

Kuwait Oil Company installs ECO3 on plant infrastructure

VANCOUVER, Feb. 19, 2015 /CNW/ - **Smartcool Systems Inc.** (TSX-V: SSC) is pleased to announce that its exclusive ECO3 distributor in Kuwait, Life Energy has signed a contract with the Kuwait Oil Company to install 45 ECO3 units in Gathering Centers and Water Injection plants throughout the company's facilities in Kuwait.

The Smartcool technology was installed as a pilot on a select number of Gathering Centers in 2014. When the results demonstrated the performance capabilities, Kuwait Oil Company decided to install ECO3's on all of A/C units that provide cooling at these facilities. Once these units have been installed a total of five out of 26 sites will be receiving the benefit of the technology.

George Burnes, President of Smartcool Systems Inc said, "We see this as a significant development in our efforts to expand into new territories. In light of its climate and high demand for cooling, we believe that the Middle East offers obvious growth opportunities for our technology and brand, and Life Energy's success with a high profile client like the Kuwait Oil Company confirms our confidence in the region."

Donnie L. Gregory, Business Development Officer for Life Energy says, "Securing additional work with the Kuwait Oil Company has allowed us to leverage this reference client into approaching other clients which will expand our install base with the Smartcool technology. We have already been asked to identify saving opportunities at shopping malls and office buildings within Kuwait."

Legal Notice Regarding Forward Looking Statements

This news release contains "forward looking statements". Forward-looking statements are projections of financial performance or future events. Forward-looking statements can be identified by the use of words such as "expect", "anticipate", "intend", "plan", "believe", "estimate" and words of similar meaning. Forward-looking statements are based on management's current expectations and assumptions and they are subject to risks that may cause actual results to differ materially from those expressed or implied by such forward looking statements. Forward-looking statements in this news release include those concerning the company's belief in the growth opportunities in the Middle East. These statements are subject to risks that may cause the actual results to be materially different in future periods from those expressed or implied by such forward looking statements. Risks that may prevent or delay the forward looking statements from coming to fruition as anticipated include the availability of working capital, risks inherent in product development, as well as market factors that may increase costs or time to market. It is our policy not to update forward looking statements except to the extent required under applicable securities laws.
