

## MATERIAL CHANGE REPORT

**ITEM 1 Name and Address of Company:**

Frontline Gold Corporation (the "**Company**" or "**Frontline**")  
Suite 1102, 67 Yonge Street  
Toronto, ON M5E 1J8

**ITEM 2 Date of Material Change:**

June 29, 2011

**ITEM 3 News Release:**

June 29, 2011

**ITEM 4 Summary of Material Change:**

The Company announced that they have completed analysis of the soil geochemistry program at its 90% owned Menderes Gold Project in Izmir Province, Turkey. Frontline will begin an IP survey on July 1st, 2011.

**ITEM 5 Full Description of Material Change:**

See new release dated June 29, 2011 attached hereto as Schedule "A".

**ITEM 6 Reliance on Subsection 7.1(2) or (3) of National Instrument 51-102:**

The report is not being filed on a confidential basis in reliance on subsection 7.1(2) or (3) of National Instrument 51-102.

**ITEM 7 Omitted Information:**

No significant information has been omitted.

**ITEM 8 Executive Officer:**

Walter Henry, Chief Executive Officer, (416) 414-5825

**ITEM 9 Date of Report:**

July 6, 2011

## **SCHEDULE "A"**

### **Frontline Completes Soil Geochemistry Analysis and Commences IP Survey at Menderes Gold Project, Izmir Province, Turkey. Diamond Drilling is Planned.**

**TSX-V: FGC**

**For Immediate Release**

**TORONTO, ONT - June 29, 2011** - Frontline Gold Corp. ("Frontline" or the "Company") is pleased to announce that the Company has completed analysis of the soil geochemistry program at its 90% owned Menderes Gold Project in Izmir Province, Turkey. Frontline will begin an IP survey on July 1st, 2011. A diamond drilling program will be designed based on the integration of data.

#### **Soil Geochemistry Program**

A total of 1016 soil samples were collected in the grid soil sample program. Analysis of the results of the soil samples has been completed and a soils geochemistry map of gold anomalous areas has been prepared (see map attached). Three distinct structural zones located in the northeast, central and southwest regions of the Menderes property are interpreted from the soils geochemistry. Additionally, soil geochemistry plots of soil samples anomalous for manganese and silver further supports the identified target structures, and the three structural zones also appear to overlap the geological structures mapped previously (new release May 26, 2011) and further assist definition of the significant target areas for future diamond drill programs.

Soil samples ranged from <1 ppb Au up to as high as 176 ppb Au. Encom's Discover geographical information system (GIS) software program was used for calculations and plotting of color intervals.

#### **IP/Resistivity Geophysical Program**

Frontline is proceeding with an IP/Resistivity geophysical program that it has signed with Enerson Mühendislik Müsavirlik Ltd. As highlighted in Frontline's May 26, 2011 news release, the program will consist of four north-south lines at 200 m spacing totalling 12 line-kilometres. This program is scheduled to commence July 1, 2011 (see map attached).

#### **Diamond Drilling Program**

It is anticipated that upon completion of the IP survey, and once the results of all prior exploration work have been integrated into the exploration model, a diamond drill program of up to 2,000 metres will be designed to test for the extensions of the epithermal vein system, present in the area and at the depths indicated by the model. The drilling program is anticipated to begin in September 2011.

#### **About Frontline's Menderes Gold Project**

Frontline, through its 90% owned Turkish subsidiary, holds the Menderes Gold Project, a 6,194 hectares (62 km<sup>2</sup>) contiguous land package located near the village (town) of Efemçukuru, in Izmir Province, Western Turkey. The permits were acquired for their excellent potential to host low sulphidation, gold-mineralized epithermal vein systems similar to those found in other properties in the area.

An initial \$500,000 exploration program has been substantially advanced with geological prospecting

and mapping, rock and soil geochemical sampling with multi-element analysis, trenching and detailed sampling around old workings completed. An IP/Resistivity geophysical program is commencing.

**Frontline Gold Corp. (FGC: TSX-V)** is a Canadian junior mineral exploration company with an experienced discovery team and a proven record of accomplishment. The Company's flagship Niaouleni property lies in the heart of Mali South in West Mali in Africa's prolific gold belt. In addition, Frontline is currently developing its gold projects in the Izmir province of Western Turkey, which consist of the Menderes, Odemis, Ordu and Kure properties. Ongoing Canadian exploration includes the Red Lake (gold) and Stewart (gold-copper-polymetallic) projects.

The Qualified Person under National Instrument 43-101- Standards of Disclosure for Mineral Projects ("NI 43-101") for this News Release is Gregory P. Isenor, P. Geo., who has reviewed and is responsible for the technical information presented in this news release.

*This news release contains forward-looking statements, which address future events and conditions, which are subject to various risks and uncertainties. The Company's actual results, programs and financial position could differ materially from those anticipated in such forward-looking statements as a result of numerous factors, some of which may be beyond the Company's control. These factors include: the availability of funds; the timing and content of work programs; results of exploration activities and development of mineral properties, the interpretation of drilling results and other geological data, the uncertainties of resource and reserve estimations, receipt and security of mineral property titles; project cost overruns or unanticipated costs and expenses, fluctuations in metal prices; currency fluctuations; and general market and industry conditions.*

*Forward-looking statements are based on the expectations and opinions of the Company's management on the date the statements are made. The assumptions used in the preparation of such statements, although considered reasonable at the time of preparation, may prove to be imprecise and, as such, undue reliance should not be placed on forward-looking statements.*
