

Kontrol BioCloud to provide real-time viral detection technology for the Canadian Olympic Committee at Tokyo 2020

TORONTO, June 8, 2021 /CNW/ - **Kontrol Technologies Corp.** (NEO: KNR) (OTCQB: KNRLF) (FSE: 1K8) ("**Kontrol**" or the "**Company**"), a leader in smart buildings and cities is pleased to announce that it will be delivering BioCloud units to the Canadian Olympic Committee ("**COC**") for real-time viral detection to help safeguard the health and safety of Team Canada during the Tokyo 2020 Olympic Games.

"We were very pleased to receive an order of 5 BioCloud units and we are excited to announce that we will be supporting Canada's great athletes on the world stage," says Paul Ghezzi, CEO of Kontrol.

BioCloud is a real-time air analyzer designed to detect airborne pathogens. It has been designed to operate as a safe space technology by promoting air circulation, monitoring the air quality and sampling continuously for pathogens like viruses, bacteria and fungi.

These safe space technology units will be used at the Olympic Games within Team Canada's residential areas including the Athletes' Village.

"Protecting the health and safety of Team Canada, which has always been a top priority, needs innovative solutions in our current global context," says Dr. Mike Wilkinson, Team Canada's Chief Medical Officer. "The addition of Kontrol BioCloud really complements the stringent protocols put in place by the COC, International Olympic Committee and Tokyo 2020 Organizing Committee to protect the health and safety of our team. This technology provides another layer of protection with air quality monitoring so that our athletes can focus on their pursuit of the podium."

"In addition to the purchase order, Kontrol will be donating a number of BioCloud units to provide our athletes with safer spaces," continues Ghezzi.

Kontrol BioCloud is an air quality technology and not a medical device. The Company is not making any express or implied claims that its product has the ability to eliminate, cure or contain the COVID-19 (or SARS-2 Coronavirus).

About the Canadian Olympic Committee

The Canadian Olympic Committee leads the achievement of Team Canada's podium success and advances Olympic values across Canada. Independent and predominantly privately funded, the COC delivers the resources that Canada's elite athletes need to perform at their best and give their everything every day. By sharing our athletes' stories, we inspire all Canadians through the power of sport: 24 hours a day, 7 days a week, 365 days a year.

About Kontrol BioCloud™

BioCloud is a real-time analyzer designed to detect airborne viruses. It has been designed to operate as a safe space technology by sampling the air quality over time. With a proprietary detection chamber that can be replaced as needed, viruses are detected, and an alert system is created. BioCloud has been designed for spaces where individuals gather including classrooms, offices, retirement homes, hospitals, mass transportation and others. Forward-Looking Statements

This news release contains "forward-looking information" within the meaning of applicable securities laws. All statements contained herein that are not clearly historical in nature may constitute forward-looking information. In some cases, forward-looking information can be identified by words or phrases such as "may", "will", "expect", "likely", "should", "would", "plan", "anticipate", "intend", "potential", "proposed", "estimate", "believe" or the negative of these terms, or other similar words, expressions, and grammatical variations thereof, or statements that certain events or conditions "may" or "will" happen, or by discussions of strategy.

Where Kontrol expresses or implies an expectation or belief as to future events or results, such expectation or belief is based on assumptions made in good faith and believed to have a reasonable basis. Such assumptions include, without limitation, that sufficient capital will be available to the Company and that technology will be as effective as anticipated.

However, forward-looking statements are subject to risks, uncertainties, and other factors, which could cause actual results to differ materially from future results expressed, projected, or implied by such forward-looking statements. Such risks include, but are not limited to, that sufficient capital and financing cannot be obtained on reasonable terms, or at all; that those technologies will not prove as effective as expected; that customers and potential customers will not be as accepting of the Company's product and service offering as expected; and government and regulatory factors impacting the energy conservation industry. Kontrol BioCloud is an air quality technology and not a medical device. The Company is not making any express or implied claims that its product has the ability to eliminate, cure or contain the COVID-19 (or SARS-2 Coronavirus).

Accordingly, undue reliance should not be placed on forward-looking statements and the forward-looking statements contained in this press release are expressly qualified in their entirety by this cautionary statement. The forward-looking statements contained herein are made as at the date hereof and are based on the beliefs, estimates, expectations, and opinions of management on such date. Kontrol does not undertake any obligation to update publicly or revise any such forward-looking statements or any forward-looking statements contained in any other documents whether as a result of new information, future events or otherwise or to explain any material difference between subsequent actual events and such forward-looking information, except as required under applicable securities law. Readers are cautioned to consider these and other factors, uncertainties, and potential events carefully and not to put undue reliance on forward-looking information.
