CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
FOR THE PERIOD ENDED OCTOBER 31, 2018

(Unaudited – Prepared by Management)

(Expressed in Canadian Dollars)

NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3(3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these financial statements in accordance with standards established by the Chartered Professional Accountants of Canada for a review of interim financial statements by an entity's auditor.

ADVANTAGE LITHIUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

1. Nature of Operations

The Company was incorporated under the laws of the Province of British Columbia on March 1, 2007. The Company's common shares currently trade on the TSX Venture Exchange ("TSXV") under the symbol "AAL" and on the OTCQB under the symbol "AVLIF". The Company's head office is located at Suite 789, 999 West Hastings Street, Vancouver, British Columbia V6C 2W2 Canada.

The Company is a junior mineral exploration company currently engaged in the acquisition and exploration of lithium properties. On the basis of information to date, the Company has not yet determined whether these properties contain economically recoverable reserves. The underlying value of the mineral resource interests is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete exploration and development and upon future profitable production. Mineral resource interests represent costs incurred to date, less amounts amortized and/or written off, and do not necessarily represent present or future values.

These condensed consolidated interim financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business operations for the foreseeable future. To date the Company has not earned significant revenues and is considered to be in the exploration stage. The Company's operations are funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. Although management considers that the Company has adequate resources to maintain its core operations and conduct planned exploration programs on its existing exploration and evaluation assets for the next twelve months, the Company recognizes that exploration expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financings in the past there can be no assurance that it will be able to do so in the future. These condensed consolidated interim financial statements do not reflect any adjustments related to conditions that occurred subsequent to October 31, 2018.

2. Basis of Preparation

Statement of Compliance

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting ("IAS 34"), as issued by the International Accounting Standards Board ("IASB"), and its interpretations, using accounting policies consistent with International Financial Reporting Standards ("IFRS"). The condensed consolidated interim financial statements should be read in conjunction with the audited financial statements for the year ended July 31, 2018, which have been prepared in accordance with IFRS as issued by the IASB and interpretations of the IFRS Interpretations Committee ("IFRIC"). The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company's financial statements for the year ended July 31, 2018.

Basis of Measurement

The Company's condensed consolidated interim financial statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and financial liabilities to fair value. The condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise stated.

3. Subsidiaries

In addition to the Company, these condensed consolidated interim financial statements include all subsidiaries. Subsidiaries are all entities over which the Company is able, directly or indirectly, to control financial and operating policies, which is the authority usually connected with holding majority voting rights. Subsidiaries are fully consolidated from the date on which control is acquired by the Company. Inter-company transactions and balances are eliminated upon consolidation. They are de-consolidated from the date that control by the Company ceases.

ADVANTAGE LITHIUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

3. Subsidiaries (continued)

As at October 31, 2018 the subsidiaries of the Company are as follows:

<u>Company</u>	<u>Location of Incorporation</u>	<u>Ownership Interest</u>
Advantage Lithium Inc.	USA	100%
South American Salars Minerals Pty. Ltd. (“SAS Australia”) (inactive)	Australia	100%
South American Salars S.A. (“SAS Argentina”)	Argentina	100%
AAL Argentina S.A.	Argentina	97%

4. Significant Accounting Policies

Critical Judgments and Sources of Estimation Uncertainty

The preparation of these condensed consolidated interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the consolidated financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. These condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical Judgments

The following are critical judgments that management has made in the process of applying accounting policies and that have the most significant effect on the amounts recognized in the condensed consolidated interim financial statements:

- (i) The determination of categories of financial assets and financial liabilities has been identified as an accounting policy which involves judgments or assessments made by management.
- (ii) Management is required to assess the functional currency of each entity of the Company. In concluding that the Canadian dollar is the functional currency of the parent and its subsidiary companies, management considered the currency that mainly influences the cost of providing goods and services in each jurisdiction in which the Company operates. As no single currency was clearly dominant the Company also considered secondary indicators including the currency in which funds from financing activities are denominated and the currency in which funds are retained.
- (iii) Management is required to assess whether there is evidence of impairment in respect of exploration and evaluation assets. The triggering events for an impairment test are defined in IFRS 6. In making the assessment, management is required to make judgments on the status of each project and the future plans towards finding commercial reserves. The nature of exploration and evaluation activity is such that only a proportion of projects are ultimately successful and some assets are likely to become impaired in future periods.
- (iv) Although the Company takes steps to verify title to exploration and evaluation assets in which it has an interest, these procedures do not guarantee the Company’s title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

ADVANTAGE LITHIUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. Significant Accounting Policies (continued)

- (v) The assessment of the probability of future taxable income in which deferred tax assets can be utilized is based on the Company's estimate of future profits or losses adjusted for significant non-taxable income and expenses and specific limits to the use of any unused tax loss or credit. The tax rules in the jurisdictions in which the Company operates are also carefully taken into consideration. If a positive forecast of taxable income indicates the probable use of a deferred tax asset, especially when it can be utilized without a time limit, that deferred tax asset is usually recognized to the extent of the amount expected to be utilized. The recognition of deferred tax assets that are subject to certain legal or economic limits or uncertainties is assessed individually by management based on the specific facts and circumstances. Details of these can be found in Note 11.

