

NEWS RELEASE

NEUTRISCI ANNOUNCES DUAL LISTING ON THE FRANKFURT STOCK EXCHANGE

Vancouver, British Columbia – August 29, 2016 – NeutriSci International Inc. (the "Company" or "NeutriSci") (TSX-V: NU) (FRANKFURT: 1N9) the innovator and pioneer behind neuenergy™, is pleased to announce that the Company's shares have been accepted for trading on the Frankfurt Stock Exchange under the trading symbol "1N9".

With this listing, NeutriSci's common shares are now dual-listed on the TSX Venture Exchange and the Frankfurt Stock Exchange, one of the largest stock exchanges in the world. The Company anticipates this Frankfurt listing will increase trading liquidity and facilitate investment in NeutriSci by investors in Germany, Switzerland, Luxembourg and the rest of Europe.

This listing is an integral part of the Company's long-term strategic plan to increase shareholder value while simultaneously positioning the Company for expansion into the German and European retail markets. NeutriSci obtained this listing in an effort to establish corporate awareness and brand recognition throughout Europe as it begins its strategic plan for distribution within Germany and Austria; one that provides the practical, financial and logistical foundation in which to introduce neuenergy™ to these markets.

Mr. Glen Rehman, President of NeutriSci International, stated, "We are excited by today's announcement. This dual listing process began as a direct response to the positive interest generated over the past few months from European investors towards the Company and neuenergy. While we continue with our core focus on getting neuenergy onto as many store shelves in Canada as possible, this listing is the start of the Company's long-term plan to expand our shareholder base and ultimately introduce neuenergy to a global audience."
