

iSIGN Media Announces the Signing of a Health and Medical Industry Agreement with SpeedTrack

TORONTO, Dec. 20, 2018 -- iSIGN Media Solutions Inc. ("iSIGN" or "Company") (TSX-V: ISD) (OTC: ISDSF), a leading provider of interactive mobile proximity marketing and public security alert solutions is pleased to announce that it has entered into an Agreement with SpeedTrack, Inc. ("SpeedTrack"), a company located in Irvine, California for the use of the Company's Security Alert Messaging ("SAM") technology for a preliminary period of 90 days with the option to extend and substantially expand the implementation of the SAM system as well as exploring location-based messaging with the iSIGN Smart Antenna.

SpeedTrack (www.speedtrack.com) is a software company, specializing in data analytics and predictive modeling solutions. SpeedTrack operates primarily within the fields of healthcare, law enforcement, and automotive industries in both the United States and Canada. The company's primary interest in SAM at this time is SAM's ability to allow companies to communicate directly, quickly and securely with staff, clients and customers.

SpeedTrack is a substantial, growing player in the data analytics space. Its patented solutions are used by some of the largest hospital and health organizations in California.

"We were recently introduced to iSIGN and its SAM technology and were impressed with its design and capabilities," said Mr. Jeff Pratt, SpeedTrack's President and Chief Executive Officer. "We believe our clients will see its advantages and possibilities as they are exposed to it."

iSIGN's patented technology goes far beyond interactive, proximity marketing, as its Security Alert Messaging (SAM) can assist businesses, hospitals, medical facilities, schools, churches, and government organizations to send instant notifications, both emergency and normal day-to-day communications. The system provides extensive configuration options allowing clients to deliver secure custom messages for one-to-one, one to defined groups, and system wide messaging. Customers must choose to opt-in, upon which they will receive a multilingual and secure message through various forms of media, at no cost to them.

The implementation period will start shortly after the Christmas holiday season.

About iSIGN Media

iSIGN, a Canadian company based in Toronto, Ontario is a data-focused, software-as-a-service (SaaS) company that is a pioneering leader in the areas of location-based security alert messaging and proximity marketing utilizing Bluetooth® and Wi-Fi connectivity in complete privacy. Creators of the Smart suite of products, a patented interactive proximity marketing technology, iSIGN enables the delivery of messages to mobile devices in proximity, with real-time reporting and analytics on a variety of metrics. Partners include: IBM, Keyser Retail Solutions, Baylor University, Verizon Wireless and TELUS.