Estimation Uncertainty

The following are key assumptions concerning the future and other key sources of estimation uncertainty that have a significant risk of resulting in a material adjustment to the carrying amount of assets and liabilities within the next financial year:

- (i) Depreciation expense is allocated based on assumed useful life of property, plant and equipment. Should the useful life differ from the initial estimate, an adjustment would be made in the statement of operations and comprehensive loss.
- (ii) The cost estimates are updated periodically during the life of a mine to reflect known developments, (e.g. revisions to cost estimates and to the estimated lives of operations), and are subject to review at regular intervals. Decommissioning, restoration and similar liabilities are estimated based on the Company's interpretation of current regulatory requirements, constructive obligations and are measured at fair value. Fair value is determined based on the net present value of estimated future cash expenditures for the settlement of decommissioning, restoration or similar liabilities that may occur upon decommissioning of the mine. Such estimates are subject to change based on changes in laws and regulations and negotiations with regulatory authorities.
- (iii) Provisions for income taxes are made using the best estimate of the amount expected to be paid based on a qualitative assessment of all relevant factors. The Company reviews the adequacy of these provisions at the end of the reporting period. However, it is possible that at some future date an additional liability could result from audits by taxing authorities. Where the final outcome of these tax-related matters is different from the amounts that were originally recorded, such differences will affect the tax provisions in the period in which such determination is made.
- (iv) The assessment of any impairment of non-current assets is dependent upon estimates of the recoverable amount that take into account factors such as reserves, economic and market conditions, recoverability of value added taxes and the useful lives of assets. As a result of this assessment, in fiscal 2018 management recorded an impairment charge of \$nil (2018 - \$nil) on its exploration and evaluation assets. See Note 8.

Cash

Cash includes cash on hand and demand deposits. The Company is not exposed to significant credit or interest rate risk although cash is held in excess of federally insured limits with a major financial institution.

ADVANTAGE LITHIUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. Significant Accounting Policies (continued)

Amounts Receivable

Receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. Receivables are classified as loans and receivable. A provision for impairment of receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables.

Accounts Payable and Accrued Liabilities

Payables are obligations to pay for materials or services that have been acquired in the ordinary course of business from suppliers. Payables are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities.

Payables are classified as other financial liabilities initially at fair value and subsequently measured at amortized cost using the effective interest method.

Exploration and Evaluation Assets

The Company is in the exploration stage with respect to its investment in exploration and evaluation assets and accordingly follows the practice of capitalizing all costs relating to the acquisition of, exploration for and development of mineral properties and crediting all proceeds received against the cost of the related properties. Such costs include, but are not exclusive to, geological, geophysical studies, exploratory drilling and sampling. At such time as commercial production commences, these costs will be charged to operations on a unit-of-production method based on proven and probable reserves. The aggregate costs related to abandoned mineral properties are charged to operations at the time of any abandonment, or when it has been determined that there is evidence of a permanent impairment. An impairment charge relating to a mineral property is subsequently reversed when new exploration results or actual or potential proceeds on sale or farm out of the property result in a revised estimate of the recoverable amount, but only to the extent that this does not exceed the original carrying value of the property that would have resulted if no impairment had been recognized.

The recoverability of amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain financing to complete development of the properties, and on future production or proceeds of disposition.

The Company recognizes in income, costs recovered on mineral properties when amounts received or receivable are in excess of the carrying amount.

Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified to mining property and development assets.

All capitalized exploration and evaluation expenditures are monitored for indications of impairment. Where a potential impairment is indicated, assessments are performed for each area of interest. To the extent that an exploration expenditure is not expected to be recovered, it is charged to the results of operations.

ADVANTAGE LITHIUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. Significant Accounting Policies (continued)

Property, Plant and Equipment

Property, plant and equipment are carried at cost, less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and an initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Property, plant and equipment are depreciated annually on a straight-line basis over the estimated useful life of the assets, at a rate of 20% - 33% for office and field equipment.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in profit or loss in the condensed consolidated statements of loss and comprehensive loss.

Where an item of plant and equipment comprises major components with different useful lives, the components are accounted for as separate items of plant and equipment. Expenditures incurred to replace a component of an item of plant and equipment that is accounted for separately, including major inspection and overhaul expenditures, are capitalized.

The Company compares the carrying value of property, plant and equipment to estimated net recoverable amounts, based on estimated future cash flows, to determine whether there is any indication of impairment whenever events or circumstances warrant.

