

## Scorpio Gold Announces Receipt of \$7.9 Million from Warrant Exercises and Expiry of Warrants

February 24, 2026 - Vancouver, British Columbia – Scorpio Gold Corp. (TSX-V: SGN, OTCQB: SRCRF, FSE: RY9) (“Scorpio Gold”, or the “Company”) is pleased to announce that, over the past seven months, it has received aggregate proceeds of approximately \$ 7,923,500 from the exercise of 39,617,500 common share purchase warrants.

The exercised warrants were issued in connection with the Company’s February 2024 financing and carried an exercise price of \$0.20 per common share. The Company further announces that the remaining \$0.20 warrants issued pursuant to that financing have now expired in accordance with their terms.

Following the warrant exercises, Scorpio’s balance sheet has been significantly strengthened, providing additional flexibility to advance exploration across its Manhattan District in Nevada.

“On behalf of the Board and management team, I would like to thank our shareholders for their continued support and confidence in Scorpio,” commented Zayn Kalyan, CEO of Scorpio Gold. “The receipt of \$7.9 million in warrant proceeds over the past seven months strengthens our treasury while also simplifying our capital structure through the expiry of the remaining \$0.20 warrants. Eliminating this warrant overhang removes a source of dilution uncertainty and positions the Company with a cleaner equity profile. With a stronger balance sheet and a focused exploration strategy, we are well positioned to continue expanding mineralization along our 8.5-kilometre structural corridor in the Manhattan District.”

The proceeds from the warrant exercises have been allocated toward continued drilling, technical studies, and general corporate purposes, as the Company advances its exploration programs and resource growth initiatives.

### About the Manhattan District

Manhattan, located in the Walker Lane Trend of Nevada, USA, is road accessible and lies approximately 20 kilometers south of the operating Round Mountain Gold Mine (<https://www.kinross.com/operations/default.aspx#americas-roundmountain>), which has produced more than 15 million ounces of gold. For the first time, the Company has consolidated Manhattan’s past-producing mines under a single entity that holds valuable permitting and water rights. Historically, Manhattan has produced approximately 700,000 ounces of gold from high-grade placer and lode operations dating from the late 1890s through to the mid-2000s.<sup>1</sup> The maiden mineral resource estimate (the “**Maiden MRE**”) covering the Goldwedge and Manhattan Pit areas of Manhattan is comprised of 18,343,000 tonnes grading 1.26 g/t gold for a total of 740,000 oz contained gold in the inferred category.<sup>2</sup>

A historical mineral resource estimate (the “**Historical MRE**”) covers the Black Mammoth, April Fool, Hooligan, Keystone, and Jumbo areas of Manhattan and comprises 1,652,325 tonnes grading 5.89 g/t gold for a total of 303,949 oz contained gold.<sup>3</sup> The deposit is interpreted as a low-sulfidation, epithermal, gold-rich system situated adjacent to the Tertiary-aged Manhattan caldera in the Southern Toquima Range of Nevada. A “Qualified Person” as defined in National Instrument 43-101 - *Standards of Disclosure for Mineral Projects* (“**NI 43-101**”) has not done sufficient work to make the Historical MRE current, and the Company is not treating the Historical MRE as current.

## Notes

- **Adjacent Properties:** The Company has no interest in, or rights to, any of the adjacent properties mentioned, including the Round Mountain Gold Mine, and exploration results on adjacent properties are not necessarily indicative of mineralization on the Company's properties. Any references to exploration results on adjacent properties are provided for information only and do not imply any certainty of achieving similar results on the Company's properties.
- **Historical Data:** This news release includes historical information that has been reviewed by the Company's qualified person. The Company's review of the historical records and information reasonably substantiate the validity of the information presented in this presentation. The Company encourages readers to exercise appropriate caution when evaluating these data and/or results.
- **Third-Party Mineral Projects:** These deposits are cited solely for geological context. The Company cautions that these properties are not necessarily adjacent to, nor does the Company or have any interest in or control over them. Although certain geological features may be similar, there is no assurance that mineralization comparable to these deposits will be discovered on any of the Company's properties. Information regarding the aforementioned deposits is taken from publicly available sources and technical reports believed to be reliable but has not been independently verified by the Company. The Company encourages readers to exercise appropriate caution when evaluating these data and/or results.
- **Mineral Resource Estimate (MRE):** All scientific and technical information relating to Manhattan pertaining to Maiden MRE contained in this news release is derived from the Technical Report dated October 23, 2025 (with an effective date of June 4, 2025) titled "Mineral Resource Estimate and NI 43-101 Technical Report" (the "**Technical Report**") prepared by Matthew R. Dumala, P.Eng (BC) of Archer Cathro Geological (US) Ltd., Patrick Loury, M.Sc., CPG (AIPG) of Daniel Kunz & Associates, Annaliese Miller, LG (WA) of Geosyntec Consultants, Inc. and Art Ibrado, PhD, PE (AZ) of Fort Lowell Consulting PPLC. The information contained herein in respect of the Maiden MRE is subject to all of the assumptions, qualifications and procedures set out in the Technical Report and reference should be made to the full text of the Technical Report, a copy of which has been filed with the applicable securities regulators and is available under the Company's profile on [www.sedarplus.ca](http://www.sedarplus.ca).
- **Historical MRE:** A Qualified Person has not done sufficient work to make the Historical MRE current, and the Company is not treating the Historical MRE as current.

