

MANAGEMENT DISCUSSION AND ANALYSIS

SONORO ENERGY LTD.

This Management's Discussion and Analysis ("MD&A") of operations for the period ending June 30, 2020 un-audited consolidated financial statements presented herein are provided to enable readers to assess the results of operations, liquidity and capital resources of Sonoro Energy Ltd. ("Sonoro" or the "Company") is based on information available to August 14, 2020 and was approved by the Board of Directors. This MD&A should be read in conjunction with the unaudited condensed interim consolidated financial statements for the three and six months ended June 30, 2020 (the "Interim Financial Statements") the Company's audited year end December 31, 2019 consolidated financial statements and the 2019 annual MD&A (the "Annual MD&A"). The consolidated audited and un-audited financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS"). Additional information and continuous disclosure materials relating to the Company can be found on SEDAR at www.sedar.com. Information is also available on the Company's website at www.sonoroenergy.com. Unless otherwise stated, all dollar amounts are expressed in Canadian dollars, which is the Company's presentation currency.

Sonoro is an international oil and gas resource, exploration, and development company with a focus on South East Asia.

FORWARD-LOOKING STATEMENTS

Certain statements made herein, other than statements of historical fact relating to Sonoro, are forward-looking statements. These include, but are not limited to, statements respecting anticipated business activities, the receipt of government approvals, permits and leases, planned expenditures, including those relating to the exploration, development and production of its petroleum assets, corporate strategies, participation in projects and financing operations, the outcome of development activities in the exploration for, appraisal of and development and operations relating to oil and gas in Indonesia, technical risks and resource potential of the Company's drilling prospects.

When used in this MD&A, the words such as "could", "will", "anticipate", "believe", "seek", "propose", "plan", "estimate", "expect", "intend", "may", "potential", "should" and similar expressions, as they relate to the Company or an affiliate of the Company, are intended to identify forward-looking statements. Although the Company believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. Forward-looking statements are based on the opinions and estimates of management as at the date of this MD&A, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking statements described in this MD&A. Important factors that could cause actual results to differ from these forward-looking statements include those described under the heading "Risk Factors" elsewhere in this MD&A. The reader is cautioned not to place undue reliance on forward-looking statements. The Company assumes no obligation to update forward looking statements except to the extent required by applicable securities laws.

All such forward-looking information is based on certain assumptions and analyses made by management in light of experience and perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate in the circumstances. The risks, uncertainties, and assumptions are difficult to predict and may affect operations, including, without limitation: the risks associated with foreign operations; foreign exchange fluctuations; commodity prices; equipment and labour shortages and inflationary costs; general economic conditions; industry conditions; changes in applicable environmental, taxation and other laws and regulations as well as how such laws and regulations are interpreted and enforced; the ability of oil and natural gas companies to raise capital; the existence of operating risks; volatility of oil and natural gas prices; oil and natural gas product supply and demand; risks inherent in the ability to generate sufficient cash flow from operations to meet current and future obligations; increased competition; stock market volatility; opportunities available to or pursued by us and other factors, many of which are beyond the Company's control.

The forward-looking information contained herein is expressly qualified by this cautionary statement.

OPERATIONS

Indonesia and South-East Asia

The Company has an office in Jakarta, Indonesia where it conducts business for assessing and acquiring oil and gas projects in South East Asia. On October 14, 2019, the Company, its partner and the Government of Indonesia executed final documentation for the Selat Panjang PSC. Sonoro has a 25% interest in the project with an option for up to an additional 24%. The partner holds the balance. The consortium is in the process of taking over full operations of the concession.

The 940 sq. km Selat Panjang PSC area is situated in Riau province, Central Sumatra and is approximately 925 km from Jakarta and 110 km from Pekanbaru (capital city of Riau Province). The block has produced oil and gas in prior years. In 2014, the Indonesian Ministry of Energy approved a plan of development for further production however, in 2018, the block PSC was terminated by the Indonesian Ministry of Energy and as a result the Plan of Development was not implemented.

