Drilling Results have shown Zinc-Silver and Lead Values within the Quartz-Sulphide Shears on the Silver Crown 6 claim.

The Silver Crown 6 property is located approximately 22 kilometers north of Stewart, British Columbia in the Skeena Mining Division. The property has been optioned by Decade Resources Ltd who can earn a 100 % interest in the property from Silver Grail Resources Ltd and Teuton Resources Corp. The property is comprised of 1 claim covering approximately 613 hectares. The claim extends from just west of American Creek with its confluence with Bear River for approximately 2 kilometers.

In January to February 2008, a total of 1402.45 meters of drilling was completed in 9 holes. Drilling was conducted in an area where trenching in 2006 yielded an assay of 0.09 g/t Au, 167.3 g/t Ag, 1.72 % Cu, 22.7 % Pb and 8.44 % Zn over 1.5 meters of width within a massive sulphide lense. The best drill results were in SCR-2008-2 which gave an intersection of 0.46 meters of 8.3 g/t Ag, 0.11 % Pb and 20.1 % Zn and SCR-2008-8 which gave an intersection of 2.13 meters of 23.3 g/t Ag, 1.48 % Pb and 4.05 % Zn.

Assays greater than 1% Zn are shown in the table below:

Table 2 Significant Drill Hole Intersections
