MATERIAL CHANGE REPORT
(Section 7.1 of National Instrument 51-102)

Item 1 Name and Address of Reporting Issuer

Claim Post Resources Inc.
141 Adelaide Street West
Suite 903
Toronto, Ontario M5H 3L5

Item 2 Date of Material Change

July 28, 2010

Item 3 News Release

The news release announcing the material change was released on July 28, 2010 through Globe Newswire and subsequently filed on the System for Electronic Document Analysis and Retrieval. A copy of the press release is attached hereto.

Item 4 Summary of Material Change

Claim Post Resources Inc. (the "**Company**") completed the acquisition from Dayton Porcupine Gold Mines Inc. and J. Patrick Sheridan of a 100% interest in 49 patented claims in Deloro and Ogden Townships, six miles south of Timmins. The acquisition includes 40 patented claims covering the historical Dayton Porcupine claims and 8 patented claims formerly owned by McLaren Porcupine Mines Inc. The final single patented claim is adjacent to the historical Faymar Mine. The purchase price is $5,010 cash, plus one million common shares of the Company at a deemed price of $0.25 per share for 100% ownership of both the patented surface and patented mining rights, subject to an aggregate total 3% NSR Royalty. The Company also assumed liability for all taxes owing on the claims. All common shares issued to the vendors are subject to a four month hold period.

Item 5 Full Description of Material Change

The Company completed the acquisition from Dayton Porcupine Gold Mines Inc. and J. Patrick Sheridan of a 100% interest in 49 patented claims in Deloro and Ogden Townships, six miles south of Timmins. The acquisition includes 40 patented claims covering the historical Dayton Porcupine claims ("**Dayton Claims**") and 8 patented claims formerly owned by McLaren Porcupine Mines Inc. ("**McLaren Claims**"). The final patented claim is adjacent to the historical Faymar Mine. The purchase price is $5,010 cash, plus one million common shares of the Company at a deemed price of $0.25 per share for 100% ownership of both the patented surface and patented mining rights, subject to an aggregate total 3% NSR Royalty. The Company also assumed liability for all taxes owing on the claims. All common shares issued to the vendors are subject to a four month hold period.

Claim Post has completed test diamond drilling and assaying of the initial 3 holes drilled on the same drill section at the east end of the Dayton gold system as part of the property due diligence and to calibrate the deep Insight IP survey. Test hole CPDP-10-1, drilled at minus 45 degrees; intersected a quartz breccia zone from 107.1m to 120.6m averaging 1.7 g/t gold over a core length of 14.1m or **13.4m true width** at about 100m below surface. Included in the 14.1m zone are higher grade intersections of **0.43m of 7.17g/t, 0.54m of 7.61g/t and 0.55m of 4.91g/t gold**. Shallow hole CPDP-10-02 intersected 1.62g/t gold over 0.34m at 79m and CPDP – 10 – 03 intersected bull quartz with anomalous gold values from 190m to196m down the hole.

The Company's President and C.E.O., Charles Gryba commented: "We are pleased to have completed the acquisition from Mr. Sheridan and Dayton Porcupine. The Company's initial drill program has confirmed that the Dayton Porcupine gold system at the 100m level is 13.4m wide and the high quartz content of the zone should be very traceable to depth and along strike. The deep IP program is designed to cover a 1.6km x 2km area down to a depth of 600m. Gold grades in the Timmins camp are directly related to the percentage of sulphides thus will drill the higher chargeability portions of the anomalies. The company is currently drilling a deep EM anomaly in Turnbull Township and will move the diamond drill back to Dayton by August 15th."

Please see the attached press release for more information.

Item 6 Reliance of subsection 7.1(2) of NI 51-102

Not applicable.

Item 7 Omitted Information

Not applicable.

Item 8 Executive Officer
