

## **VIQ Reseller Completes Digital Court Recording Upgrade Project in Georgia**

MARKHAM, ON, July 30, 2015 - VIQ Solutions Inc. ("VIQ", "VIQ Solutions" or the "Corporation") (TSX Venture: VQS) is pleased to announce that value-added reseller DECA AMR Business Products ("DECA") of Marietta, Georgia, has completed the migration of a long-time customer to the latest networked VIQ recording and management solution.

The customer, a mid-Georgia county, has been a DECA and VIQ customer since 2005 and encompasses a dozen courtrooms across the State, Superior, Probate and Civil/Magistrate Courts as well as the Law Enforcement Center. The migration also adds some additional new courtrooms and playback stations, as well as the new central server license.

Prior to the migration, each courtroom was operating in an individual configuration. The migration to the new networked solution gives the courts a secure, centralized storage repository for all their audio and case information, including all their previously recorded cases which were seamlessly migrated to the new server. Sharing one central repository across multiple courts allows the county to pool its resources while at the same time ensuring the redundancy and security of crucial data. VIQ's sophisticated network synchronization process also provides a high level of dependability that was crucial to the county.

"Having a centralized networked solution, with access to all their existing prerecorded audio and case information, was a key feature for this customer," said Bob Rhodes, Regional Sales Manager at DECA. "As a long-time VIQ software user, the customer also appreciated that the new software provided sophisticated new features while maintaining the same easy to use interface. We have a long, successful relationship with this county and we were excited to bring them the latest that VIQ can offer."

"Migration projects like this that expand the breadth of offering to our existing customers are a crucial part of VIQ's future growth," said Sebastien Paré, President and CEO of VIQ Solutions. "VIQ has a robust and widespread customer base across the US and as our solution suite matures, it is an important part of VIQ's growth plan to maintain and grow these existing customers. My congratulations go out to DECA on completing this important migration."
