MATERIAL CHANGE REPORT

1. Reporting Issuer

Full name of the Issuer:

AuEx Ventures, Inc. ("AuEx" or the "Company")

The address of the principal office in Canada of the reporting issuer is as follows:

Unit 1 – 15782 Marine Drive
White Rock, British Columbia
V4B 1E6

PHONE: (604) 536-2711

2. Date of Material Change

June 28, 2007

3. Press Release

The date and place(s) of issuance of the press release are as follows:

June 28, 2007

The Press Release was released to the TSX Venture Exchange being the only exchange upon which the shares of the Company are listed, and through various other approved public media.

4. Summary of Material Change(s):

AuEx Ventures, Inc. (AuEx) reported assay results provided by joint venture partner Agnico-Eagle (USA) Limited (Agnico-Eagle) from ongoing reverse circulation drilling being conducted and funded by Agnico-Eagle at the Company's West Pequop gold exploration property located in Elko County, Nevada.

5. Full Description of Material Change

See attached news release NR2007-11 dated June 28, 2007, which is hereby incorporated by reference.

6. Reliance on subsection 7.1(2) or (3) of National Instrument 51-102

Not Applicable

7. Omitted Information

Not Applicable

8. Executive Officer

The following senior officer of the Company is knowledgeable about the material change and may be contacted by the Commission at the following address and telephone number:

Doris Meyer, Chief Financial Officer and
Corporate Secretary
Unit 1- 15782 Marine Drive
White Rock, British Columbia
V4B 1E6
PHONE: (604) 536-2711

9. Date of Report

DATED at White Rock, British Columbia, this 28th day of June 2007.

"Doris Meyer"
Doris Meyer, Corporate Secretary

AUEX VENTURES, INC.

FOR IMMEDIATE RELEASE **TSX.V: XAU**
NR07-11 June 28, 2007

SIGNIFICANT DRILL OFFSET TO GOLD MINERALIZATION AT WEST PEQUOP

AuEx Ventures, Inc. (AuEx) is pleased to report assay results provided by joint venture partner Agnico-Eagle (USA) Limited (Agnico-Eagle) from ongoing reverse circulation drilling being conducted and funded by Agnico-Eagle at the Company's West Pequop gold exploration property located in Elko County, Nevada. These assay results include hole WN-073 which reported an 80 foot intercept of 0.169 ounces gold per ton located approximately 150 feet east of an intercept of 55 feet of 0.189 ounces gold per ton in hole WN-063 reported in press release NR07-07. Drilling in 2007 has to date consisted of 10 drill holes totaling 7,950 feet completed in the NE Section 34 target area. Results reported to date to the Company by Agnico-Eagle are as follows;

Hole	Total Depth	From (feet)	To (feet)	Drill Intercept (feet)	Gold at a 0.01 ounce per ton ("opt") cut off	Target Area
WN-068	285	50	55	5	**0.025**	**NE Sec 34**
WN-069	400	65	70	5	**0.126**	**NE Sec 34**
		80	85	5	**0.015**	
WN-070	985	Nil				**NE Sec 34**
WN-071	1000	50	60	10	**0.045**	**NE Sec 34**
		230	250	20	**0.035**	
		740	745	5	**0.034**	
		765	785	20	**0.050**	
WN-072	1000	50	60	10	**0.025**	**NE Sec 34**
		705	715	10	**0.045**	
WN-073	800	40	55	15	**0.017**	**NE Sec 34**
		565	645	80	**0.169**	
		665	685	20	**0.015**	
		700	705	5	**0.036**	
		715	800	85	**0.036**	
WN-074	920	Pending				**NE Sec 34**
WN-075	820	Pending				**NE Sec 34**
WN-076	800	Pending				**NE Sec 34**
WN-077	940	Pending				**NE Sec 34**

The mineralized intercept in hole WN-073 is oxidized and appears to be slightly down-dip and within the same stratigraphic horizon as the intercept in hole WN-063 consistent with the regional eastward dip of the sedimentary rocks. The mineralization is open to the west, north and east. Based on these results, Agnico-Eagle has reported to the Company that it will increase the amount of reverse circulation drilling planned for the West Pequop project during 2007. A core drill is already scheduled for the project later in the summer. An updated drill hole location map for the holes in the NE Section 34 target area and a cross section through holes WN-063 and WN-073 are available on the Company's website at www.auex.com.

As reported to AuEx by Agnico-Eagle, all drill samples were collected following standard industry practice and were assayed by Inspectorate America Corporation of Sparks, Nevada. Gold results were determined using standard fire assay techniques on a 30 gram sample with an atomic absorption finish. QA/QC included the insertion of numerous standards and blanks into the sample stream. Check assays and preliminary cyanide amenability testing is underway. All intercepts are reported as drilled; true widths have not been calculated. All data, as reported to the Company by Agnico-Eagle and disclosed in this press release including sampling, analytical and test data have been reviewed by the Company's qualified person Mr. Ronald L. Parratt, M.Sc., and Certified Professional Geologist. Further details concerning the West Pequop property are described in the Company's National Instrument 43-101 report filed on Sedar and are on the Company's website at www.auex.com.

AuEx Ventures, Inc. is a precious metals exploration company that has a current portfolio of seventeen exploration projects in Nevada, one project in Spain and a generative exploration program in Argentina. The Company controls over 50,000 acres of unpatented claims and fee land. Ten of the projects are in joint venture agreements with seven companies who provide exploration funding. The Company applies the extensive exploration experience and high-end technical skills of its founders to search for and acquire new precious metal exploration projects that are then offered for joint venture.