HIGHLIGHTS and OUTLOOK: QUARTER ENDED JUNE 30, 2020

- On October 7, 2019, the warrants expiring December 31, 2019 became due as a result of an acceleration clause feature within the warrants term. A total of 9,799,451 of the 14,291,000 five cent warrants outstanding were exercised by holders prior to their expiry. In addition, 1,053,333 of the March 2021 expiry five cent warrants were exercised.
- On October 14, 2019, along with the Company's local Indonesian partner, the Company executed final documentation for the Selat Panjang PSC. Sonoro has a 25% interest in the project with an option for up to an additional 24%.
- Sonoro Energy Ltd., through its wholly owned subsidiary, Zamatra Bakau Straits Ltd. BVI ("Zamatra") executed a Loan Agreement on October 19, 2019 with PT Menara Global Energi ("Menara"), a company incorporated in the Republic of Indonesia. Under the terms of the Loan Agreement, Zamatra may borrow up to US\$4 million from Menara at an interest rate of 8% for US dollar borrowings and 16% for IDR borrowings. Within the Loan Agreement, Zamatra via Sonoro Energy Ltd as the Borrower, issued a convertible debenture for CAD\$1,615,382, convertible into Sonoro Energy Ltd. Common shares at CAD\$0.085 per share. At the time of issuance (October 10, 2019), the convertible debenture represented approximately 19.9% ownership position in Sonoro. TSXV requirements do not allow for share issuance or potential share issuance if converted, representing above 20% ownership in a company without shareholder approval. The deemed interest rate calculation resulted in an allocation of \$357,409 to the Company's equity account.
- On January 23, 2020, the Company amended the term of the warrants from the March 26, 2018 financing from March 26, 2020 to December 30, 2020. 26,457,247 ten-cent warrants are outstanding.
- On February 6, 2020, the Company's five-cent warrants with an expiration of March 20, 2021 triggered an acceleration clause whereby the warrants expired within 30 days of February 6, 2020. All 4,233,334 five-cent warrants have been exercised resulting in gross proceeds of \$211,667.
- During 2020, the Company has been working with its partner to advance the development of the Selat Panjang PSC in Sumatra, Indonesia. The progress has not been significant due to many factors including Covid-19 issues in Indonesia. The first-year work program is minimal and has been completed for PSC purposes. It is imperative that the partnership progress the project and complete milestones such as execution of a JOA, a second year work program submission to SKK MIGAS, a third party reserve report and develop a strong working relationship with its partner to ensure seamless joint operations
- **The ability of the Company to continue as a going concern is dependent on the Company obtaining additional sources of capital to explore, appraise and develop its oil and gas resource assets, continuing to receive support and cooperation from its creditors, achieving profitable operations in Indonesia through the discovery of oil and gas resources, maintaining production sharing contracts in good standing and no significant adverse legal, political and security developments in Indonesia. Management of the Company continues to evaluate possible industry partnerships, equity and debt financing and regulatory approvals, but there is no assurance that these initiatives will be successful.**

FINANCIAL PERFORMANCE

Selected Financial Information

	For the three months ended		For the six months ended	
	June 30, 2020	June 30, 2019(2g)	June 30, 2020	June 30, 2019(2g)
Total Revenue	nil	nil	nil	nil
Net (loss) for the period	(341,440)	(283,692)	(731,368)	(452,189)
Net (loss) per share	(0.003)	(0.004)	(0.007)	(0.006)

Capital expenditures	nil	nil	nil	nil

As at	June 30, 2020	December 31, 2019
Total assets	2,038,142	2,165,199
Total long-term financial liabilities	4,087,654	3,735,519
Working capital	(2,281,465)	(1,952,428)

Results from Operations

The following paragraphs provide information about the results of Sonoro's on-going operations for the period end June 30, 2019 and 2018.

General and administrative expense

For the three and six months ended June 30, 2020, general and administrative expense totaled \$220,886 and \$470,057 respectively compared to \$274,110 and \$424,025 for the corresponding period in 2019. General and administrative costs were higher in the first half of the year 2020 as compared to the same period in 2019 mostly due to the increase activity in Indonesia following the signing of the Selat Panjang PSC.