Impairment of Long-Lived Assets

At each financial position reporting date, the carrying amounts of the Company's long-lived assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

An asset's recoverable amount is the higher of fair value less costs of disposal and value in use. Fair value is determined as the amount that would be obtained from the sale of an asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset or cash generating unit is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the period.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

ADVANTAGE LITHIUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017
(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. Significant Accounting Policies (continued)

Decommissioning Provision

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the exploration, development or ongoing production of a mineral interest by or on behalf of the Company. Costs for restoration of site damage which is created on an ongoing basis during exploration and evaluation are provided for at their net present values and charged against profits in the period such exploration and evaluation occurs. Discount rates using a risk-free rate that reflects the time value of money are used to calculate the net present value. The related liability is adjusted each period for the unwinding of the discount rate and for changes to the current market-based discount rate and amount or timing of the underlying cash flows needed to settle the obligation. As at October 31, 2018 and July 31, 2018, the Company does not have any decommissioning obligations.

Financial Instruments

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or at fair value through profit or loss (“FVTPL”).

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through comprehensive income (loss). Cash is classified as FVTPL.

Financial assets classified as loans and receivables and held to maturity are measured at amortized cost. Amounts receivable are classified as loans and receivables.

Financial assets classified as available-for-sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income (loss) except for losses in value that are considered other than temporary. Investments in common shares are classified as available-for-sale.

Transaction costs associated with financial assets at FVTPL are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities.

Financial liabilities classified as other financial liabilities are measured at amortized cost. Accounts payable and accrued liabilities are classified as other financial liabilities.

Financial liabilities classified as FVTPL are measured at fair value with unrealized gains and losses recognized through comprehensive loss. At October 31, 2018 and July 31, 2018, the Company has not classified any financial liabilities as fair value through profit or loss.

Share Capital

Common shares issued by the Company are classified as equity. Costs directly attributable to the issue of common shares, share purchase warrants and share options are recognized as a deduction from equity, net of any related income tax effects.

FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017

(Unaudited – Prepared by Management)
(Expressed in Canadian Dollars)

4. Significant Accounting Policies (continued)

Equity Financing

The Company engages in equity financing transactions to obtain the funds necessary to continue operations and explore and evaluate mineral properties. These equity financing transactions may involve issuance of common shares or units. Units typically comprise a certain number of common shares and share purchase warrants. Depending on the terms and conditions of each equity financing transaction, the warrants are exercisable into additional common shares at a price prior to expiry as stipulated by the terms of the transaction. The Company has adopted the residual value method with respect to the measurement of common shares and share purchase warrants issued as private placement units. The fair value of the common shares issued in private placements is determined by the closing quoted bid price on the closing date. The balance, if any, is allocated to the attached share purchase warrants.

Share-Based Payment Transactions

The share option plan allows Company employees and consultants to acquire shares of the Company. The fair value of share options granted is recognized as a share-based compensation expense with a corresponding increase in the equity settled share-based payments reserve in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (direct employee) or provides services similar to those performed by a direct employee.

For employees the fair value is measured at grant date and each tranche is recognized on a straight line basis over the period during which the share options vest. The fair value of the share options granted is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the share options were granted.

At the end of each reporting period, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest.

Equity-settled share-based payment transactions with non-employees are measured at the fair value of the goods or services received. However, if the fair value cannot be estimated reliably, the share-based payment transaction is measured at the fair value of the equity instruments granted at the date the Company receives the goods or the services.

Taxation

Income tax expense comprises current and deferred income tax. Income tax is recognized in the statement of comprehensive income (loss), except to the extent that it relates to items recognized in other comprehensive income (loss) or directly in equity. In this case the income tax is also recognized in other comprehensive income (loss) or directly in equity, respectively.

Current Income Tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantially enacted at the statement of financial position date in the countries where the Company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred Income Tax

Deferred income tax is recognized, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the statement of financial position date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized.

ADVANTAGE LITHIUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017

(Unaudited – Prepared by Management)

(Expressed in Canadian Dollars)

4. Significant Accounting Policies (continued)

Deferred income tax is provided on temporary differences. Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Value added tax ("VAT")

VAT may be paid in countries where recoverability is uncertain. In these cases, VAT payments are either deferred within exploration and evaluation assets, or expensed if related to exploration and evaluation costs. If we ultimately recover the amounts that have been deferred, the amount received will be applied to reduce any associated asset. If the amounts were previously expensed, the recovery will be recognized in the consolidated statement of income.

Loss Per Share

Basic loss per share is computed by dividing loss available to common shareholders by the weighted average number of common shares outstanding during the period. The computation of diluted loss per share assumes the conversion, exercise or contingent issuance of securities only when such conversion, exercise or issuance would have a dilutive effect on loss per share. The dilutive effect of convertible securities is reflected in dilutive earnings per share by application of the "if converted" method. The dilutive effect of outstanding options and warrants and their equivalents is reflected in diluted loss per share.

