

CO₂ Solutions to Exhibit at GLOBE 2016 Conference and Innovation Expo

Quebec City, February 24, 2016—CO₂ Solutions Inc. (or “the Corporation”) (TSX-V: CST), the leader in the field of enzyme-enabled carbon capture technology, today announced that the Corporation will be showcasing its technology and successful results of its Valleyfield demonstration project at the GLOBE 2016 Conference and Innovation Expo, the Leadership Summit for Sustainable Business. The event, held in Vancouver, will run from March 2-4, 2016.

GLOBE is North America's largest and longest-running Conference and Exposition series dedicated to business innovation for the planet. This year's exhibition has been billed as The Road from Paris: a raft of new GLOBE Series partners, such as the International Institute for Sustainable Development (IISD) and the International Emissions Trading Association (IETA), will help make sense of the post #COP21. For more information visit www.globeseries.com/.

CO₂ Solutions has also been invited, as one of only six companies and organizations to contribute to a highly anticipated panel discussion, entitled Carbon Capture & Conversion: Innovations, Challenges and Solutions. Mr. Jonathan Carley, Vice President, Business Development for CO₂ Solutions will be representing the Corporation. The panel will be moderated by Richard Adamson, President of Carbon Management Canada (CMC) Research Institutes. In addition to CO₂ Solutions, the panel will have senior representatives from Clean Fossil Fuels Group, CanmetENERGY, General Electric, Climate Change Emissions Management Corporation (CCEMC) and ConocoPhillips Canada. The panel discussion will take place from 5 p.m. to 8:30 p.m., Tuesday, March 1, 2016 at VIFF's Vancity Theatre (1181 Seymour Street, Vancouver, BC). Interested parties can register via <https://www.picatic.com/cleantech2016>

At the main event, a delegation from Quebec will host a pavilion, showcasing cutting edge clean technology solutions from the province including CO₂ Solutions' proprietary carbon capture process (Exhibit #1000, Main Hall, Vancouver Convention Centre).

Mr. Carley commented, “This is the biggest event of its kind in North America and attracts a large number of industry and government attendees whose needs and objectives coincide with CO₂ Solutions' value proposition of low cost, environmentally friendly carbon capture. The breakthrough results we continue to deliver with our technology have created growing recognition and momentum for the Corporation that we are seeking to capitalize on at events like GLOBE”.

Canada's Prime Minister, Justin Trudeau, will deliver the opening conference address, while more than 2,000 thought leaders, policy makers, and financial, corporate and environment industry executives will come together to discuss how to parlay environmental and social challenges, such as climate change, into opportunities.

“We are honoured to have Prime Minister Trudeau address the hundreds of leaders coming to GLOBE 2016,” said Mike Gerbis, CEO of GLOBE Series. “The Prime Minister has stated that Canada will maximize the opportunities of the shift to a low-carbon economy,” added Gerbis. “Business, NGO, and government leaders from around the world come to GLOBE to discuss how to maximize those opportunities and turn political commitments like those just made in Paris into solutions on the ground.”

About CO₂ Solutions Inc.

CO₂ Solutions is an innovator in the field of enzyme-enabled carbon capture and has been actively working to develop and commercialize the technology for stationary sources of carbon pollution. CO₂ Solutions' technology lowers the cost barrier to Carbon Capture, Sequestration and Utilization (CCSU), positioning it as a viable CO₂ mitigation tool, as well as enabling industry to derive profitable new products from these emissions. CO₂ Solutions has built an extensive patent portfolio covering the use of carbonic anhydrase,

or analogues thereof, for the efficient post-combustion capture of carbon dioxide with low-energy aqueous solvents. Further information can be found at www.co2solutions.com
