Fineqia AG Partners with ETPLink to Drive Primary Market Efficiency

London, UK / Mar. 18, 2025 – Fineqia International Inc. ("Fineqia") (CSE: FNQ) (OTC: FNQQF) (Frankfurt: FNQA), a digital asset and investment business, announces a partnership between its subsidiary Fineqia AG ("Fineqia AG") and ETPLink Ltd. ("ETPLink") to provide primary market order management services for its exchange-traded notes (ETN) business.

ETPLink will integrate its advanced distributed ledger technology (DLT) based platform with Fineqia AG's existing infrastructure to automate and streamline the exchange-traded product (ETP) creation and redemption workflow, delivering a seamless, efficient, and transparent process for all stakeholders.

"We are thrilled to welcome Fineqia AG to the ETPLink network," said Roger Balch, director of business development and operations at ETPLink. "We look forward to bringing further speed and efficiency to market participants, driving liquidity, and contributing to the growth and development of the ETP market."

"This partnership echoes Fineqia AG's standing in maintaining transparency and integrity," said Bundeep Singh Rangar, chief executive officer of Fineqia International Inc. "By integrating ETPLink's primary market order management platform into the foundation of our ETN products, we streamline operations for our authorized participants, fund administrators, and custodians. This enhances investor trust, ensures regulatory alignment, and further solidifies our position in the digital asset market.

On 24 January 2025, Fineqia AG announced the issuance of the world's first ETN to deploy underlying crypto assets in decentralized finance (DeFi). The Fineqia FTSE Cardano Enhanced Yield ETN (Ticker: YADA; ISIN: LI1408648106) is listed on the Vienna Stock Exchange. It was also listed on the Stuttgart Stock Exchange on 10 March 2025.

Exchange-traded products (ETPs) include exchange traded- funds (ETFs) and ETNs. ETNs, such as those issued by Fineqia AG, are debt instruments that track the performance of an underlying asset, including cryptographically encrypted digital ones. Together with ETFs, ETNs form a broader category of ETPs that provide investors with regulated and liquid access to a variety of asset classes.

The partnership agreement between Fineqia AG and ETPLink was signed on 12 June 2023. ETPLink's services commenced with the launch of the ETN, on 24 January 2025, in line with the terms of the agreement.

About Fineqia AG

Fineqia AG is a wholly owned subsidiary of Fineqia International, set up to pursue business on the European continent. Fineqia AG, based in Liechtenstein, received approval of its base prospectus by the country's Financial Market Authority (FMA) to offer Exchange Traded Notes (ETNs) collateralized by digital assets. Its base prospectus complies with the European Union's (EU) passport directive and enables its ETNs to be distributed across the EU's single market.

About ETPLink

ETPLink Ltd. (www.etplink.com) is a unified platform for exchange-traded product (ETP) primary market transactions. Founded in 2021 and headquartered in London, ETPLink leverages distributed ledger technology to streamline the creation and redemption process for authorized participants, market makers, issuers, custodians, transfer agents, and portfolio trading desks. The platform supports more than 25 contracted parties across all asset classes, including equities, fixed income, commodities, and digital assets. ETPLink provides a single access point with unified reference data through a web-based interface and API connectivity, eliminating the need for costly proprietary platforms and dedicated communication channels. Built on privately permissioned distributed ledger technology (DLT), the ETPLink platform ensures resilience, security, immutability, auditability, and customization.

FORWARD-LOOKING STATEMENTS

Some statements in this release may contain forward-looking information (as defined under applicable Canadian Securities Laws) ("forward-looking statements"). All statements, other than of historical fact, that address activities, events or developments that Fineqia Intl. (the "Company") believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding potential acquisitions and financings) are forward-looking statements. Forward-looking statements are generally identifiable by use of the words "may", "will", "should", "continue", "expect", "anticipate", "estimate", "believe", "intend", "plan" or "project" or the negative of these words or other variations on these words or comparable terminology. Forward-looking statements are subject to a number of risks and uncertainties, many of which are beyond the Company's ability to control or predict, that may cause the actual results of the Company to differ materially from those discussed in the forward-looking statements. Factors that could cause actual results or events to differ materially from current expectations include, among other things, without limitation, the failure to obtain sufficient financing, and other risks disclosed in the Company's public disclosure record on file with the relevant securities regulatory authorities. Any forward-looking statement speaks only as of the date on which it is made except as may be required by applicable securities laws. The Company disclaims any intent or obligation to update any forward-looking statement except to the extent required by applicable securities laws.

DISCLAIMER:

Crypto assets are unregulated investment products prone to sudden and substantial value fluctuations, presenting a high risk of total loss of the invested capital. As the underlying components of the Digital Asset Blockchain Infrastructure (DABI) Actively Managed Certificate (AMC) are unregulated, investors are unlikely to have access to regulatory protections or investor compensation schemes. If you are unsure whether these assets are suitable for your individual circumstances, it is highly recommended to obtain independent financial and legal advice.
