

Alabama Graphite Announces Preliminary Metallurgical Results Showing Abundant Large Flakes in Newly Discovered Areas from its Coosa Project in Alabama, USA

Vancouver, BC / TNW-Accesswire / February 27, 2015 - Alabama Graphite Corp. ("Alabama Graphite" or the "Company") (TSX-V:ALP) (OTCQX:ABGPF) (FRANKFURT: 1AG WKN: A1J35M) (ISIN# CA0102931080) is pleased to announce preliminary metallurgical results from trench samples taken in late 2014 from its Coosa Project in Coosa County, Alabama. Key results indicate that high percentages of coarse flakes occur in several new areas.

The composite samples were prepared from shallow trenches excavated to test anomalies discovered by the airborne geophysical surveys east of the already previously defined NI 43-101 compliant Coosa resource. Company personnel collected bulk material across continuous 50' to 75' lengths and submitted this to SGS Labs in Lakefield, Ontario. SGS used 2 kg of blended material per sample for their analyses.

Preliminary results are presented in the table below:

Sample	TR-03A	TR-07B	TR-12	TR-14D	TR-19
Location	Northern Strat	Coosa Grid	Fixico Mine	Holy Schist	Big Flake
Grade	3.34% C(t)	3.28% C(t)	3.60% C(t)	3.81% C(t)	3.10% C(t)
+ 80 mesh	27.4%	18.6%	28.2%	30.5%	33.9%

"We are excited by these results as it proves we are finding large graphite flakes also on our vast Coosa Project as we did on our Chilton Project. These results from the Coosa Project are all from recent surface trenching and consist exclusively of soft oxidized material. This in our opinion is the best material to mine graphite in a simple, cost effective and environmentally friendly manner," states Ron Roda, President and CEO of Alabama Graphite. "In addition, these trenches are independent from the existing 43-101 resource and represent exciting opportunities to significantly expand our inventory of oxidized graphitic schist. The Company is in the process of planning for a drill program later this Spring to test and qualify these new areas for an updated resource in addition to the upcoming PEA."

Additionally, Alabama Graphite has begun work on a Preliminary Economic Assessment (PEA) for the Coosa Project. Metal Mining Consultants (MMC) of Littleton, Colorado, has been selected to conduct the initial Capital and Operating Expense projections. The PEA will utilize both these CapEx and OpEx estimates as well as an updated resource estimate to include the planned drilling.

Rick Keevil, P. Geo., a Director of the Company and VP of Project Development, is a Qualified Person as defined by National Instrument 43-101, has reviewed the contents of this press release.

About Alabama Graphite

Alabama Graphite Corp.'s mission is to become one of the greenest graphite producers in the world. The Company, through its wholly-owned subsidiary, Alabama Graphite Company Inc., is conducting exploration and development both at its flagship Coosa Graphite Project in Coosa County, Alabama, USA and the recently acquired Bama Mine Project in Chilton County, Alabama, USA. These two advanced-stage projects are 100% owned by Alabama Graphite and are on private land. The two projects encompass over 43,000 acres and are located in an area with significant historical production of crystalline flake graphite. The Company has the largest NI 43-101 indicated flake graphite resource in

the United States based on drilling 0.18 square miles (0.3% of the total acreage). The Alabama deposits are unique in that a significant portion of the graphite-bearing material is oxidized and has been broken down into an extremely soft rock. Both projects have in place critical infrastructure, are within close proximity to transportation routes and enjoy a hospitable climate allowing for year-round production and delivery. Disclaimer for Forward-Looking Information

This press release contains forward-looking information under applicable Canadian securities laws ("forward-looking statements") that are based on the beliefs of management and reflect Alabama Graphite Corp.'s current expectations. When used in this press release, the words "estimate", "project", "belief", "anticipate", "intend", "expect", "plan", "predict", "may" or "should" and the negative of these words or such variations thereon or comparable terminology are intended to identify forward-looking statements. Such statements reflect the current view of Alabama Graphite Corp. with respect to risks and uncertainties that may cause actual results to differ materially from those contemplated in those forward-looking statements.

By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among other things, the interpretation and actual results of current exploration activities; changes in project parameters as plans continue to be refined; future prices of graphite; possible variations in grade or recovery rates; failure of equipment or processes to operate as anticipated; the failure of contracted parties to perform; labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing or in the completion of exploration, as well as those factors disclosed in the Company's publicly filed documents. Forward-looking statements are also based on a number of assumptions, including that contracted parties provide goods and/or services on the agreed timeframes, that equipment necessary for exploration is available as scheduled and does not incur unforeseen breakdowns, that no labour shortages or delays are incurred, that plant and equipment function as specified, that no unusual geological or technical problems occur, and that laboratory and other related services are available and perform as contracted.

Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made and Alabama Graphite Corp. undertakes no obligation to update forward-looking statements (unless required by law) if these beliefs, estimates and opinions or other circumstances should change. Investors are cautioned against attributing undue certainty to forward-looking statements.

Alabama Graphite Corp cautions that the foregoing list of material factors and assumptions are not exhaustive. When relying on Alabama Graphite Corp. forward-looking statements to make decisions, investors and others should carefully consider the foregoing factors and assumptions and other uncertainties and potential events. Alabama Graphite Corp. has also assumed that the material factors and assumptions will not cause any forward-looking statements to differ materially from actual results or events. However, the list of these factors and assumptions is not exhaustive and is subject to change and there can be no assurance that such assumptions will reflect the actual outcome of such items or factors.
