BRS Resources and Cariboo Rose Announce 2026 Exploration Program Plans at Cowtrail Project, British Columbia

Vancouver, BC – April 17, 2026 – BRS Resources Ltd. (TSX-V: BRS), “BRS” and Cariboo Rose Resources Ltd. (TSX-V: CRB), “Cariboo Rose” announce 2026 plans for the Cowtrail porphyry copper-gold project located in the Cariboo region of British Columbia. Cowtrail, encompassing 4,717-hectares (11,650 acres), is located in south-central BC contiguous with the Woodjam copper-gold porphyry project owned by Vizsla Copper Corp. (TSX-V: VCU).

Diamond drilling (1,500 to 2,000 meters) is planned in 2026 in the Lea Lake target area. Significant drill intercepts here to move forward from this year include CT23-16 with 0.15% copper and 0.120 g/t gold over 105.0 meters (drilled in 2023) and CT25-23 with 0.20% copper and 0.100 g/t gold over 70.0 meters (drilled in 2025). Further geophysics (land based and / or airborne) are also planned (subject to contractor availability).

The Cowtrail option agreement between BRS and Cariboo Rose has been amended such that its term has been extended by one year to December 19, 2027. Total cash payments (\$200,000), total share issuances (\$200,000 value of) and total exploration expenditures (\$2,000,000) to earn a 60% interest remain unchanged.

A qualified person has verified the data disclosed, including sampling, analytical, and test data.

J.W. (Bill) Morton, P.Geo., a Director of Cariboo Rose Resources Ltd. and a Qualified Person under National Instrument 43-101, has reviewed and approved the technical content of this release.