The following table provides a breakdown of general and administrative expense for the period end June 30, 2020 and 2019:

	For the three months ended		For the six months ended	
	June 30, 2020	June 30, 2019(2g)	June 30, 2020	June 30, 2019(2g)
Employee salaries and benefits	60,381	60,558	140,792	123,126
Travel and accommodation	300	3,587	5,494	5,195
Professional, legal and advisory	39,876	70,993	90,423	65,805
Office and administration	15,879	34,328	38,510	56,854
Jakarta office and administration	104,450	104,644	194,838	173,045
Total expenses	220,886	274,110	470,057	424,025

Depreciation and amortization expense

The Company co-signed (50% commitment) an office lease for a 36-month term commencing November 1, 2019. The majority of the Company's lease liabilities have been reduced by subleasing arrangements. The Company's share of gross annual rent (excluding operating costs) is payable as follows: \$17,752 in 2020 and \$26,628 in 2021 and \$26,628 in 2022. Lease liabilities are as follows:

Three months ended	June 30, 2020
Balance, beginning of period	62,613
Interest expense	2,779
Balance, end of period	65,392
Current portion	28,892
Long-term portion	36,500
Lease obligation	65,392

Net loss for the periods

For the three- and six-months end June 30, 2020, the Company realized a net loss of \$341,440 and \$731,368 respectively compared to a net loss of \$283,692 and \$452,189 for the same periods in 2019. The net loss per share (basic and diluted) for the three and six months ended June 30, 2020 was \$0.003 and \$0.007 respectively as compared to \$0.004 and \$0.006 per share for the same periods in 2019.

Other comprehensive loss

The Company is required to translate activities of foreign operations from their functional currency into the Company's reporting currency being Canadian dollars. Assets and liabilities are translated at period end rates and revenues and expenses are translated at the average rate for the period. Foreign exchange effects resulted in a gain of \$173,359 for the three months end June 30, 2020 compared to a \$47,908 gain in the same period of 2019.

Capital expenditures

During the period ended June 30, 2020 there were no capital expenditures related to drilling.

Exploration and evaluation costs relating to the Selat Panjang Production Sharing Contract ("PSC") are as follows:

December 31, 2019	1,893,463
Additions	-
June 30, 2020	1,893,463

Quarterly Information

The following financial information is for each of the eight most recently completed quarters of the Company and has been adjusted to reflect the discontinued operations.

Quarter ended	Total Revenue	Net (loss) for the period	Net (loss) per share basic and diluted
	\$	\$	\$
June 30, 2020	nil	341,440	0.00
March 31, 2020	nil	389,928	0.00
December 31, 2019	nil	884,540	0.01
September 30, 2019	nil	29,108	0.00
June 30, 2019	nil	283,692	0.00
March 31, 2019	nil	168,497	0.00
December 31, 2018	nil	400,028	0.01
September 30, 2018	nil	233,657	0.00

Liquidity and Capital Resources

Working capital

Sonoro had negative working capital of \$2,281,465 on June 30, 2020 compared with negative working capital of \$1,952,428 on December 31, 2019. The Company expects to fund this deficit based on a financing plan that is underpinned with the Selat Panjang PSC.

Cash

The Company had cash of \$58,074 on June 30, 2020, down from \$180,243 on December 31, 2019. The liquid portion of the working capital consists of cash in non-interest-bearing accounts held at banks and highly liquid investments, which are readily convertible to known amounts of cash.

Management of this cash is conducted in-house based on investment guidelines approved by the Board of Directors, which generally specify that investments be made in conservative money market instruments that carry a low degree of risk. The objective of these investments is to preserve funds for use in the Company's strategy of exploration and development.

Cash Used in Operating Activities

For the three and six months ended June 30, 2020, cash used for continuing operating activities was \$31,521 and \$168,390 respectively, as compared to \$115,892 and \$350,677 for the same periods in 2019. Cash used in operating activities was used for general operating activities.

