

## VIQ Solutions Announces Early Closing of Oversubscribed Non Brokered Private Placement

TORONTO, Nov. 15, 2017 -- VIQ Solutions Inc. ("**VIQ**", or the "**Company**") (TSX Venture:VQS), a global expert providing a cybersecurity protected technology and service platform, today announced the closing of its non-brokered private placement which was oversubscribed.

The Company issued 11,022,281 units ("**Units**") at a price of \$0.30 per Unit for gross proceeds of CDN\$3.3 million (the "**Non-Brokered Offering**"), exceeding its goal of CDN\$2.5 million as set out in the Company's press release dated November 2, 2017 (the "**Press Release**") in respect of the Non-Brokered Offering.

The Company anticipates closing its previously announced brokered private placement of Units on or about November 22, 2017.

Funds will be used to accelerate market delivery of the Company's artificial intelligence platform, AI Assist. The next growth for digital content is the application of Artificial Intelligence to real world challenges via added value services. This is exactly what VIQ is doing with its AI Assist strategic initiative starting with several existing VIQ public safety, intelligence, medical and judicial customers. AI Assist will enable our clients to unlock the business value from the vast amount of highly secured audio and video content they collect and aid in quality assurance, decision support, operational excellence, and proactive prevention. VIQ's end-to-end platform enables our clients to marry the power of AI with full data capture and management in an ultra-secure and collaborative environment.

Each Unit consists of one common share in the capital of the Company ("**Common Share**") and one half of one common share purchase warrant (each whole common share purchase warrant being a "**Warrant**"). Each Warrant entitles the holder to purchase one Common Share at a price of \$0.39 for a period of eighteen (18) months from the date of issuance, being November 15, 2017. The securities being issued pursuant to the Non-Brokered Offering will be subject to a hold period expiring four months and one day from the date of issuance in accordance with applicable Canadian securities law and subject to final approval of the TSX Venture Exchange upon filing standard documentation.

Insiders of the Company and existing shareholders subscribed for an aggregate of 5,316,665 Units representing approximately CDN\$1.6 million of the gross proceeds of the Non-Brokered Offering.

As a result, the issuances of Units to insiders pursuant to the Non-Brokered Offering is considered related party transactions within the meaning of TSX Venture Exchange Policy 5.9 and Multilateral Instrument 61-101 *Protection of Minority Security Holders in Special Transactions* ("**MI 61-101**"). VIQ relied on exemptions from the formal valuation and minority approval requirements in sections 5.5(a) and 5.7(1)(a) of MI 61-101 in respect of such insider participation, based on a determination that the fair market value of the participation in the Non-Brokered Offering by insiders did not exceed 25% of the market capitalization of the Company, as determined in accordance with MI 61-101. The Company filed a material change report in respect of the related party transaction less than 21 days prior to the closing of the Non-Brokered Offering, which the Company deemed reasonable in the circumstances so as to be able to avail itself of the proceeds of the Non-Brokered Offering in an expeditious manner.