Foreign Currency Translation

Functional and Presentation Currency

The financial statements of each of the Company's subsidiaries are prepared in the local currency of their home jurisdictions. Consolidation of each subsidiary includes re-measurement from the local currency to the subsidiary's functional currency. Each subsidiary's functional currency, being the currency of the primary economic environment in which the subsidiary operates, is the Canadian dollar. The consolidated financial statements are presented in Canadian dollars.

Exchange rates published by the Bank of Canada were used to translate subsidiary financial statements into the consolidated financial statements. Income and expenses for each statement of comprehensive income (loss) presented are translated using the rates prevailing on the transaction dates. All resulting foreign exchange differences are recognized in comprehensive loss.

Foreign Currency Transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in comprehensive loss.

Comparative Figures

Certain of the prior fiscal year's comparative figures have been reclassified to conform with the current fiscal period's presentation.

(Expressed in Canadian Dollars)

4. Significant Accounting Policies (continued)

Accounting Standards and Interpretations Issued but Not Yet Effective

As at the date of these consolidated financial statements, the following standards have not been applied in these financial statements:

- (i) IFRS 9 Financial Instruments; tentatively effective for annual periods beginning on or after January 1, 2018. IFRS 9 replaces the multiple classification and measurement models in IAS 39 with a single model that has only two classification categories: amortized cost and fair value. IFRS 9 prohibits classifications except in rare circumstances when the entity's business model changes. The new standard removes the requirement to separate embedded derivatives from financial asset hosts. It requires a hybrid contract to be classified in its entirety at either amortized costs or fair value.
- (ii) IFRS 15 Revenue from contracts with customers. IFRS 15 is effective for annual periods beginning on or after January 1, 2018. IFRS 15 specifies how and when to recognize revenue as well as requires entities to provide users of financial statements with more informative, relevant disclosures. The standard supersedes IAS 18, Revenue, IAS 11, Construction Contracts, and a number of revenue-related interpretations. The new standard will apply to nearly all contracts with customers: the main exceptions are leases, financial instruments and insurance contracts.
- (iii) IFRS 16 Leases. In January 2016, the IASB issued IFRS 16 which replaces IAS 17 - Leases and its associated interpretative guidance. IFRS 16 applies a control model to the identification of leases, distinguishing between a lease and a service contract on the basis of whether the customer controls the asset being leased. For those assets determined to meet the definition of a lease, IFRS 16 introduces significant changes to the accounting by lessees, introducing a single, on-balance sheet accounting model that is similar to current finance lease accounting, with limited exceptions for short-term leases or leases of low value assets. Lessor accounting remains similar to current accounting practice. The standard is effective for annual periods beginning on or after January 1, 2019, with early application permitted for entities that apply IFRS.

Management is currently assessing the impact of these new standards on the Company's accounting policies and condensed consolidated interim financial statement presentation.

5. Acquisition

On March 16, 2017 the Company, Orocobre Limited ("Orocobre") and Miguel Alberto Peral ("Peral") entered into a purchase agreement (the "Purchase Agreement") to acquire an initial 50% interest in the Cauchari Project, with an option to earn a further 25% interest, and a 100% interest in five other lithium brine projects (the "Argentine Properties"), located in the northern provinces of Jujuy, Salta and Catamarca in Argentina. The Purchase Agreement superceded prior letters of intent. On March 28, 2017 the Company completed the Purchase Agreement and issued a total of 54,500,000 common shares of the Company, at a fair value of \$33,790,000, and 3,000,000 warrants, at a fair value of \$960,000, and acquired a 100% interest in the issued and outstanding common shares of SAS Australia (the "Acquisition"). Each warrant entitles the holder to purchase an additional common share of the Company, at a price of \$1.00 per share, expiring February 17, 2019. The fair value of the warrants has been estimated using the Black-Scholes option pricing model. The assumptions used were: risk-free interest rate of 0.74%; estimated volatility of 120%; expected life of 2 years; expected dividend yield of 0%; and estimated forfeiture rate of 0%.

At the time of the Acquisition, SAS Australia owned 100% of the issued and outstanding shares of SAS Argentina which owns the Cauchari Project and the Argentine Properties.

The Company paid a finder's fee of \$66,746 cash and issued 150,000 common shares of the Company, at a fair value of \$93,000, for total consideration of \$159,746. The Company also incurred \$185,350 for legal, filing and other transaction costs associated with the Acquisition.

5. Acquisition

The Acquisition was accounted for as an acquisition of the net assets of SAS Australia, as follows:

Common shares issued	\$ 33,790,000
Warrants issued	960,000
Finder's fee	159,746
Transaction costs incurred	185,350
Advances to SAS Australia prior to acquisition	<u>136,000</u>
Acquisition cost	<u>\$ 35,231,096</u>

The acquisition cost was generally allocated to the individual identifiable assets and liabilities on the basis of their relative fair value at the date of purchase. The results of operations were recorded from the effective date of purchase.

