About Finlay Minerals Ltd.

Finlay is a TSXV company focused on exploration for base and precious metal deposits on three properties in northern British Columbia:

- The **Silver Hope Property** covers 213.11 km² and surrounds the past-producing Equity Silver Mine in the prospective Skeena Arch region of central B.C. The Silver Hope contains the Main Trend which is a >2km Cu-Ag-Au mineralized trend with mineralization starting at surface. West of the Main Trend is the West Cu-Mo Porphyry which is also mineralized starting from surface. The Property hosts a network of forestry roads and trails and has all-year access from Houston, BC.
- The **ATTY Property** covers 33.93 km² of sub-alpine terrain in the southern Toodoggone region. The Toodoggone is a northwest-trending belt of Triassic to Jurassic arc terranes that hosts numerous significant porphyry Cu-Au ± Ag and associated epithermal Au-Ag deposits. The ATTY Property is in between and contiguous to Centerra Gold's Kemess Property and the joint-ventured Joy Property held by Amarc and Freeport-McMoRan. The ATTY's KEM target has similarities to the Kemess North Trend which hosts the Kemess Underground and Kemess East deposits.
- The **PIL Property**, which covers 170 km² in the heart of the Toodoggone region has numerous targets of porphyry Cu-Au ± Ag and associated epithermal Au-Ag mineralization. The property is in Year 3 of a 5-year option to Cascadia Minerals Ltd. (formerly ATAC Resources Ltd.), on completion of which Cascadia may acquire a 70% interest in the PIL. Following the exercise of the option, Cascadia and Finlay will hold interests in the Property of 70% and 30%, respectively, and a joint venture will be formed.
