

Decade Resources Reports First Assays from the North Mitchell Property Indicate High Gold and Silver

Stewart, British Columbia--(Newsfile Corp. - October 14, 2025) - Decade Resources Ltd. (TSXV: DEC) ("Decade" or the "Company") is pleased to announce the first certified assay results from surface sampling on the North Mitchell Property, located in the Golden Triangle region of northwestern British Columbia. The Property is contiguous to Seabridge Gold's KSM and Snowfield deposits and Newmont's Brucejack Mine, placing it at the epicenter of one of the world's largest concentrations of gold and copper resources.

Highlights of Initial Assays From Random Grab Samples on In-situ Quartz Stockwork on the Property.

- 45.0 g/t Au and 60.4 g/t Ag.
- 11.6 g/t Au and 53.92 g/t Ag.
- 1.05 g/t Au and 4.23 g/t Ag.

Note: The samples above were random in nature but do not necessarily represent the metal content in the located source. The Company feels that the high metal content is highly encouraging and further investigation is warranted.

Nearby Major Deposits (NI 43-101 Compliant Resources)

"The QP has been unable to verify the following information, and that the information is not necessarily indicative to the mineralization on the property that is the subject of the disclosure. It is being used for reference purposes."

Deposit	Category	Tonnes (Mt)	Grade	Contained Metal
Mitchell (Seabridge - KSM)	M&I	2,359	0.54 g/t Au, 0.15% Cu	41.1 Moz Au, 7.99 Blb Cu
	Inferred	1,283	0.29 g/t Au, 0.14% Cu	11.8 Moz Au, 3.83 Blb Cu
Iron Cap (Seabridge - KSM)	M&I	471	0.38 g/t Au, 0.21% Cu	5.8 Moz Au, 2.21 Blb Cu
	Inferred	2,309	0.41 g/t Au, 0.27% Cu	30.3 Moz Au, 13.8 Blb Cu
Kerr (Seabridge - KSM)	M&I	384	0.22 g/t Au, 0.41% Cu	2.7 Moz Au, 3.46 Blb Cu
	Inferred	2,589	0.27 g/t Au, 0.35% Cu	22.8 Moz Au, 19.9 Blb Cu
Sulphurets (Seabridge - KSM)	M&I	446	0.55 g/t Au, 0.21% Cu	7.9 Moz Au, 2.06 Blb Cu
	Inferred	223	0.44 g/t Au, 0.13% Cu	3.2 Moz Au, 0.64 Blb Cu
East Mitchell / Snowfield (Seabridge)	M&I	1,759	0.55 g/t Au, 0.10% Cu	31.2 Moz Au, 3.90 Blb Cu
	Inferred	281	0.37 g/t Au, 0.07% Cu	3.4 Moz Au, 0.40 Blb Cu
Treaty Creek (Tudor Gold, 2024)	M&I	730.20	1.19 g/t AuEq	27.87 Moz AuEq (21.66 Moz Au + 128.73 Moz Ag + 2.87 Blb Cu)
	Inferred	149.61	1.25 g/t AuEq	6.03 Moz AuEq (4.88 Moz Au + 28.97 Moz Ag + 503.23 Mlb Cu)
Brucejack (Newmont)	M&I	22.3	7.7 g/t Au, 9.5 g/t Ag	5.7 Moz Au, 6.9 Moz Ag
	Inferred	5.0	6.7 g/t Au, 10.0 g/t Ag	1.1 Moz Au, 1.6 Moz Ag

Brucejack is recognized as one of the highest-grade producing gold mines globally, with historical production already exceeding 1.5 Moz Au since startup, demonstrating a much larger gold endowment than is captured in compliant reserves and resources.

Management Commentary

Ed Kruchkowski, President of Decade Resources, stated:

"We are thrilled with the initial high-grade assay results, including gold assays, from the North Mitchell Property. The combination of quartz stockwork with visible sulfides and the presence of chalcocite-bornite float samples containing copper underscores the potential for both Treaty Creek/Iron Cap porphyry Cu-Au and high-grade Brucejack-style epithermal gold systems. The proximity to world-class deposits such as KSM, Snowfield, Treaty Creek, and Brucejack highlights the strategic importance of this property."

