

FORM 51-102F3

MATERIAL CHANGE REPORT

Item 1 Name and Address of Company

State the full name of your company and the address of its principal office in Canada.

Sama Resources Inc./Ressources Sama Inc.
Suite 1825, 1055 West Hastings Street
Vancouver, British Columbia V6E 2E9

Item 2 Date of Material Change

State the date of the material change.

October 16, 2015

Item 3 News Release

State the date and method(s) of dissemination of the news release issued under section 7.1 of National Instrument 51-102.

A news release was disseminated on October 16, 2015 in Vancouver British Columbia and distributed through Marketwired and was filed on SEDAR with the securities commissions of British Columbia and Alberta.

Item 4 Summary of Material Change(s)

Sama Resources Inc./Ressources Sama Inc. (TSX-V: SME) (“Sama” or the “Company”) announced that as a result of a review by the British Columbia Securities Commission, it is issuing a news release to clarify its disclosure. Sama also announces the commencement of a 2,000-meter drilling program at the nickel – copper and PGE bearing Yepleu sector in western Côte d’Ivoire.

4.1 Full Description of Material Change

Sama Resources Inc./Ressources Sama Inc. (TSX-V: SME) (“Sama” or the “Company”) today announced that as a result of a review by the British Columbia Securities Commission, it is issuing the following news release to clarify its disclosure. Sama also announces the commencement of a 2,000-meter drilling program at the nickel – copper and PGE bearing Yepleu sector in western Côte d’Ivoire.

The Company wishes to clarify that the technical report prepared by Genivar (now WSP) for the Samapleu Project and dated August 22, 2013, as currently filed, is non-compliant with the requirements of NI 43-101. Accordingly, the mineral resources are not supported by an NI 43-101 compliant technical report and should not be relied upon until a compliant technical report is filed. The Company’s revised report, which is being prepared by WSP, will provide additional disclosure and comparatives with existing similar mining operations in order to justify the cut-off grade of nickel used for the mineral resources.

Sama's drilling program will focus on the high chargeability targets identified from the 2013 Helicopter Time Domain Electromagnetic survey ("HTEM"). The target zone is defined by tri-dimensional conductivity model ("CDI") with iso-contours of 75 to 100, which is up to four times more intense than previously tested in 2014. In 2014, shallow-hole testing on the near surface mineralisation returned intersects of up to 22.0 meters at 0.42% nickel, including 4.4 meters at 1.13% Ni (reference Sama's press release dated January 14, 2014).

Readers are invited to view an image of a cross-section showing the CDI generated from the HTEM survey by clicking on the following link:

<http://samaresources.com/i/projects/samapleu/Yepleudrillingprogramoctober2015.png>

Drilling will be carried out using Sama's privately-owned rig.

4.2 Disclosure for Restructuring Transactions

Not applicable

Item 5 Reliance on subsection 7.1(2) of National Instrument 51-102

If this Report is being filed on a confidential basis in reliance on subsection 7.1(2) of National Instrument 51-102, state the reasons for that reliance.

Not applicable

Item 6 Omitted Information

State whether any information has been omitted on the basis that it is confidential information.

Not applicable

Item 7 Executive Officer

Give the name and business telephone number of an executive officer of your company who is knowledgeable about the material change and the Report, or the name of an officer through whom such executive officer may be contacted.

Mr. Bryan McKenzie
Chief Financial Officer
Tel: (604) 443-3834

Item 8 Date of Report

October 22, 2015
