

TeraGo Expands Product Portfolio with Managed Networking Services

Toronto – March 11, 2021 - TeraGo Inc. (“**TeraGo**” or the “**Company**”) (TSX: TGO, www.terago.ca), is expanding its networking portfolio with the addition of TeraGo’s Managed Networking Services. The artificial intelligence-driven managed service allows TeraGo to continue providing business customers with best-in-class support for their network infrastructure.

TeraGo Managed Network Services enables business customers to optimize performance, reduce outages and reduce costs on their network infrastructure by leveraging TeraGo’s advanced management systems and team of network experts. The service provides business class support for customer Internet and WAN connections. The turn-key and scalable offering includes:

- **Proactive Monitoring** - 24/7 continuous monitoring of network connections and equipment, with TeraGo network professionals proactively triaging service incidents and affecting repairs before they cause significant issues;
- **Advanced Reporting and Analytics** - a rich set of advanced analytics and reporting that allows network managers to fine-tune and optimize their application and network performance; and
- **Network Device Management** – TeraGo provided network devices that are fully managed and maintained by TeraGo network professionals.

“We are pleased to continue to support Canadian and International businesses with advance networking solutions,” said TeraGo COO and CRO Blake Wetzel. “TeraGo’s Managed Networking Services provide IT managers with the real-time information and reporting that allows them to build and manage efficient and reliable network infrastructures.”

TeraGo has partnered with a leader in the IT Infrastructure Monitoring market, to deliver this service. TeraGo will continue to focus on delivering premium networking solutions to businesses.
