Strathmore Announces Change in Board of Directors

April 3, 2025 – Kelowna, B.C. – Strathmore Plus Uranium Corporation (“Strathmore” or “the Company”) announces that Mr. Jordan Potts has stepped down as a Director of the Company, effective immediately.

Dev Randhawa, CEO of Strathmore, stated, “We would like to extend our sincere gratitude to Mr. Potts for his valuable contributions during his tenure as a director. His expertise, fundraising efforts, and support have been instrumental to the Company’s growth. We wish him all the best in his future endeavors and look forward to the continued success of Strathmore.”

About Strathmore Plus Uranium Corp.

Strathmore has three uranium projects with current drilling permits in Wyoming: Agate, Beaver Rim, and Night Owl, where Strathmore has completed exploration drilling on each of the properties. The Agate and Beaver Rim properties contain uranium mineralization in typical Wyoming-type roll front deposits based on historical and recent drilling data. After the past two years' drilling and exploration program, Strathmore remains confident that the Agate project has the potential to be an ISR mine.

The 2025 drill program at Agate is currently set for an additional 100 holes, after which the Company will move toward a resource estimate on Agate. At Beaver Rim, the 2025 drill program will build upon the successful identification in 2024, and historically, of stacked roll front deposits on the project.
