FORM 51-102F3
Material Change Report
Published December 29, 2006
Effective December 29, 2006

Item 1: Name and Address of Company

PACIFIC CASCADE MINERALS INC.
520 – 700 West Pender Street
Vancouver, BC V6C 1G8

Item 2: Date of Material Change

June 19, 2007

Item 3: News Release

June 19, 2007

Item 4: Summary of Material Change

Pacific Cascade Minerals Inc. (the "Company") advises that has received its Diamond Drill Exploration Permit from the Ministry of Energy, Mines and Petroleum Resources to commence the Company's Phase 1 and 2 diamond drill programs on its "Crack Moly" molybdenum prospect located northeast of Harrison Lake B.C.

Item 5: Full Description of Material Change

5.1 Full Description of Material Change

See attached news release.

5.2 Disclosure for Restructuring Transactions

N/A

Item 6: Reliance on subsection 7.1(2) or (3) of National Instrument 51-102

N/A

Item 7: Omitted Information

None

Item 8: Executive Officer

Harold Forzley, President (604) 685-5851

Item 9: Date of Report

June 19, 2007

PACIFIC CASCADE MINERALS INC.
Suite 520 - 700 West Pender Street
Vancouver, British Columbia
V6C 1G8

Molybdenum Property
Diamond Drill Permit In Place

June 19, 2007 **TSX-V: PCV**

Vancouver, B.C. - Pacific Cascade Minerals Inc. (the "Company") advises that it has received its Diamond Drill Exploration Permit from the Ministry of Energy, Mines and Petroleum Resources to commence the Company's Phase 1 and 2 diamond drill programs on its "Crack Moly" molybdenum prospect located northeast of Harrison Lake B.C.

The Phase 1 and 2 programs provide for a minimum of two thousand (2000) and four thousand (4000) meters of drilling respectively on the property comprising 8 contiguous staked mineral claims totaling approximately 3300 hectares. As previously reported, receding glaciation has exposed surface anomalous value molybdenite showings within quartz breccia. The Company has completed a 3D Induced Polarization (3D IP) survey which displayed coincident low resistivity and high chargeability anomalies. The IP survey generally agrees with the geological mapping to date and outlines the intrusive breccia complex. Chargeability data outlined an 800 meter diameter zone that persists to a minimum of 300 metres below surface which was the depth limit of the IP survey. The anomaly remains open at depth.

The Company further advises that it has granted 140,000 incentive stock options to a director, employee and consultant of the company at a price of $0.50 per share for a period of five (5) years.

ON BEHALF OF THE BOARD OF DIRECTORS,

"Craig Robson"

Craig Robson
Director
Pacific Cascade Minerals Inc.