Cost of the net assets acquired consists of:

Net working capital	\$ 74,977
Exploration and evaluation assets	<u>35,156,119</u>
Net assets acquired	<u>\$ 35,231,096</u>

On closing of the Acquisition, two directors of Orocobre were appointed as directors of the Company and Peral was also appointed as a director of the Company.

6. Investments

As at October 31, 2018

8. Exploration and Evaluation Assets (continued)

(a) Argentina

Cauchari Project and Argentine Properties

On March 28, 2017 the Company completed the Acquisition, as described in Note 5, and acquired an initial 50% interest in the Cauchari Project and a 100% interest in the Argentine Properties. The Company may increase its interest in the Cauchari Project by a further 25% by spending US \$5,000,000 in exploration or completing a feasibility study. In December 2017 the Company completed its US \$5,000,000 spending amount and earned the additional 25% interest in the Cauchari Project. All subsequent costs incurred have been funded by the Company and La Frontera S.A. (“La Frontera”) based on their respective interests. La Frontera is owned by Orocobre, as to 85%, and Peral, as to 15%. As at October 31, 2018, \$390,623 (July 31, 2018 - \$339,316) remained receivable and has been included in receivable from joint venture partner.

La Frontera retains a 1% gross revenue royalty on the Cauchari Project and Argentine Properties, and has a right of first refusal on brine production (and may enter into an offtake agreement in respect of such production).

Stella Marys Project

On September 8, 2016 the Company entered into a letter of intent (the “Santa Rita LOI”) with Minera Santa Rita S.R.L. (“Minera Santa Rita”) over the Stella Marys Project, located in Salta Province, Argentina. On October 28, 2016 the Company and Minera Santa Rita signed a definitive agreement (the “Santa Rita Option”) under which the Company could acquire a 100% interest in the Stella Marys Project by making total cash payments of US \$1,250,000 and issuance of a total of 1,500,000 common shares of the Company. During fiscal 2017 the Company had made cash payments totalling US \$600,000 and issued 600,000 common shares at a fair value of \$498,000.

The Company also agreed to pay a finder’s fee, calculated at a maximum of up to approximately \$176,500, the actual amounts payable only upon cash payments and share issuances made. During fiscal 2017 the Company paid \$64,858.

On June 2, 2017 the Company completed an assignment of the Santa Rita Option to LSC and the Company received cash payments totalling \$930,593 for reimbursement of all option payments and related costs previously paid by the Company in connection with the Santa Rita Option. In addition the Company also received 256,520 common shares of LSC, at a fair value of \$325,780, and a 2% royalty (the “Stella Marys Royalty”) on the brine concentrate produced from the Stella Marys Project and has reached an agreement in principal with Orocobre to reduce the Stella Marys Royalty to 0.5% in return for receiving a 0.5% royalty on the brine concentrate produced from the tenements purchased by LSC from Orocobre in the Salinas Grandes Salar, Argentina. Accordingly, during fiscal 2017 the Company recorded an impairment of \$103,379 to reflect the difference between the total proceeds received and the carrying amount of the Stella Marys Project.

LSC has agreed to make all further cash and finder’s fee payments and reimburse the Company in LSC common shares for any further common share issuances made by the Company. In October 2017 the Company issued the remaining 900,000 common shares, at a fair value of \$882,000, and paid a finder’s fee of \$61,048 pursuant to the Santa Rita option and LSC issued 588,000 LSC common shares, at a fair value of \$882,000, and paid \$61,048 to the Company as reimbursement.

(b) United States

On June 16, 2016, as amended and extended, the Company entered into an agreement (the “Nevada Sunrise Agreement”) with Nevada Sunrise Gold Corp. (“Nevada Sunrise”) in which the Company was granted an option to earn working interests of up to 70% in three lithium exploration projects, known as Clayton Northeast,

ADVANTAGE LITHIUM CORP.

8. Exploration and Evaluation Assets (continued)

Jackson Wash and Aquarius, and 50% interests in two lithium properties, known as Gemini and Neptune (collectively the “Optioned Properties”), located in the Clayton Valley and Lida Valley regions of Nevada, USA, and an option to acquire the State of Nevada Water Permit 44411 (the “Water Permit”).

(i) *Optioned Properties*

During fiscal 2017 the Company met all of the requirements and obligations required to earn its initial 51% interests in each of the Clayton Northeast, Jackson Wash and Aquarius properties. In July 2017 the Company determined to surrender all interests in the Jackson Wash, Aquarius, Gemini and Neptune properties and formal notice was provided to Nevada Sunrise on August 11, 2017. Accordingly, the Company recorded an impairment charge of \$2,592,927 in fiscal 2017 for all costs incurred on these properties.

