FOR IMMEDIATE RELEASE

Nitinat Appoints John A. Gould as its Qualified Person for its Carscallen Gold Property

February 19, 2018 | TSX Venture Exchange: NZZ
Frankfurt: 04U1

Toronto, Ontario – Nitinat Minerals Corporation (the "Corporation") is pleased to announce that Mr. John Alan Gould has been appointed the Qualified Person in respect of the Corporation's Carscallen Gold Property (the "Property"). Mr. Gould, who has extensive experience with geological formations similar to those found on the Property, has completed a review of the Property and has developed an initial work program.

Mr. Gould, who is 60 years old and a citizen of South Africa, holds a B.Sc. degree (Geology, Physics and Chemistry) from the University of Witwatersrand. At the start of Mr. Gould's career, he was initially involved in Witwatersrand and Bushveld-type mining operations in South Africa. His experience includes all aspects of mining and geological aspects that extended over deep and shallow level gold mining operations (Venterspost, East Driefontein, Randfontein Estates, Joel Gold Mine, ERPM, Grootvlei Gold Mine, Harmony and Virginia Gold Mines) as well as experience in the platinum mines (Rustenburg Platinum Mines – Amandelbult Section). Mr. Gould's international corporate experience started with him having headed up the South African operations for Platinum Group Metals for which he was responsible for the development, market position and technical performance of the company. Platinum Group Metals is a Toronto listed company with its primary assets in South Africa. Mr. Gould then joined First Uranium Corporation as Vice President Exploration and Technical Services, and was initially responsible for the Business Plans for the company. The company rehabilitated and commissioned the Ezulwini Mine, a 200kT gold and uranium operation as well as the Mine Waste Solutions operations, a 1.2Mt sand processing operation. He was then promoted to Chief Operating Officer for First Uranium (Ezulwini Mining Company) and was responsible for the entire operation. He was involved in the restructuring and re-opening of this significant gold and uranium operation that employed some 4,000 underground and plant operational people. The operations involved the reopening of a shaft and extracting both the gold and uranium from the shaft pillar as well as remnant ground. The operations were eventually sold to Gold One, a significant operator in the gold and uranium sector in South Africa.

A more complete copy of John Gould's Curriculum Vitae appears on the Corporation's website.
