News Release **May 13, 2003**

CONTINUING GOOD DRILL RESULTS FROM EL ABRA, CINCO MINAS, MEXICO

Mr. David Henstridge, President, Tumi Resources Limited (TSXV - TM.V) is pleased to provide additional drill hole results from Cinco Minas, Mexico. Further excellent drill hole intersections from El Abra include **12m grading 2.83 g/t Au and 143 g/t Ag** in CMRC18 and **8m grading 2.02 g/t Au and 224 Ag** in CMRC19. All results from El Abra are as follows:

DRILL HOLE RESULTS FROM EL ABRA

[(1)] Previously reported on April 24, 2003.
*** diamond drill check of same interval in CMRC23*

The initial drill hole results are extremely encouraging and confirm the open pit potential of the area around the historic El Abra mine. Exploratory drilling has also been completed at San Pedro, Abrita and Cerro Colorado and results in these areas will be reported when results are received and assessed.

Drill samples for assay are prepared in Mexico and assayed at IPL Laboratory in Canada. Samples greater than 1 g/t gold are check assayed for gold and the Company has submitted a known standard (about one in every ten samples submitted) for check analysis. All bulk samples of RC chips and one half of drill cores along with all sample rejects prepared by the GM Lacme sample preparation laboratory in Mexico are stored for verification purposes. The Company's consulting geologist, Mr. John Nebocat, is the qualified person for the Cinco Minas Project.

The Company has now completed the first phase drill program at the Cinco Minas Project. The Company's objective was to drill test a number of prospects along the 5 km long Cinco Minas epithermal vein with a focus on the open pit potential at the historic El Abra mine area that was mined in the 1920's (1.08 million tonnes at 3.2 g/t gold and 476 g/t silver). The objectives established by management at the outset of the program have been achieved with the drill results confirming the open pit potential of the property. While drilling has been completed, work is ongoing with respect to an assessment of all the results and planning for the next phase work program.

Through an agreement with Minera San Jorge S.A. de C.V., the Company is earning a 60% interest and has the right to purchase the remaining 40% in the Cinco Minas Project.

Tumi Resources Limited, incorporated in British Columbia, Canada, trades on the TSX Venture Exchange under the symbol: **"TM".** The Company's directors are experienced in the resource sector and are focused on enhancing shareholder value by expanding Tumi's assets in this sector. Management aims to identify exploration projects of high merit and quickly complete confirmation exploration. This will enable the Company to confirm the potential of a project and reach advanced project status by the most cost effective and shortest time possible.

ON BEHALF OF THE BOARD

"David Henstridge"