Outstanding Share Data

On March 29, 2019 the Company announced the closing of a non-brokered private placement for total gross proceeds of \$312,000. The Company sold 10,400,000 units (a "Unit") at a price of \$0.03 per Unit where each Unit consists of one common share (a "Common Share") of the Company and one common share purchase warrant (a

“Warrant”) of the Company, where each whole Warrant entitles the holder to purchase one Common Share within two years at a price of \$0.05 per Common Share.

On March 29, 2019, the Company extended the term of the five cent warrants associated with the April/May 2017 common share and warrant financing to December 31, 2019. The extension was also subject to an acceleration clause that was subsequently triggered on September 5, 2019 and resulted in the warrants expiring on October 7, 2019. 9,799,451 warrants were exercised for an equal number of common shares.

On February 6, 2020 4,333,334 five cent warrants were exercised for gross proceeds of \$215,667. 16,667 options were exercised into common shares during the quarter.

As at June 30, 2020, Sonoro Energy Ltd. has 109,229,230 Common Shares outstanding, and 26,207,247 10 cent warrants outstanding.

The Common Shares trade on the TSX Venture Exchange under the symbol SNV.

Commitments

The Company has a month to month office lease in Jakarta, monthly rent is approximately \$2,800.

Off-Balance Sheet Arrangements

The Company does not utilize off-balance sheet transactions.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The significant accounting policies are outlined in Note 2 to the audited consolidated financial statements of the Company for the year ended December 31, 2019. These accounting policies have been applied consistently for the period ended June 30, 2020 and there have been no changes.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reported periods. Uncertainties about these assumptions and estimates could result in material adjustments to the Company's financial statements and financial position. A description of the Company's significant areas of estimation uncertainty and critical judgments are contained in Note 2(f) to the condensed consolidated interim financial statements (the “Interim Financial Statements”) of the Company for the three and six months ended June 30, 2020.

Internal Controls Over Financial Reporting and Disclosure Controls

As a reporting issuer listed on the TSX Venture Exchange, Sonoro is exempted from certifying as to disclosure controls and procedures (“DC&P”), as well as Internal Control over Financial Reporting (“ICFR”). The Company's Chief Executive Officer and Chief Financial Officer file a “basic” certificate under National Instrument 52-109 – *Certificates* (“NI 52-109”). Accordingly, the Company has made no assessment relating to establishment and maintenance of disclosure controls and procedures or internal controls over financial reporting as defined under NI 52-109 as of June 30, 2020.

Financial Instruments

Financial instruments are any contracts that give rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial assets are classified in one of the following categories: subsequently measured at amortized cost, fair value through other comprehensive income (“FVTOCI”), or fair value through profit or loss (“FVTPL”). Financial liabilities are initially recognized at fair value, and subsequently measured based on classification in one of the following categories: subsequently measured at amortized cost and FVTPL. Financial assets and liabilities are not offset unless there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

Financial assets and liabilities subsequently measured at amortized costs are measured using the effective interest method. The effective interest method is a method of calculating the amortized costs of a financial liability and of allocating interest expense over the relevant period. Transaction costs that are directly attributable to the acquisition or issue of a financial instrument are measured at amortized cost and added to the fair value initially recognized.

Financial instruments at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. Unrealized gains and losses on FVTPL financial instruments related to trading activities are recognized

in marketing and other in the consolidated statements of income (loss), and unrealized gains and losses on all other FVTPL financial instruments are recognized in other – net. Transaction costs directly attributable to the acquisition of financial assets or liabilities at FVTPL are recognized immediately in profit or loss. Financial instruments at FVTOCI are stated at fair value, with any gains or losses arising on remeasurement recognized in OCI except for impairment gains or losses and foreign exchange gains and losses.

Financial instruments subsequently revalued at fair value are further categorized using a three-level hierarchy that reflects the significance of the inputs used in determining fair value. Level 1 fair value is determined by reference to quoted prices in active markets for identical assets and liabilities. Level 2 fair value is based on inputs that are independently observable for similar assets or liabilities. Level 3 fair value is not based on independently observable market data. The disclosure of the fair value hierarchy excludes financial assets and liabilities where book value approximates fair value.