The Company considers the Historical MRE relevant as it demonstrates the presence of significant gold mineralization across multiple zones within Manhattan; however, its reliability is uncertain because it was prepared prior to the adoption of the current CIM Definition Standards and current QA/QC practices. The Historical MRE provides limited disclosure of assumptions, parameters, estimation methods, cutoff grades, and QA/QC protocols, and therefore these cannot be fully verified by the Company. The categories used in the historical estimate predate, and are not directly comparable to, current CIM Definition Standards, and the Company is not treating the Historical MRE as a current Mineral Resource Estimate. To upgrade and verify the Historical MRE in order to make it a current Mineral Resource Estimate, the Company would be required to undertake confirmatory drilling, modern QA/QC sampling, validation and digitization of historical datasets and updated geological modeling followed by the preparation of a new Mineral Resource Estimate in accordance with CIM Definition Standards and NI 43-101. The Company encourages readers to exercise appropriate caution when evaluating the Historical MRE.

All scientific and technical information relating to Manhattan pertaining to the Historical MRE contained in this news release is derived from the Technical Report dated May 1997 titled "Exploration and Pre-Production Mine Development, Manhattan District Project, Nye County" (the "**Historical Technical Report**") prepared by New Concept Mining, Inc. The information contained herein in respect of the Historical MRE is subject to all the assumptions, qualifications and procedures set out in the Historical Technical Report and reference should be made to the full text of the Historical Technical Report.

## Qualified Person

The scientific and technical information in this news release has been reviewed, verified and approved by Thomas Poitras, P. Geo., Chief Geologist of Scorpio Gold, a "Qualified Person", as defined under National Instrument 43-101 Standards of Disclosure for Mineral Projects. Verification included review of laboratory certificates, review of field logs and chain-of-custody records, inspection of blank/standard/duplicate performance, and review of collar and down-hole survey data. No limitations or failures to verify were identified.

## About Scorpio Gold Corp.

Scorpio Gold holds a 100% interest in the Manhattan District located in the Walker Lane Trend of Nevada, USA. Scorpio Gold's Manhattan District is ~4,780-hectares and comprises the advanced exploration-stage Goldwedge Mine, with a 400 ton per day maximum capacity gravity mill, and four past-producing pits that were acquired from Kinross in 2021 (see news release dated March 25, 2021 <https://scorpiogold.com/news/scorpio-gold-closes-purchase-of-kinross-manhattan-property-nye-county-nevada/>). The consolidated Manhattan District presents an exciting late-stage exploration opportunity, with over 140,000 metres of historical drilling, significant resource potential, and valuable permitting and water rights.

### **Forward-Looking Statements**

*This news release contains statements that constitute “forward-looking statements.” Such forward looking statements involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance or achievements, or developments to differ materially from the anticipated results, performance or achievements expressed or implied by such forward-looking statements. Forward looking statements are statements that are not historical facts and are generally, but not always, identified by the words “expects,” “plans,” “anticipates,” “believes,” “intends,” “estimates,” “projects,” “potential” and similar expressions, or that events or conditions “will,” “would,” “may,” “could” or “should” occur. Forward-looking statements in this news release include, among others, statements relating to additional flexibility to advance exploration across the Company’s Manhattan District in Nevada as a result of the warrant exercises; the Company continuing to expand mineralization along its 8.5-kilometre structural corridor in the Manhattan District; the intended use of proceeds from the exercise of the warrants; the resource potential of the Manhattan District; and other statements that are not historical facts.*

*The forward-looking statements contained in this news release are based on certain assumptions, including, but not limited to the Company’s ability to obtain any necessary financing on acceptable terms to fund its exploration and development activities; the accuracy of the Company’s geological and technical interpretations regarding the Manhattan District, including the potential for resource expansion along the 8.5-kilometre structural corridor; favourable gold prices and currency exchange rates; the Company’s ability to obtain and maintain all necessary permits, licences and regulatory approvals required for its exploration programs; the continued availability of qualified personnel, contractors, equipment and supplies on acceptable terms; the accuracy of historical data and technical reports referenced herein, including the Maiden MRE and Historical MRE; and general economic, market and business conditions remaining favourable to the mining industry.*

*By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking*

*statements. Such factors and risks include, among others: the Company may require additional financing from time to time in order to continue its operations which may not be available when needed or on acceptable terms and conditions acceptable; uncertainties inherent in mineral exploration, including interpretation of drilling results and geology; the risk that the Manhattan District's resource potential may not be realised; compliance with extensive government regulation; changes in domestic and foreign laws and regulations; risks related to gold price and currency exchange rate fluctuations; stock market volatility; operational risks (equipment failures, labour disputes, supply chain disruptions, environmental hazards); and such other risks contained in the public filings of the Company filed with Canadian securities regulators and available under the Company's profile on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).*

*The forward-looking information contained in this news release represents the expectations of the Company as of the date of this news release and, accordingly, is subject to change after such date. Readers should not place undue importance on forward-looking information and should not rely upon this information as of any other date. The Company undertakes no obligation to update these forward-looking statements in the event that management's beliefs, estimates or opinions, or other factors, should change, unless required by applicable securities laws.*
