
BENTON CAPITAL INCREASES LAND PACKAGE AT WISA LAKE LITHIUM PROJECT

April 26, 2016

Thunder Bay, Ontario: Benton Capital Corp. (TSXV: BTC) ("Benton" or "the Company") would like to announce that it has acquired a 100% interest through staking in an additional 30 units in 2 claims at its Wisa Lake Lithium project located 80km east of Fort Frances, Ontario (see BTC PR April 19, 2016). The property is connected to Highway 11 (Trans Canada), located 65km north, via an all-weather road that crosses the centre of the project. The land position was increased in order to cover an additional spodumene-bearing pegmatitic dyke located approximately 900m south of the Wisa Lake zone. Selective grab samples collected from the zones have been submitted to the laboratory for analysis.

As indicated in the Company's PR dated April 19, 2016, the property covers the Wisa Lake deposit with a historical resource of 330,000 tonnes grading 1.15% Li₂O (Lexindin Gold Mines Ltd., Manager's Report, 1958; Ontario Geological Survey, Open File Report 6285, Report of Activities 2012). In 1956, Lexindin completed a total of 20 drill holes (packsack and AQ-sized core) over a strike length of 335m and to a depth of approximately 65m to outline the Wisa Lake lithium mineralization. The diamond drill log of the most easterly hole intersected 6.4m containing 20% of the lithium-bearing mineral spodumene suggesting the mineralization is open at depth and to the east. It should be noted that the historical resource estimate for the deposit was calculated prior to CIM National Instrument 43-101 guidelines and as such should only be considered from a historical point of view and not relied upon. A qualified person has not completed sufficient work to classify the historical estimates as current mineral resources. Further diamond drill programs are required to bring the mineralization into a proper NI 43-101 compliant category.

The Company has recently applied to change its name to Alset Energy Corp. and is in the process of applying for a new trading symbol. The Company has also granted 2,395,000 options to officers, directors and consultants of the company at a price of 7 cents for a period of 5 years.

All of the above transactions are subject to TSX.V and regulatory approvals.

Benton Capital is well funded with approximately \$1 million in cash.

Clinton Barr (P.Geo.), V.P. Exploration for Benton Capital Corp., is the qualified person responsible for this release and has reviewed and approved all scientific and technical data and disclosures in this release.

On behalf of the Board of Directors of Benton Capital Corp,

"Stephen Stares"

Stephen Stares, President

The information contained herein contains "forward-looking statements" within the meaning of applicable securities legislation. Forward-looking statements relate to information that is based on assumptions of management, forecasts of future results, and estimates of amounts not yet determinable. Any statements that express predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance are not statements of historical fact and may be "forward-looking statements."

Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements, including, without limitation: risks related to failure to obtain adequate financing on a timely basis and on acceptable terms; risks related to the outcome of legal proceedings; political and regulatory risks associated with mining and exploration; risks related to the maintenance of stock exchange listings; risks related to environmental regulation and liability; the potential for delays in exploration or development activities or the completion of feasibility studies; the uncertainty of profitability; risks and uncertainties relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits; risks related to the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses; results of prefeasibility and feasibility studies, and the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; risks related to gold price and other commodity price fluctuations; and other risks and uncertainties related to the Company's prospects, properties and business detailed elsewhere in the Company's disclosure record. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements. Investors are cautioned against attributing undue certainty to forward-looking statements. These forward looking statements are made as of the date hereof and the Company does not assume any obligation to update or revise them to reflect new events or circumstances. Actual events or results could differ materially from the Company's expectations or projections
