NEWS RELEASE

October 18, 2016

DRILLING INTERSECTS 2.13 M OF 45.95 G/T GOLD AT THE BOW PROPERTY

Stewart, BC - Decade Resources Ltd (Decade) reports on assay results received for the 2016 field exploration completed on the Bow property. The Company reports that it drilled a total of 500 m on the Bend vein within the Bow property. The drilling was intended to confirm drill results from the 1980's as well as check for strike extension along the Bend vein. Trenching along the surface projection of the vein east of the drilling, exposed it over another 100 m strike length.

Highlights of the drilling is shown in the table below:

DDH #	From (m)	To (m)	Width (m)	Au g/t
2016-BOW-5	15.24	21.04	5.79	21.18
including	17.53	19.66	2.13	45.95
2016-BOW-6	18.14	20.73	2.59	13.43
2016-BOW-7	14.48	20.88	6.4	5.75
including	18.78	19.82	1.04	16.53

Drill intercepts are close to 90 % of the shallow dipping Bend vein. Three holes drilled east of the above drilling in an area of deep overburden did not encounter the vein due to being spotted in the footwall area of the vein. Because of this, trenching was conducted to follow the strike of the vein. Grab sampling was conducted on vein zone exposed in the trenching. A total of 11 samples of sulphide rich material assayed from 1.2 to 41.67 g/t gold over a strike length the exposed strike length. Two samples with semi-massive arsenopyrite assayed 33.87 and 41.67 g/t gold. Mineralization on the Bow property is associated with the Summit Lake stock (part of the Texas Creek Plutonic suite that is associated with gold mineralization at Brucejack Lake, Premier gold mine/Silver Coin deposit and the Scottie gold mine).

All samples are assayed by Loring laboratories of Calgary, Alberta. It is an ISO9001 certified laboratory. All core was cut in half with a diamond saw with half sent to the lab and half placed back in the core boxes and stored in a Company facility. All grab samples assayed consisted of 0.5 to 1 kg of representative mineralization. The

Company employs a system of known standards and blanks inserted into the sample stream to monitor lab results.

Ed. Kruchkowski, P. Geo., a qualified person under National Instrument 43-101, is in charge of the exploration programs on behalf of the Company and is responsible for the contents of this release. E. Kruchkowski is not independent of Decade as he is the president of the Company.

Decade Resources Ltd. is a Canadian based mineral exploration company actively seeking opportunities in the resource sector. Decade holds numerous properties at various stages of development and exploration from basic grass roots to advanced ones. Its properties and projects are all located in the “Golden Triangle” area of Northern British Columbia.