On November 1, 2017 the Company and Nevada Sunrise entered into an asset purchase agreement to effect the sale of their interests in the Clayton Northeast property to Pure Energy Minerals Limited (“Pure Energy”) for a total of 7,000,000 Pure Energy common shares. On October 20, 2017 the Company issued 81,531 common shares, at a fair value of \$48,919, to Nevada Sunrise under the terms of the Nevada Sunrise Agreement. On November 30, 2017 the Company paid Nevada Sunrise \$290,539 as its remaining obligation to exercise its option to earn a 70% interest in the Clayton Northeast property. On December 5, 2017 the asset purchase agreement was completed and the Company received 4,900,000 Pure Energy common shares at a fair value of \$2,180,500, recognizing a gain on sale of \$31,447.

(ii) *Water Rights*

Nevada Sunrise granted to the Company the option (the “Water Permit Option”) to acquire a 100% interest in the Water Permit. In order to maintain the Water Permit Option the Company was required to:

- (i) make a total of US \$1,175,000 Water Permit cash payments until the exercise of the Water Permit Option;
- (ii) pay all legal and other costs associated with the application to transfer the Place of Use and Point of Diversion of the Water Permit; and
- (iii) pay all legal and other costs required to maintain the Water Permit.

In order to exercise the Water Permit Option the Company was required to pay to Nevada Sunrise an amount equal to the sum of:

- (i) the Water Permit cash payments made by Nevada Sunrise prior to the grant of the Water Permit Option;
- (ii) the value of the Water Permit share payments made by Nevada Sunrise before the exercise of the Water Permit Option (which shall be established by multiplying the number of Nevada Sunrise shares issued by the 20-day volume weighted average price immediately prior to the date such Water Permit share payments were made);
- (iii) the legal and other costs incurred by Nevada Sunrise to acquire and make the application to transfer the location of the Water Permit; and
- (iv) US \$200,000, payable in cash or a calculated value in shares, at the Company’s option (the “Water Permit Option Payment”).

On August 3, 2018, the Company entered into a Termination Agreement with Nevada Sunrise whereby the parties agreed that the Water Permit Option Agreement (the “Option Agreement”) be terminated and have no further force or effect. In consideration for the termination of the Option Agreement, Nevada Sunrise issued from treasury to the Company, an aggregate of 1,700,000 common shares in the capital of Nevada Sunrise (the “Termination Shares”) subject to hold periods that expire, with respect to:

- (i) 425,000 Termination Shares, on August 3, 2018 (received with a fair value of \$31,875);
- (ii) 425,000 Termination Shares, on February 3, 2019;
- (iii) 425,000 Termination Shares, on August 3, 2019; and
- (iv) 425,000 Termination Shares, on February 3, 2020

ADVANTAGE LITHIUM CORP.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017

(Unaudited – Prepared by Management)

(Expressed in Canadian Dollars)

8. Exploration and Evaluation Assets (continued)

On November 30, 2016 Nevada Sunrise and the Company were advised that the Nevada State Engineer issued a ruling of forfeiture against the Water Permit. Nevada Sunrise is appealing the ruling and the Company has the right to maintain the Water Permit Option, but will have no obligation to make any payments to maintain the Water Permit Option pending the decision of the courts. If Nevada Sunrise is successful in its appeal the Company can maintain the Water Permit Option by reimbursing Nevada Sunrise for all payments made to the vendor of the Water Permit, all legal costs, plus 20%. Due to the uncertainty of the outcome of the appeal process the Company has determined to record an impairment provision of \$380,799 in fiscal 2017 for all costs paid to date on the Water Permit. See Note 15(c).

9. Share Capital

(a) Authorized Share Capital

The Company's authorized share capital consists of an unlimited number of common shares without par value and unlimited preferred shares without par value. All issued common shares are fully paid.

(b) Equity Financings

Three Months Ended October 31, 2018

During the three months ended October 31, 2018, the Company:

- (i) issued 150,000 shares pursuant to the exercise of options for proceeds of \$75,000, and accordingly, the Company allocated \$49,500 of share-based payment reserve to share capital.
- (ii) issued 86,346 shares pursuant to the exercise of warrants for proceeds of \$26,146, and accordingly, the Company allocated \$42,194 of share-based payment reserve to share capital.

Fiscal 2018

During fiscal 2018, the Company completed a private placement offering for 15,585,956 common shares, at \$0.77 per share, for gross proceeds of \$12,001,186. The Company incurred \$504,596 for legal, filing and other costs associated with this private placement.

Directors and officers of the Company and close family members purchased 391,000 common shares for \$301,070. Orocobre also participated in the private placement and subscribed for 15,064,956 common shares for \$11,600,016.

