ITEM 4 SUMMARY OF MATERIAL CHANGE

1. Jiulian received a drilling permit for its planned 2010 drill program on its Hawk Property in BC.
2. Jiulian granted 530,000 incentive stock options.

ITEM 5 FULL DESCRIPTION OF MATERIAL CHANGE

Jiulian has received a drilling permit for its planned 2010 drill program on the Hawk Property located in south-central British Columbia, Canada.

The Phase I drilling plan comprises 1,000 metres of core drilling (2 or 3 holes) to test for the possible concealed manto/skarn/porphyry copper-gold system located on the eastern part of the property, which has been delineated by soil, lithogeochemical and three dimensional Induced Polarization (3D IP) surveys.

The drilling permit also allows the Company to conduct additional 2,000 metres of core drilling (4 or 5 holes) in its Phase II drilling program to test the extension of the possible copper-gold system when it is warranted by the result of the Phase I drilling.

Jiulian is well funded, with approximately $1.5 million currently in its treasury. The exploration on the Hawk Property focuses on a possible large tonnage potential of disseminated copper and gold mineralization system on the central and eastern part of the property identified by the geological, geophysical and geochemical work.

The drilling program is supervised by X. Charlie Cheng, Ph. D., CEO of Jiulian. The technical information in this news release has been reviewed and approved by J. Paul Sorbara, M.SC., P.Geo., a Qualified Person as defined by National Instrument 43 101 and a director of Jiulian.

The Company also wishes to announce the grant of 530,000 incentive stock options to various directors, officers, employees and consultants of the Company. The options have a three year term at an exercise price of $0.15 per share and will be subject to a four month hold period.
