IFRS 16 MAIN IMPACTS

"....IFRS 16 is an International Financial Reporting Standard (IFRS) providing guidance on accounting for leases. IFRS 16 was issued in January 2016 and will be effective for most companies that report under IFRS in 2019. Upon becoming effective, it will replace the earlier leasing standard, IAS 17.The new standard will provide much-needed transparency on companies' lease assets and liabilities, meaning that off balance sheet lease financing is no longer lurking in the shadows. It will also improve comparability between companies that lease and those that borrow to buy....."

FY 2018 effects:

EBITDA 6.9 Euro mln (positive)

N.F.P. 25 Euro mln (negative)

FY 2019e effects:

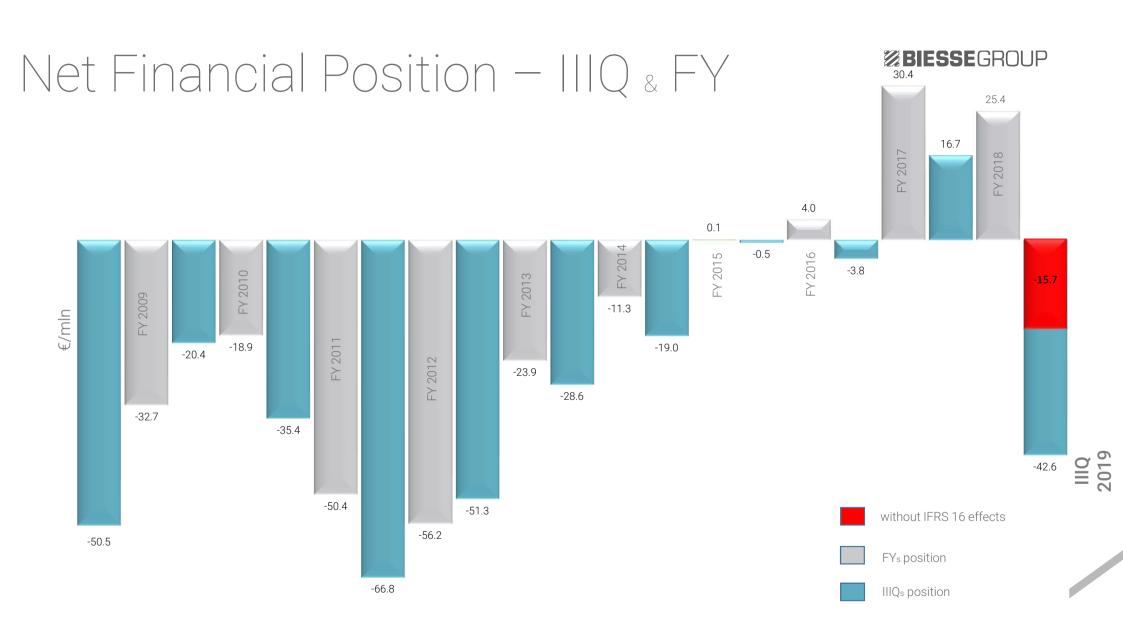

EBITDA 6.5-7.0 Euro mln (positive)

N.F.P. 26-27 Euro mln (negative)

PRESS RELEASE - THE PROFIT WARNING BIESSEGROUP

Pesaro June 21st 2019

As highlighted by the sector studies regarding the Biesse industries of reference (Acimall, VDMA, UCIMU) – surveys moreover confirmed by the official and unofficial orders intake data stated by the main competitors of the Group, the first 5 months of the 2019 have seen a considerable coolness of the demand, after a positive cycle lasted 4 years (2015-2018). In particular, for this wide sample basket of markets/companies, the negative delta between the 2019 new orders compared to the same period 2018 is amounting on average around -15% (with a peak of -19% communicated the last March by the main Biesse competitor in wood).

Despite the great Biesse performance during the LIGNA fair (Hannover, 27-31 May, more than 40 mln. of Euro of signed orders, confirming our offer and sale organization excellence), the Group can't shirk this slowdown dynamics and the Board of Directors intends prudently rectify the guidance for the FY 2019 lowering the forecast for consolidated sales and margins. Given that the actual demand volatility is making extremely aleatory any estimate, the consolidated sales are - at present expected to be in a range of 680-690 mln of Euro and the EBITDA in a range of 62-65 mln of Euro. The Group is anyway forecasting for the current year, despite the revision above mentioned, a positive Net Financial Position (before any IFRS 16 impact). For what is concerning the levels of the projected marginality for the FY 2019, it is good to reiterate that the Group will is to protect the investments regarding organization, products and markets in which it operates, being sure that this is the correct path to re-confirm our world leadership as soon as the demand will start again.

In the end, the consensus regarding the world economy trend for the next 12-18 months remains uncertain due to the widespread political and economic instability pervading the markets; consequently there is an objective complexity to read the demand for the three years plan 2019-2021.

So, with this state of the things, we can only assume a shift to the FY 2022 of the targets originally fixed for the FY 2021.

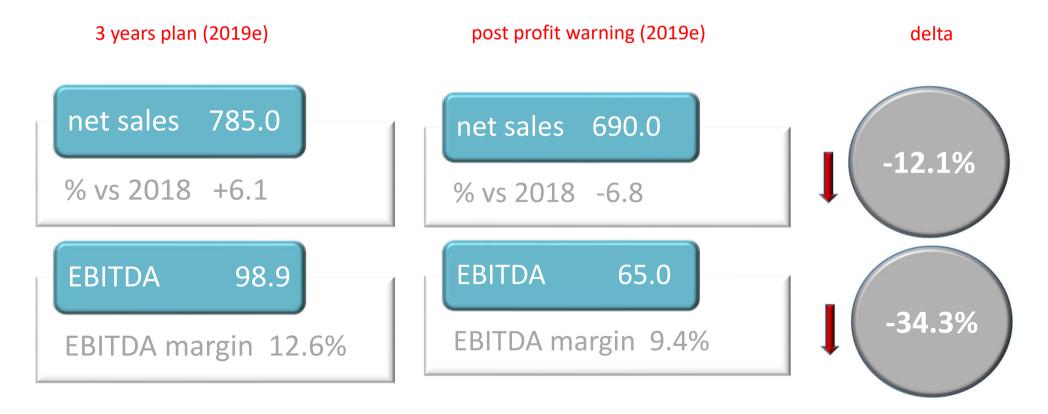

- Brexit uncertainty (elections-referendum)
- European political turmoils (i.e. Italy)
- Lack of focused incentives and a clear fiscal policy (Industry 4.0)
- Trade War fate (U.S.A. China Europe)
- Hong Kong tensions (Chinese impacts)
- Currency (i.e. turkish lira-rublo-renminbi) instability/weakness vs Euro (lower purchasing power)
- Perception of an increasing volatility (lower consumers confidence)