A financial asset is derecognized when the contractual rights to the cash flows from the financial asset have expired, or it transfers the contractual rights to receive the cash flows of the financial assets and the Company has transferred substantially all the risks and rewards of ownership of the financial asset. A financial liability is derecognized when the liability is extinguished, discharged, cancelled or expires.

BUSINESS RISKS

The oil and gas industry is very competitive and is subject to many risks, many of which are outside of the Company's control. The risks described below are not the only ones facing the Company. Additional risks not presently known to the Company or that the Company currently deems immaterial may also impair the Company's business operations. If any of the following risks actually occur, Sonoro's business, financial condition and operating results could be materially and adversely affected. The risks associated with the Company's business include:

Licenses and Permits

On October 14, 2019, the Company, its partner and the Government of Indonesia executed final documentation for the Selat Panjang PSC. Sonoro has a 25% interest in the project with an option for up to an additional 24%. The partner holds the balance. The consortium is in the process of taking over full operations of the concession.

The 940 sq. km Selat Panjang PSC area is situated in Riau province, Central Sumatra and is approximately 925 km from Jakarta and 110 km from Pekanbaru (capital city of Riau Province). The block has produced oil and gas in prior years. In 2014, the Indonesian Ministry of Energy approved a plan of development for further production however, in 2018, the block PSC was terminated by the Indonesian Ministry of Energy and as a result the Plan of Development was not implemented.

Sonoro's operations also require licenses and permits from various governmental authorities. There can be no assurance that Sonoro will be able to obtain or maintain all necessary licenses and permits that may be required to carry out exploration, development and/or operations of its projects. In addition, requirements applicable to sustain existing permits and licenses may change or become more stringent over time and there is no assurance Sonoro will have the resources or expertise to meet its obligations under such licenses and permits.

Capital Requirements

The Company has financed itself through shareholders exercising warrants throughout 2019. The majority of these funds have been spent and the Company has a substantial negative working capital balance.

The Company has no cash flow from operations, and current cash resources are insufficient to fund its entire business plans. The Company will require substantial additional cash resources prior to achieving sufficient free cash flow to fund its operations. Sonoro expects to fund these cash requirements through future financings involving the sale of equity or debt securities, through joint venture or farm-out arrangements, or by other means. **There is no assurance that the Company will be able to secure financing or that such financing will be obtained on favorable terms. Failure to obtain adequate financing could: (i) have a material adverse effect on Sonoro's financial condition, results of operations and prospects; and (ii) result in substantial dilution to Sonoro's existing shareholders.** The Company cannot provide any assurance that it will be profitable in the future or that the Company will be able to generate cash from operations or financings to fund working capital deficits.

Exploration, Development and Production Risks

Sonoro's exploration, appraisal, development and production of oil and gas in Indonesia and South-East Asia is speculative.

Oil and gas exploration involves a high degree of risk and is frequently unsuccessful. There is no assurance that expenditures made on future exploration by Sonoro will result in new discoveries of oil and gas in commercial quantities. The long-term commercial success of the Company's oil and gas activities depends on its ability to acquire, develop and commercially produce oil and gas reserves. No assurance can be given that Sonoro will be able to locate satisfactory reserves or resources on an economic basis.

Future exploration and development may involve unprofitable efforts, not only from dry wells, but from wells that are productive but do not produce sufficient net revenues to return a profit after drilling, operating and other costs. Completion of a well does not assure a profit on the investment or recovery of drilling, completion and operating costs. In addition, drilling hazards or environmental damage could greatly increase the cost of operations and various field operating conditions may adversely affect the production from successful wells. These conditions include delays in obtaining governmental approvals, permits, licenses, authorizations or consents, unusual or unexpected geological formations, formation pressures, geotechnical and seismic factors, occupational and health hazards, technical failures, shut-ins of connected wells resulting from extreme weather conditions, insufficient storage or transportation capacity, labour disputes, fires, explosions, power outages, rock falls, landslides, acts of God, or other geological and mechanical conditions. While close well supervision and effective maintenance operations can contribute to maximizing production rates over time, production delays and declines from normal field operating conditions cannot be eliminated and can be expected to adversely affect revenue and cash flow levels to varying degrees.