(d) *Warrants (continued)*

As at October 31, 2018, the following warrants were outstanding and exercisable:

Number	Exercise Price	Expiry Date
2,986,149*	\$0.75	20-Oct-18**
99,690	0.60	20-Oct-18**
14,630,763	1.00	17-Feb-19
17,716,602		

* exercised 83,334 warrants subsequently

**expired subsequently

(e) *Share Option Plan*

The Company has established a rolling share option plan (the “Plan”), in which the maximum number of common shares which can be reserved for issuance under the Plan is 10% of the issued and outstanding shares of the Company. The minimum exercise price of the options is set at the Company’s closing share price on the day before the grant date, less allowable discounts. Options granted may be subject to vesting provisions as determined by the Board of Directors and have a maximum term of ten years.

During the three months ended October 31, 2018 the Company granted share options to purchase 700,000 (2017 – 800,000) common shares and recorded compensation expense of \$233,000 (2017 - \$210,523).

During fiscal 2018 the Company granted share options to purchase 2,200,000 common shares and recorded compensation expense of \$923,492.

The fair value of share options granted and vested is estimated using the Black-Scholes option pricing model using the following assumptions:

	<u>Three months ended</u> <u>October 31, 2018</u>	<u>Year ended</u> <u>July 31, 2018</u>
Risk-free interest rate	2.19% - 2.42%	1.41% - 2.07%
Estimated volatility	69% - 70%	73% - 82%
Expected life	2 years - 5 years	3 years - 5 years
Expected dividend yield	0%	0%
Estimated forfeiture rate	0%	0%

The weighted average grant date fair value of all share options granted during fiscal 2018 was \$0.33 (2017 - \$0.26) per share option.

During fiscal 2018 the Company repriced share options previously granted to purchase 800,000 common shares, from original exercise prices ranging from \$0.80 to \$0.90 per share to a revised exercise price of \$0.50 per share. The fair value of share options repriced has been estimated at \$46,000 using the Black-Scholes option pricing model. The assumptions used were: risk-free interest rate 1.17%; estimated volatility 82%; expected life 2.41 years - 2.50 years; expected dividend yield 0%; and estimated forfeiture rate 0%.

Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide a reliable measure of the fair value of the Company’s share options.

9. Share Capital (continued)

(f) Restricted Share Unit (“RSU”) Plan

On April 9, 2018 the Company adopted a restricted share unit plan (the “RSU Plan”). The RSU Plan provides for the issuance of up to 1,900,000 restricted share units (the “RSUs”). Under the RSU Plan, RSUs may be granted to directors, officers, employees and consultants of the Company (excluding investor relations consultants) as partial compensation for the services they provide to the Company. The RSU Plan is a fixed number plan, and the number of common shares issued under the RSU Plan, when combined with the number of stock options available under the Company’s stock option plan, will not exceed 10% of the Company’s outstanding common shares. The RSU Plan is subject to the approval of the TSXV and to disinterested shareholder approval which will be sought at the next shareholders meeting of the Company. Any RSUs awarded prior to obtaining both TSXV approval and disinterested shareholder approval (collectively, the “Approvals”) are subject to, and may not be paid out before, both approvals are obtained. Any RSU shares issued are subject to a four month hold from date of issue. The Company’s Compensation Committee and Board of Directors have approved the award of 1,750,000 RSUs. 1,700,000 RSUs will vest over three years based upon the achievement of certain milestones and 50,000 RSUs vested on June 26, 2018 pending approvals.

(g) Escrow Shares

On July 16, 2007 the Company and certain of its shareholders entered into an escrow agreement (the “CPC Escrow Agreement”). As at October 31, 2018, 34,496 (July 31, 2018 - 34,496) common shares remained held in escrow under the CPC Escrow Agreement.

10. Related Party Disclosures

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key management personnel consists of members of the Company’s current and former Board of Directors and its executive officers.

(a) During the three months ended October 31, 2018 and 2017 the following compensation was incurred:

Number	2018	2017
Fees and compensation	\$ 109,998	\$ 187,161
	\$ 109,998	\$ 187,161

During the three months ended October 31, 2018, the Company allocated the \$109,998 (2017 - \$187,161) fees and compensation based on the nature of the services provided: expensed \$109,998 (2017 - \$132,624) to directors and officers compensation; \$nil (2017 - \$nil) to general exploration costs; and capitalized \$nil (2017 - \$54,537) to exploration and evaluation assets. As at October 31, 2018, \$13,833 (July 31, 2018 - \$158,919) remained unpaid and has been included in accounts payable and accrued liabilities.

(b) During the three months ended October 31, 2018, the Company incurred \$nil (2017 - \$16,400) for accounting and administration services provided by a private company owned by the Company’s former CFO. As at October 31, 2018, \$5,449 (July 31, 2018 - \$14,048) remained unpaid and has been included in accounts payable and accrued liabilities.

