About Seair Inc.

Seair Inc. is a Calgary based cleantech company. Seair has commercialized proprietary technology that can diffuse gases, such as oxygen, ozone and carbon dioxide, into liquids more effectively and with lower power consumption than the competition. Seair's patented technologies can produce micron size bubbles that are more efficient than other diffusion technologies because the diffused gases remain in solution for extended periods of time, leading to increased productivity and lower operating costs. Seair has been working with customers in the Oil and Gas industry for over five years. Seair applications include oil sands SAGD water solutions, frac and produced water treatment, industrial ponds treatment, mine dewatering/treatment, end-to-end sewage treatment for permanent residential communities and remote work camps, golf course irrigation and pond treatment and most recently, industrial emissions treatment.