In addition, oil and gas activities are subject to the risks of exploration, appraisal, development and production of oil and gas properties, including encountering unexpected formations or pressures, premature declines of reservoirs, blow-outs, cratering, sour gas releases, fires and spills, all of which could result in personal injuries, loss of life and damage to the property of Sonoro and others. Losses resulting from the occurrence of any of these risks could have a materially adverse effect on the future results of operations, prospects, business, liquidity and financial condition of Sonoro.

In addition, there can be no assurance that the Company will be able to manage effectively the expansion of its operations or that the Company's current personnel, systems, procedures and controls will be adequate to support the Company's operations. Any failure of the Board of Directors to effectively manage the Company's growth and development could have a material adverse effect on the Company's business, financial condition and results of operations. There is no certainty that all or any of the elements of the Company's current strategy will develop as anticipated and that the Company will be profitable.

Resource Estimates

There are numerous uncertainties inherent in estimating quantities of prospective and contingent oil and gas resources. All such estimates, including those in the Company's prospective resource reports, are to some degree speculative, and classifications of prospective resources are only attempts to define the degree of speculation involved. For these reasons, estimates of the prospective resources attributable to the Company's prospects and the classification of such resources based on risk of recovery associated with resource estimates prepared by different engineers, or by the same engineers at different times may vary. Further, there is no certainty that any portion of the prospective resources will be discovered. If a discovery is made, there is no certainty that it will be developed or, if it is developed, there is no certainty as to timing of such development or that it will be commercially viable to produce any portion of the prospective or contingent resources.

Joint Ventures

The Company carries out a portion of its business through joint ventures and similar arrangements with third parties. These arrangements involve a number of risks, including:

- disputes with partners in connection with the performance of their obligations under the relevant joint operating agreements;
- disputes as to the scope of each party's responsibilities under such arrangements;
- financial difficulties encountered by partners affecting their ability to perform their obligations under the relevant joint operating agreement; and
- conflicts between the policies or objectives adopted by partners and those adopted by the Company.

In the event that the Company encounters any of the foregoing issues with respect to its joint operating partners, the Company's business, prospects, financial condition and results of operation may be materially and adversely affected.

Foreign Activities in Indonesia

The Company's principal activities are located in Indonesia, which may experience periods of civil unrest, terrorism, violence and war, as well as political and economic instability. Oil and Gas activities in Indonesia may be affected in varying degrees by: (i) civil unrest, terrorism, violence and war, as well as political and economic instability; (ii) government regulations and intervention relating to the mining and oil and gas industries and foreign investors therein; and (iii) policies of other countries. Any changes in regulations or shifts in political conditions are beyond the control of Sonoro and may adversely affect its business, results of operation, prospects, liquidity and financial condition.

Operations may be affected in varying degrees by government regulations, policies, rulings or directives with respect to restrictions on production or sales, price controls, export controls, repatriation of income, income taxes, expropriation of property, environmental legislation and obtaining visas for Sonoro personnel and contractors. Operations may also be affected in varying degrees by political and economic instability, including economic or other sanctions imposed by other countries, expropriation of assets without fair compensation, adverse legislation in Indonesia and/or the Province, a change in crude oil or natural gas pricing policy, availability of oil transport trucks, finding acceptable gas conservation solutions, terrorism, civil strife, acts of war, guerrilla activities, military repression, crime, material fluctuations in currency exchange rates, high inflation, nationalization, renegotiation or nullification of existing concessions and contracts, taxation policies, the imposition of specific drilling obligations, and the development and abandonment of fields.