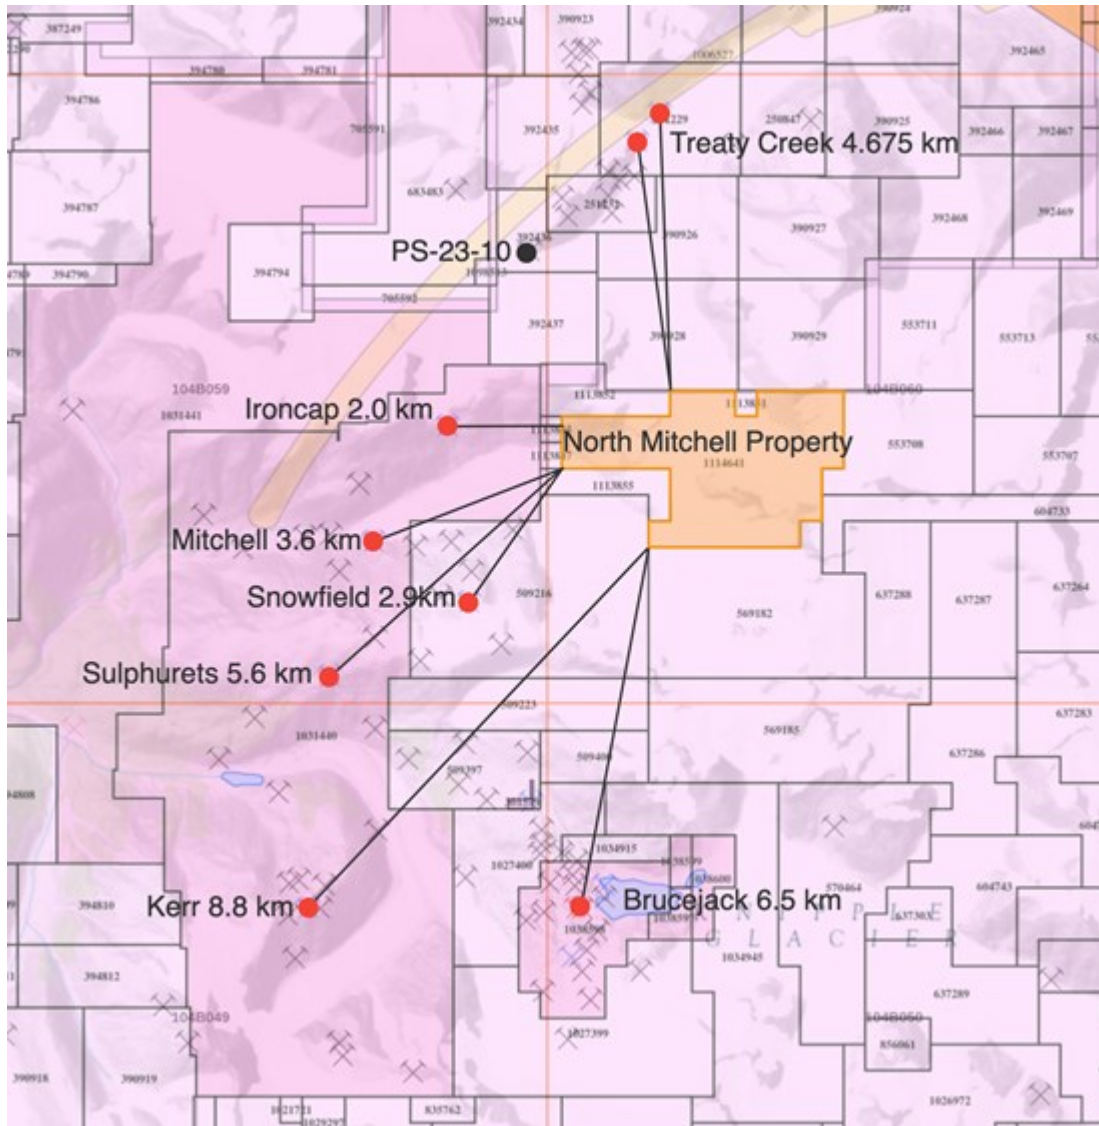

Figure 1. Location of the North Mitchell Property in relation to nearby world-class deposits including KSM, Iron Cap, Snowfield, Sulphurets, Treaty Creek, and Brucejack.

Table 1: Results for Rush Assays

Assay Number	Location	Type	Gold g/t	Silver g/t	Zinc %
NM267	427168E 6267078N	Outcrop Grab	11.6	53.92	0.48
NM267A	427168E 6267080N	Outcrop Grab	45.0	60.4	2.1

NMT	427160E 6267075N	Outcrop Grab	1.05	4.23	0.038
-----	---------------------	--------------	------	------	-------

The samples were collected several meters apart on BC mining claim 1114641 within an exposure of white quartz veins carrying sparse galena in a matrix of silicified grey rock. The matrix carries very fine grained pyrite with strong sericite alteration. Sampling was random and assaying was rushed to aid in ongoing exploration.

Next Steps

- Complete detailed mapping and sampling program over key structural zones.
- Expand surface sampling grid and prioritize drill target definition.
- Anticipate maiden drill program commencing in the 2026 season, subject to permitting and financing.

Cautionary Statement

Sampling results reported herein are selective in nature and may not represent the true grade or extent of mineralization on the Property. Comparisons to adjacent deposits are provided for geological context only and may not indicate that similar mineralization occurs on the North Mitchell Property. Mineral resources which are not mineral reserves do not have demonstrated economic viability. Inferred resources are considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves.

All samples were prepared at MSA Labs' preparation laboratory in Terrace, B.C., and assayed at MSA Labs' geochemical laboratory in Langley, B.C. Gold was assayed using a fire assay with atomic absorption (AA) spectrometry finish. Samples over 25 parts per million gold were fire assayed with gravimetric finish. All samples were analyzed by four-acid digestion with multielement ICP-MS, with silver and base metal overlimits being reanalyzed by emission spectrometry. MSA Labs' quality system complies with the requirements for the international standards ISO 17025 and ISO 9001. MSA Labs is independent of the company.

Qualified Person

Ed Kruckowski, P.Geo., President of Decade Resources Ltd., is the Qualified Person as defined by National Instrument 43-101 and has reviewed and approved the technical contents of this news release.

About Decade Resources Ltd.

Decade Resources Ltd. is a Canadian based mineral exploration company actively seeking opportunities in the resource sector. Decade holds numerous properties at various stages of development and exploration from basic grass roots to advanced ones. Its properties and projects are all located in the "Golden Triangle" area of northern British Columbia. For a complete listing of the Company assets and developments, visit the Company website at www.decaderesources.ca. For investor information please call 250- 636-2264 or Gary Assaly at 604-377-7969.

Forward-Looking Statements

This release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address events or developments that the Company expects to occur are forward-looking statements. Forward-looking statements are subject to a variety of risks and uncertainties that could cause actual events or results to differ materially from those reflected in the forward-looking statements.
