Net Financial Position

As of 31 December 2023, the Group Net Financial Position was positive for 93.0 million euros, including the impact of 25.5 million euros (higher payables) deriving from the application of IFRS16. Without the effects linked to the application of IFRS16, the financial position would therefore be positive for 118.5 million euros. Compared to the previous year, the net financial position decreases by 23.6 million euros (2023 cash flow).

Comment of Biesse Group Chief Financial Officer:

“The results achieved during the past year and approved today - comments following the Board of Directors’ meeting the Group’s CFO Pierre La Tour – bear testimony to how Biesse has been affected by the negative dynamics of the global demand for

capital goods, closing - as expected - 2023 with lower volumes versus 2022, which was an exceptional year.

The cautious approach adopted by Biesse is proving to be the most adequate to face the challenges of the current global scenario, characterized by persistent uncertainties in the international context, the slowdown of demand, the continuation during 2023 of restrictive monetary policies that are impacting interest rates and the reshaping of government incentives that have stimulated our domestic market over recent years. These several factors do not allow for optimistic projections in the immediate future.

From a business point of view, the order portfolio at the end of 2023 has decreased versus 2022 - when the historical maximum level was reached – and has been affected by a changing and worsened economic scenario.

Being unable to govern exogenous inflationary pressures, we will continue to pursue efficiency actions within our structure, in continuity with the execution of the One Company project, introducing a higher level of flexibility, optimization of costs and a swift simplification of our business processes”.

Regarding the acquisition of GMM Group, completed in January, the Group CEO Roberto Selci said: “The entrance of GMM in the Group will allow us to complete our stone-working product portfolio and to further increase our offering of machinery and instruments for glass-working and other materials’ processing segments by integrating the technologies of a leading company in our productions, thus enhancing the presence, productivity and flexibility of our group.

We will continue to promote innovation and research since we are convinced that these are essential principles of our strategy, implementing new technical solutions that are based on connectivity and automation, for a sustainable development. Our cash position remains positive, and represents an important base

to sustain our organic growth and our future expansion through acquisitions”.

Order backlog

At the end of 2023, the order backlog amounted to 278.4 million euros (-38.3% compared to the same date of 2022 and -35.6% compared to the same date of 2021).

The order intake for the full year 2023 decreased by 13.3% compared to 2022 and by 24.1% compared to 2021.

In the fourth quarter of 2023 alone, order intake was lower than the same period in 2022 (-11.5%).

Revenue breakdown

Geographically, the Group's sales breakdown by macro-area at the end of December 2023 is:

- Western Europe 52.5% (52.4% as at December 2022) – of which Italy 20.3% (23.5% at the end of 2022)
- Eastern Europe 15.9% (13.8% as at December 2022)
- North America 17.6% (19.1% as at December 2022)
- Asia Pacific 11.4% (12.2% as at December 2022)
- Rest of the World 2.6% (2.5% as at December 2022)

By type, sales of machines & systems always account for the overwhelming majority of revenues (91.7%) compared to mechatronics (8.3%).
