Date of Material Change**

April 16, 2007

**3 Press Release**

Issued in West Vancouver, B.C. on April 16, 2007 under Section 85 (1) of the Act and disseminated through the facilities of Market News and Stockwatch.

**4 Summary of Material Change**

The Company announced core drill programs on its "Rain Property".

**5 Full Description of Material Change**

The Company has announce that in May 2007 the Company will commence a core drill program of up to 12 holes on its "Rain Property", which is located approximately 55 km (via Hwy 23) north of the City of Revelstoke in southeast British Columbia, Canada.

In 2006, Aero-Quest Geophysics was commissioned and completed a 1000 line kilometre airborne geophysical study. The data compilation identified two linear stratigraphic magnetic anomalies braketing a set of EM conductors. The western magnetic anomaly hosts two earlier discoveries referred to as the "Alfie" and the "Hook" Showings, which contain zinc, lead, silver and copper. The mineralization is similar in texture to VMS/SEDEX mineralization. The EM conductors are extremely elevated anomalies which appears to be related to massive sulphide mineralization.

The Company's Qualified Person, John Kowalchuk, P.Geo., has reviewed this release and is acting as the Qualified Person for this project.

For further information, contact Mr. Clive Shallow, investor communications, at 604-922-2030 or visit the Company's website at [www.bethlehemmining.com](http://www.bethlehemmining.com).

**6 Reliance on Section 85(2) of the Act**

Not applicable
