PRESS RELEASE

For immediate release

TRECESSON PROPERTY ENLARGEMENT BY STAKING

Val-d'Or, Quebec, August 15 , 2017 – Knick Exploration Inc. (TSX-V: KNX) (“Knick Exploration” or “the Company”) is pleased to announce that it has applied for a total of 43 claim cells by map staking covering 2,103.62 hectares (5198.16 acres) as an enlargement to its presently 6,237 hectare (26,107 acres) **Trecession Property** land position, situated in the Amos-Val d'Or Mining Camp, Quebec. The property is located approximately 80 kilometers north and 10 kilometers northwest of the cities of Val D'Or and Amos, Quebec, Canada, respectively.

Logging and sampling of the core from Knick's 2017 drill program on the Cossette Gold System of the Trecession property have been completed and final assay results are pending. The company is reviewing all historical data and previous drilling of the Trecession property.

Samples have been sent to Expert Laboratory in Rouyn-Noranda, Quebec for analysis.

Fire assay and **metallic sieve** methods are being implemented for analysis as deemed **warranted**.

Due to the nature of the **native gold mineralization** occurring on the **Trecession Property**, **Metallic Sieve** gold analysis is being performed on all quartz veining to minimize “nugget effect” results and more accurately assess gold grades.
