LA QUINTA CLOSES SECOND TRANCHE OF NON BROKERED PRIVATE PLACEMENT

Vancouver, B.C. November 1, 2010 - La Quinta Resources Corporation (TSXV: LAQ, the "Company") is pleased to announce the closing of the second tranche of a non-brokered private placement announced October 12, 2010. A total of 8,000,000 Units were placed, for a total proceed of $400,000. The placement consists of one share at the unit price of $0.05 and one warrant; each warrant exercisable at a price of $0.10 any time up to six (6) month period following the closing of the Private Placement (the "Closing") and at price of $0.15 for a subsequent six (6) month period. The company will use the funds for its ongoing program on its Nevada Properties, and for general working capital.

Haywood Securities and Pinetree Capital will each receive Eight percent (8%) finder's fees for a total of $12,000 and Eight percent (8%) finder's fee warrants exercisable at a price of $0.10 any time up to six (6) month period following the closing of the Private Placement (the "Closing") and at price of $0.15 for a subsequent six (6) month period.

The private placement is subject to documentation and regulatory approval. Furthermore, the securities issued pursuant to the offering are subject to a four (4) month applicable hold period in accordance with the TSX.

This press release is not intended for U. S. distribution and does not constitute an offer to sell or solicitation of an offer to sell any of the securities in the United States. The securities have not been and will not be registered under the United States Securities Act 1933, as amended (the "U.S. Securities Act") or any state securities laws and may not be offered or sold within the United States or to a U.S. Entity unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

About La Quinta Resources Corporation
La Quinta is a junior precious metals exploration company actively seeking mineral opportunities for the benefit of our stakeholders. Currently the Company is focused on exploring for gold and silver on its Easter Project and Black Jack properties in Nevada. The Easter Project is underlain by an epithermal quartz-adularia vein stockwork system hosted within Tertiary volcanic rocks of the Caliente Caldron Complex of southeastern Nevada. Numerous drill programs were conducted over the past 27 years by several operators. The resultant 121 holes were used to outline a 43-101 compliant resource of 2.6 million tons at 1.3 g/t gold (0.038 oz/t) and 14 g/t silver (0.4 oz/t) within an area of gold mineralization with a strike length of at least 6,450 feet and drill-defined widths up to 90 feet. Significant prior intercepts include up to 0.194 oz. Au / ton over 90 feet (including 0.549 oz. Au / ton over 15 feet) and 0.084 oz. / ton over 110 feet (including 0.534 oz. Au / ton over 5 feet). The Black Jack property, an early-stage exploration target in NE Nevada, consists of old mine workings that contain silver- gold-base metals veins hosted in Ordovician limestones that overlie nearby Cambrian shale. No resource has been identified on this property.

On behalf of the board