(c) During the three months ended October 31, 2018, the Company incurred \$5,000 (2017 - \$nil) for accounting and administration services provided by a partnership in which the CFO has an interest. As at October 31, 2018, \$5,000 (July 31, 2018 - \$nil) remained unpaid and has been included in accounts payable and accrued liabilities.

(d) During the three months ended October 31, 2018, the Company paid a total of \$nil (2017 - \$15,866) to the spouse of a director of the Company of which \$nil (2017 - \$13,041) was for legal services and \$nil (2017 - \$2,825) for rental of office space.

10. Related Party Disclosures (continued)

- (e) During the three months ended October 31, 2018, the Company incurred \$nil (2017 - \$42,252) for equipment rental provided by a private company controlled by a director of the Company. As at October 31, 2018, \$nil (July 31, 2018 - \$nil) remained unpaid and has been included in accounts payable and accrued liabilities.
- (f) See also Note 5.

12. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following categories: FVTPL; held-to-maturity investments, loans and receivables, available-for-sale; and other financial liabilities. The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	Category	October 31, 2018	July 31, 2018
Cash	FVTPL	\$ 11,602,380	\$ 17,413,386
Receivable from joint venture partner	Loans and receivable	390,623	339,316
Investments	Available-for sales	595,157	627,284
Accounts payable and accrued liabilities	Other liabilities	(2,035,976)	(1,745,713)
Total		\$ 10,552,184	\$ 16,634,273

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for cash, amounts receivable, receivable from joint venture partner and accounts payable and accrued liabilities approximate their fair value due to their short-term nature. The Company's fair value of cash and investment under the fair value hierarchy are measured using Level 1 inputs.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash is remote.

ADVANTAGE LITHIUM CORP.**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017***(Unaudited – Prepared by Management)**(Expressed in Canadian Dollars)***12. Financial Instruments and Risk Management (continued)***Liquidity Risk*

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

	Less than 3 months	3 – 12 months	1 – 5 months	Over 5 years	Total
Cash	\$ 11,602,380	\$ -	\$ -	\$ -	\$ 11,602,380
Receivable	390,623	-	-	-	390,623
Investments	-	-	595,157	-	595,157
Accounts payable and accrued liabilities	(2,035,976)	-	-	-	(2,035,976)
Total	\$ 9,957,027	\$ -	\$ 595,157	\$ -	\$ 10,552,184

	Less than 3 months	3 – 12 months	1 – 5 months	Over 5 years	Total
Cash	\$ 17,413,386	\$ -	\$ -	\$ -	\$ 17,413,386
Receivable	339,316	-	-	-	339,316
Investments	-	-	627,284	-	627,284
Accounts payable and accrued liabilities	(1,745,713)	-	-	-	(1,745,713)
Total	\$ 16,006,989	\$ -	\$ 627,284	\$ -	\$ 16,634,273

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

ADVANTAGE LITHIUM CORP.**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED OCTOBER 31, 2018 AND 2017***(Unaudited – Prepared by Management)**(Expressed in Canadian Dollars)***12. Financial Instruments and Risk Management (continued)****(b) Foreign Currency Risk**

The Company's functional currency is the Canadian Dollar and major transactions are transacted in Canadian Dollars, US Dollars and Argentine Pesos. The Company maintains Argentine Peso bank accounts in Argentina and US Dollar bank accounts in Canada to support the cash needs of its foreign operations. Management does not hedge its foreign exchange risk. At October 31, 2018, 1 Canadian Dollar was equal to 0.76 US Dollar and 28.10 Argentine Pesos.

Balances are as follows:

	Argentine Pesos	US Dollars	CDN \$ Equivalent
Cash	\$ 3,424,917	\$ 43,479	\$ 179,092
Value added tax receivable	48,687,648	-	1,732,657
Accounts payable and accrued liabilities	(29,374,509)	(266,563)	(1,396,097)
	\$ 22,738,056	\$ (223,084)	\$ 515,652

Based on the net exposures as of October 31, 2018 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the US Dollar and Argentine Peso would result in the Company's comprehensive loss being approximately \$52,000 higher (or lower).

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of lithium properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital, cash and cash equivalents and short-term investments. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

Transfer of fair value on exercise of options	(49,500)	-
	\$ (91,694)	\$ 882,000

14. Segmented Information

The Company operates in one reportable segment, the exploration and development of unproven exploration and evaluation assets. The Company's exploration and evaluation assets are located in USA and Argentina and its corporate assets, comprising mainly of cash, are located in Canada. The Company is in the exploration stage and has no reportable segment revenues or operating results.

The Company's total assets are segmented geographically as follows:

	As at October 31, 2018		
	Canada	Argentina	Total
Current assets	\$ 11,995,027	\$ 137,046	\$ 12,132,073