Infrastructure development in Indonesia is limited, which may affect the Company's ability to explore and develop its properties and to store and transport potential future oil and gas production. The lack of suitable infrastructure or lack of access to existing infrastructure may impede the production activities as the ability to implement the plan of operations is dependent upon the ability to access existing infrastructure or procure the construction and development of suitable infrastructure and any delays or failures in this regard could adversely affect the business. There may also be no available refining capacity in the region and the Company may be required to build additional facilities to process its entire production. In addition, the Company may be required to establish camps for all of its field operations.

Management of Key Relationships in Indonesia

Failure to manage relationships with local communities, government and non-government organizations could adversely impact Sonoro's business in Indonesia. Negative community reaction to operations could have an adverse impact on operations, profitability, and the ability to finance or even the viability of Sonoro in Indonesia. This reaction could lead to disputes that may damage the Company's reputation and could lead to potential disruption to projects or operations.

Prices, Markets and Marketing

The marketability and ultimate commerciality of end product sales that may be acquired, discovered or produced by Sonoro is, and will continue to be, affected by numerous factors beyond the complete control of the Company, including:

- the impact that the various levels of government may have on the ultimate price received for its products, the export of products and other aspects of the oil and gas industry;
- reservoir characteristics;
- the proximity and capacity of oil and gas pipelines and processing facilities and equipment;
- the availability and proximity of pipeline capacity and sales markets;
- security issues;
- the local supply of and demand for oil;
- the effects of inclement weather;
- the availability of drilling, production and related equipment and supplies, as well as services, all of which may be disrupted for a number of reasons;
- the hazards related to drilling and associated operations;
- unexpected cost increases;
- accidental events;
- currency fluctuations;
- the availability and productivity of skilled labour; and
- adverse legislation in the regions in which it operates.

Prices for oil and gas, as well as prices underlying end product sales, are unstable and are subject to fluctuation and subject to various factors beyond Sonoro's control. Over the past couple years, both oil and gas prices remained volatile. Any material decline in prices could have a material adverse effect on Sonoro's business by making development and/or operations uneconomic, restricting the ability to obtain further financing and other factors.

Oil and gas operations (exploration, production, pricing, marketing and transportation) are subject to extensive controls and regulations imposed by various levels of government, which may be amended from time to time. Restrictions on the ability to market the Company's production could have a material adverse effect on the Company's revenues and financial position. Because of the above-mentioned factors, the Company could be unable to execute projects on time, on budget, or at all, and may not be able to effectively market the oil and natural gas that it may produce.

Risks Associated with the Need to Maintain an Effective System of Internal Controls

The Company faces risks frequently encountered by developing companies such as under-capitalization, cash shortages and limited resources. In particular, its future growth and prospects will depend on its ability to manage growth and to continue to maintain, expand and improve operational, financial and management information systems on a timely basis, while at the same time maintaining effective cost controls. Any damage to, failure of or inability to maintain, expand and upgrade effective operational, financial and management information systems and internal controls in line with the Company's growth could have a material adverse effect on the Company's business, financial condition and results of operations.

Cost of New Technologies

The oil and gas industry is characterized by rapid and significant technological advancements and introductions of new products and services utilizing new technologies. Other oil and gas companies may have greater financial, technical and personnel resources that allow them to enjoy technological advantages and may in the future allow them to implement new technologies before the Company does. There can be no assurance that the Company will be able to respond to any such competitive pressures and implement such technologies on a timely basis or at an acceptable cost. One or more of the technologies currently utilized by the Company or implemented in the future may become obsolete. In such case, the Company's business, financial condition and results of operations could be materially adversely affected. If the Company is unable to utilize the most advanced commercially available technology, the Company's business, financial condition and results of operations could be materially adversely affected.

Operating Hazards

Oil exploration, development and production operations are subject to all the risks and hazards typically associated with such operations, including hazards such as pollution, cratering, fire, explosion, environmental damage, blowouts and oil spills, each of which could result in substantial damage to oil wells, production facilities, other property and the environment or in personal injury or death. Sonoro's involvement in oil and gas activities may result in such risks and hazards and its subsequent liability.

