Form 53-901.F Material Change Report
Under Section 85(1) of the *Securities Act* (British Columbia)

Form 27 Material Change Report
Under Section 118(1) of the *Securities Act* (Alberta)- Form 27

Item 1 Reporting Issuer

Decade Resources Ltd. (the "Company")
611 8th Street
Stewart, B. C. V0T 1W0

Item 2 Date of Material Change

October 18, 2012

Item 3 Press Release/Publication/Filing

Issued October 18, 2012 and distributed through the facilities of Canada Stockwatch and Market News.

Item 4 Summary of Material Change

Red Cliff Project Update

Item 5 Full Description of Material Change

See attached press release.

Item 6 Reliance on Confidentiality Provisions of the Securities Acts

This report is not being filed on a confidential basis.

Item 7 Omitted Information

There are no significant facts required to be disclosed herein which have been omitted.

Item 8 Senior Officer

Contact: Randolph Kasum, Secretary
Telephone: (250) 636-9283

Item 9 Statement of Senior Officer/Director

The foregoing accurately discloses the material change referred to herein.

Red Cliff Project Update.

Vancouver, BC - Decade Resources Ltd. ("Decade") and Mountain Boy Minerals Ltd. ("Mountain Boy") are pleased to provide an update for the Red Cliff project in Northwestern British Columbia. The joint venture project is owned 65% by Decade and 35% by Mountain Boy. The Red Cliff is a gold/copper property consisting of 8 Crown Granted mineral claims located 25 miles north of the town of Stewart, British Columbia. The Silver Crown 6 claim in which Decade is earning a 100 % interest is adjacent to the north portion of the crown grants. The Red Cliff Extension claim owned 100 % by Decade is along the east side of the Silver Crown 6 claim. North of the Silver Crown 6 claim, Mountain Boy Minerals owns a 100 % interest in the Stromeyerite claims. To date, the Companies have identified 3 separate gold bearing zones called the Upper Montrose, Lower Montrose and Waterpump within the Crown Granted claims. Recent work has exposed mineralization on the Silver Crown 6 claim approximately 650 metres north of Lydden Creek along the boundary with the Montrose Crown Granted claim.

To date, the companies have completed 73 drill holes that have been entirely within the joint venture Montrose Crown Granted claim . It has indicated the following:

- A wide zone of brecciated dyke with pyrite-minor chalcopyrite and massive hematite stringers along fractures 650 metres north of Lydden Creek.
- Surface mineralization at the Montrose Crown/Silver Crown boundary is identical to that intersected at a depth of 700 metres below surface.
- Three holes testing this area of mineralization all intersected a wide zone of brecciation with associated pyrite, hematite and chalcopyrite within fractures along this zone.
- Continuity of the Upper Montrose zone from the area of previous drilling down to Lydden Creek and a depth extent of at least 700 metres.
- The presence of several gold bearing zones along the 30-40 metre wide shear system hosting the Upper Montrose structure. One is associated with semi-massive chalcopyrite-pyrite veins and the other is associated with a chalcopyrite-pyrite stockwork.
- A deep gold bearing zone within a chalcopyrite-pyrite stockwork containing visible gold, that is 50 metres south and 100 metres below the 2009-2011 drilling...

- A drill hole testing for continuity of a gold bearing chalcopyrite-pyrite stockwork between DDH-MOM-12-61 and 57 intersected several zones of chalcopyrite mineralization.

Complete assay results for sampled core from drill holes DDH-MOM-12-1 to 66 are expected in the next few days.

Additional assay results which include base metal and silver values received to date for this drilling are being compiled at present and will be posted on the websites when completed.

All samples are assayed by Loring laboratories of Calgary, Alberta. It is an ISO9001 certified laboratory.

Ed. Kruchkowski, P. Geo., a qualified person under National Instrument 43-101, is in charge of the exploration program on behalf of the Companies and is responsible for the contents of this release. E Kruchkowski has conducted all the exploration on this property from 2007 to present and has logged and overseen the sampling of the core. The QP has used the assay data for the drilling and the drill logs to calculate the gold bearing intervals.

Decade Resources Ltd. is a Canadian based mineral exploration company actively seeking opportunities in the resource sector. Decade holds numerous properties at various stages of development and exploration from basic grass roots to advanced. Its properties and projects are primarily in Northern British Columbia. For a complete listing of the Company assets and developments, visit the Company website at www.decaderesources.ca. The Company is compliant with all requirements to earn its 100 % interest in the Silver Crown 6 claim.

For further information, please Investor Relations at 778-340-1830 or cell at 604-202-6596 as well as investor@decaderesources.ca.

Mountain Boy Minerals Ltd. is a Canadian based mineral exploration company with diverse property and resource holdings around the Stewart region in British Columbia's golden triangle. It owns 20% of the Silver Coin project, a gold-silver-base metals project that has a 43-101 compliant resource calculated. The Company is also exploring silver-base metals on its American Creek and Bear Valley properties as well as copper-gold on their Stewart area claims.

For further information, please contact investor relations at 604-202-6596 or Ed Kruchkowski at 250-636-9232 or on the company web page: mountainboyminerals.ca.
