

**Form 51-102F3
Material Change Report**

1. Name and Address of Company

Cantronic Systems Inc.
63A Clipper Street
Coquitlam, B.C.
V3K 6X2

2. Date of Material Change

September 11, 2007

3. News Release

September 11, 2007 via Marketwire

4. Summary of Material Change

Cantronic Systems Inc. ("Cantronic" or the "Company") announced that it has received two orders from an undisclosed customer in Spain for its high sensitivity thermal imaging camera systems. The total value of these orders is approximately \$4 million dollars for a total of 50 sets of long range security surveillance cameras using cooled infrared detectors. Cantronic has received a significant deposit for the orders, and expects to ship these orders in the 4th quarter of current fiscal year.

5. Full Description of Material Change

Cantronic Systems Inc. ("Cantronic" or the "Company") announced that it has received two orders from an undisclosed customer in Spain for its high sensitivity thermal imaging camera systems. The total value of these orders is approximately \$4 million dollars for a total of 50 sets of long range security surveillance cameras using cooled infrared detectors. Cantronic has received a significant deposit for the orders, and expects to ship these orders in the 4th quarter of current fiscal year.

These latest orders represent the largest single sale of Cantronic's high end cooled thermal imaging cameras and successful entry into Western Europe, a market Cantronic has been working hard to develop for the past few years.

Cantronic's state of the art infrared detector technology, developed by its recently acquired subsidiary QWIPTech, contributed significantly to the Company receiving European orders. These cameras will be used for surveillance tasks in airports, ports and other border premises in both permanent and mobile installations.
