

Brixton Metals Mobilizes Crews for Drilling on its Cobalt Targets in Ontario

VANCOUVER, BC – (Marketwired – January 9, 2018) – Brixton Metals Corporation (TSXV: BBB) (the “**Company**” or “**Brixton**”) is pleased to announce that, following the completion of its \$3 million private placement, the Company has commenced drilling at its Langis and Hudson Bay projects located in the Cobalt Camp of Ontario, Canada. Drilling is currently underway and is focusing on high grade cobalt and silver targets as extension of the underground workings and newly identified structural targets. The Company is planning to drill 10,000 to 15,000 metres on the two brownfield mine projects combined.

Target Highlights

- Historically the Langis Mine produced 0.36M pounds of cobalt and 10.4Moz silver to depths of 150 metres;
- Historically the Hudson Bay Mine produced 0.186M pounds of cobalt and 6.4Moz of silver to depths of only 60 metres;
- Assays from 4 samples in 2017 returned 10 to 16 percent cobalt and 2 to 18 percent silver as disclosed in Brixton’s News Release dated August 17, 2017;
- Past production was focused on high grade silver veins and the high-cobalt low-silver veins that were encountered underground and were not mined in many areas of the Langis mine;
- The project has excellent local infrastructure; year-round road access, close proximity to power, railway, gas-pipeline, small scale mills, a refinery and assay lab.

Chairman and CEO of Brixton, Gary R. Thompson stated, “We believe that these high potential brownfield projects provide a very interesting opportunity for shareholders of Brixton to benefit from the strong demand for battery metals. The Company anticipates a good amount of news flow in the coming months from its activities.”

About the Langis and Hudson Bay Silver - Cobalt Project

Brixton’s wholly owned Langis and Hudson Bay past producing mines are located 500km north from Toronto, Ontario, Canada. The cobalt-silver mineralization occurs as steeply-moderately and in some cases shallow dipping veins within any of the three main rock types; Archean volcanics, Coleman Member sediments and Nipissing diabase. The Langis mine produced 10.4Moz of silver at 25 oz/t Ag and 358,340 pounds of cobalt and the Hudson Bay mine produced 6.4 Moz of silver at 123 oz/t Ag and 185,570 pounds of cobalt. Historically, the Cobalt Camp produced 50M pounds

of cobalt as a by-product of 500M oz of silver production and including nickel and copper by-products.

Mr. Sorin Posescu, P.Geo., is a Qualified Person as defined under National Instrument 43-101 standards and has reviewed and approved this news release.

The Company granted 2,015,000 incentive stock options to directors, employees and consultants to the Company under the Company's stock option plan at exercise price of \$0.30. The term of the options is 10 years and all options vest immediately.

About Brixton Metals Corporation

Brixton Metals Corporation is a gold-silver exploration & developing company focused in Canada and USA. Brixton wholly owns 4 projects. The advanced stage Hog Heaven silver-gold-copper project in NW Montana, USA is a past producer of direct ship ore. Two district scale gold projects, "Thorn (Golden Triangle)" and "Atlin" in British Columbia, Canada and lastly, two past producing high-grade silver-cobalt mines, the Langis and Hudson Bay projects, are brownfield projects with excellent infrastructure and are located in Ontario, Canada. The Company is actively seeking JV partners to advance one or more of its projects.

Brixton Metals Corporation shares trade on the TSX-V under the ticker symbol **BBB**. For more information about Brixton please visit our website at www.brixtonmetals.com.
