FuelPositive to Provide Strategic and Operational Updates

WINNIPEG, MB, June 9, 2025 /CNW/ - *FuelPositive Corporation* (TSXV: NHHH) (OTCQB: NHHHF) ("FuelPositive" or the "Company"), a leading Green Ammonia clean technology company, is pleased to inform shareholders that it is preparing to release a series of detailed strategic and operational updates in the days and weeks ahead.

Following the resumption of trading on the TSX Venture Exchange on Friday, June 6, 2025, the Company is finalizing communications in collaboration with key partners regarding its progress on several fronts, including system certification, manufacturing readiness, and partnership development.

"We appreciate our shareholders' patience during this period and look forward to sharing comprehensive updates shortly," said Ian Clifford, Co-Founder, CEO and Board Chair. "We're coordinating carefully to ensure accuracy and alignment across all stakeholders."

FuelPositive continues to focus on providing its decentralized Green Ammonia systems to Canadian farmers and assisting the agricultural sector in its transition to sustainable, local, and cost-effective inputs.

Further updates will be communicated through the Company's standard public disclosure channels.

About FuelPositive:

Groundbreaking AgTech and Green Energy:

FuelPositive's containerized Green Ammonia systems are redefining the ammonia industry by decentralizing production and placing control directly in the hands of farmers. This innovative model enables on-site generation of green nitrogen fertilizer and carbon-free fuel, reducing dependence on volatile supply chains and pricing. Each ton of ammonia produced by a FuelPositive system eliminates up to 2 tons of CO.e emissions, offering both environmental and economic advantages. Designed for simplicity, reliability, and remote monitoring, the systems integrate seamlessly into farm operations, allowing farmers to produce what they need and when needed, without added complexity.

First System Delivery: A Milestone in Sustainable Agriculture:

In June 2024, FuelPositive delivered its first commercial demonstration system, the FP300, to Tracy and Curtis Hiebert's 11,000-acre grain farm near Sperling, Manitoba. This milestone marks a major advancement for both the Company and the future of sustainable agriculture. The upcoming system activation will further highlight the transformative impact of FuelPositive's technology on farming practices, supporting a more resilient and sustainable food system.

Manitoba: A Global Center of Excellence:

FuelPositive is positioning Manitoba at the forefront of decentralized Green Ammonia production. With a bold vision to establish a world-leading manufacturing hub in the province, the Company is set to drive economic growth, create high-value jobs in engineering, science, and skilled trades, and make Manitoba a global centre of excellence for sustainable agriculture and clean technology.

FuelPositive Corporation is based in Ontario and Manitoba (Canada) and trades on the TSX Venture Exchange under the symbol NHHH and on the OTCQB in the USA under the symbol NHHHF.

Cautionary Statement

Trading in the securities of the Company should be considered highly speculative. No stock exchange, securities commission or other regulatory authority has approved or disapproved the information contained herein. Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accept responsibility for the adequacy or accuracy of this release.

Forward-Looking Statements

This news release contains certain "forward-looking information" and "forward-looking statements" (collectively, "forward-looking statements") that are based on expectations, estimates and projections as of the date of this news release. The information in this release about future plans and objectives of the Company are forward-looking statements.

These forward-looking statements are based on assumptions and estimates of management of the Company at the time they were made and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by the Company as of the time of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. These estimates and assumptions may prove to be incorrect.

Many of these uncertainties and contingencies can directly or indirectly affect and could cause, actual results to differ materially from those expressed or implied in any forward-looking statements. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements.

Forward-looking information is provided to provide information about management's expectations and plans relating to the future. The Company disclaims any intention or obligation to update or revise any forward-looking information or to explain any material difference between subsequent actual events and such forward-looking information, except to the extent required by applicable law.