Although Sonoro plans to carry insurance in accordance with industry standards to address such risks, such insurance has limitations on liability that may not be sufficient to cover the full extent of such liabilities. In addition, such risks may not, in all circumstances be insurable or, in certain circumstances Sonoro may elect not to obtain insurance to deal with specific risks due to the high premiums associated with such insurance or other reasons. The nature of these risks is such that liabilities could exceed policy limits, in which event Sonoro could incur significant costs that could have a material adverse effect upon its financial condition. The payment of such uninsured liabilities would reduce the funds available to Sonoro. The occurrence of a significant event that Sonoro is not fully insured against, or the insolvency of the insurer of such event, could have a material adverse effect on Sonoro's financial position, business, and results of operations or prospects.

Environmental

All phases of the oil and gas business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and state and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with oil and gas operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. The discharge of oil, natural gas or other pollutants into the air, soil or water may give rise to liabilities to foreign governments and third parties and may require the Company to incur significant costs to remedy such discharge. No assurance can be given that changes in environmental laws or their application to the Company's operations will not result in a curtailment of production or a material increase in the costs of production, development or exploration activities or otherwise adversely affect the Company's financial condition, results of operations or prospects.

Foreign Legal and Judicial Systems

The jurisdictions in which Sonoro operates have less developed legal systems than more established economies which may result in risks such as (i) ineffective legal redress in the courts of such jurisdictions, whether in respect of a breach of law or regulation, or, in an ownership dispute, being difficult to obtain; (ii) a higher degree of discretion on the part of governmental authorities; (iii) the lack of judicial or administrative guidance on interpreting applicable rules and regulations; (iv) inconsistencies or conflicts between and within various laws, regulations, decrees, orders and resolutions; (v) relative inexperience of the judiciary and courts in such matters; or (vi) in certain jurisdictions the commitment of local business people, government officials and agencies and the judicial system to abide by legal requirements and negotiated agreements may be more uncertain, creating particular concerns with respect to licenses and agreements for business. These may be susceptible to revision or cancellation and legal redress may be uncertain or delayed. There can be no assurance that joint ventures, farm-in agreements, licenses, license applications or other legal arrangements will not be adversely affected by the actions of government authorities and the effectiveness of and enforcement of such arrangements in these jurisdictions cannot be assured.

Foreign Exchange

The Company has historically conducted its financings in Canadian dollars and a significant amount of its operating expenditures and financial commitments are denominated in United States dollars and Indonesian Rupiah. Where there are fluctuations in the United States dollar exchange rate, Sonoro's revenue margins may be materially affected.

Farm-out and Joint Venture Partners

The Company may enter into further farm-out agreements to fund a portion of the exploration and development costs associated with its assets. Moreover, other companies may from time to time operate some of the other assets in which the Company has an ownership interest. Liquidity and cash flow problems encountered by the partners and co-owners of any assets in which Sonoro has an interest, and any non-compliance by the partners and co-owners may lead to a delay in the pace of drilling or project development that may be detrimental to a project or may otherwise have adverse consequences for the Company. In addition, any farmout partners and working interest owners may be unwilling or unable to pay their share of the costs, including project costs as they become due. In the case of a farmout partner, the Company may have to obtain alternative funding in order to complete the exploration and development of the assets subject to such farmout agreement. In the case of a working interest owner, the Company may be required to pay the working interest owner's share of the project costs. The Company cannot assure investors that it would be able to obtain the capital necessary in order to fund either of these contingencies. It is also possible that the interests of the Company and those of its joint venture partners are not aligned resulting in project delays or additional costs or losses.

Canadian and Foreign Tax Considerations

The Company is subject to the provisions of the *Income Tax Act* (Canada) and the applicable provincial and foreign income tax legislation. The Company is in the business of exploring for oil and gas and its operations are subject to the unique provisions of the tax legislation. The Company has not filed all of its tax returns as certain companies are considered idle and not yet closed and de-registered. The tax returns can be reassessed by either government and if a reassessment were successful, the Company may be subject to a higher than expected past or future tax liability, as well as potential interest or penalties.

Litigation

The Company is not aware of any legal claims against the Company.
