

This is the form of a material change report required under Section 85(1) of the *Securities Act* and Section 151 of the *Securities Rules*.

BC FORM 53-901F

Securities Act

MATERIAL CHANGE REPORT UNDER SECTION 85(1) OF THE ACT

Item 1. Reporting Issuer

Nova Uranium Corp.
520 - 470 Granville Street
Vancouver, B.C. V6C 1V5

Item 2. Date of Material Change

March 20th, 2006

Item 3. Press Release

News Release dated March 20th, 2006 was disseminated by Stockwatch and Market News.

Item 4. Summary of Material Change

Nova Uranium is pleased to announce that drilling is in progress on the Nova "B" showing in the initial phase of Nova's Mont Laurier area drill program.

Item 5. Full Description of Material Change

Nova Uranium is pleased to announce that drilling is in progress on the Nova "B" showing in the initial phase of Nova's Mont Laurier area drill program.

The initial drill program will test limited portions of the Nova "A" and "B" zones with 25 to 30 large diameter HQ drillholes. Historical estimates for the Nova "A" zone by Bomet Mines in 1979, based on core and rotary air blast drilling together with shallow bulk sampling, estimate that it contains 77 million pounds of U₃O₈ in 32.36 million tons of material grading 2.4 lb/ton (0.12%) U₃O₈ *. No historical resource calculations are available for the Nova "B" zone.

Nova's target is a straightforward and safely mineable open pit bulk tonnage deposit with good access and infrastructure in the mining friendly regulatory environment of south central Quebec, Canada.

**Mr. Michael Moore, PGeo is the qualified person who has reviewed the technical information contained in this news release on behalf of the Company. Calculations of Uranium resources at Nova "A" Zone are historical in nature, predate and are non-compliant with NI 43-101. Nova is not treating the historical estimate as current mineral resources or reserves. Nova has not undertaken any independent investigation of the resource estimate nor has it independently analyzed the results of the previous exploration work in order to verify the resources, and therefore the historical estimates should not be relied upon. However, Nova believes that these historical estimates provide a conceptual indication of the potential of the occurrence and are relevant to ongoing exploration.*

Further information is available on the company's website www.novauranium.com

Item 6. Reliance on Section 85(2) of the Act

If the report is being filed on a confidential basis in reliance on Section 85(2) of the Act, state the reasons for such reliance.

N/A

Item 7. Omitted Information

N/A

Item 8. Senior Officers

Duane Nelson
Corporate Secretary

Telephone: (604) 687-7178

Item 9. Statement of Senior Officer

The foregoing accurately discloses the material change referred to herein.

DATED at Vancouver, British Columbia this 20th day of March 2006

PLAYFAIR MINING LTD.
