

Avivagen to Present at LD Micro Conference Presentation on June 10th, at 10:30 A.M. EST

OTTAWA, Ontario--(BUSINESS WIRE)--June 8, 2021--Avivagen Inc. (TSXV:VIV, OTCQB:VIVXF) ("Avivagen"), a life sciences corporation focused on developing and commercializing products for livestock, companion animal and human applications that safely enhances feed intake and supports immune function, thereby supporting general health and performance, announces that it will be virtually presenting at the LD Micro Conference on June 10th at 10:30 A.M. Kym Anthony, Avivagen's C.E.O., will be presenting for the company.

Summary of LD Micro Invitational XI Event

The 2021 LD Micro Invitational will be held on the Sequire Virtual Events platform on Tuesday, June 8th - Thursday, June 10th, 2021.

The presentations run from 7:00 AM PT - 3:00 PM PT / 10:00 AM ET - 6:00 PM ET each day. This three-day, virtual investor conference is expected to feature around 180 companies, presenting for 25 minutes each, as well as several influential keynote speakers. The first day of this conference will also feature an exceptional one-time event: the LD Micro Hall of Fame.

About OxC-betaTM Technology and OxC-betaTM Livestock

Avivagen's OxC-betaTM technology is derived from Avivagen discoveries about β -carotene and other carotenoids, compounds that give certain fruits and vegetables their bright colours. Through support of immune function the technology provides a non-antibiotic means of promoting health and growth. OxC-betaTM Livestock is a proprietary product shown to be an effective and economic alternative to the antibiotics commonly added to livestock feeds. The product is currently available for sale in the United States, Philippines, Mexico, Taiwan, New Zealand, Thailand, Brazil, Australia and Malaysia.

Avivagen's OxC-betaTM Livestock product is safe, effective and could fulfill the global mandate to remove all in-feed antibiotics as growth promoters. Numerous international livestock trials with poultry and swine using OxC-betaTM Livestock have proven that the product performs as well as, and, sometimes, in some aspects, better than in-feed antibiotics.
