### **Stans Energy Corp. Corporate Update**

Stans Energy Corp. (TSX-V: HRE, OTCQB: HREEF), ("Stans" or the "Company") announces the company will be undergoing a rebranding and repositioning of its corporate objectives.

"Historically Stans has focused on producing rare earth elements and uranium. The recent announcement of our potential acquisition of the Pervomayskiy Lithium Mineralization Stockpile and associated infrastructure reflects the company's realignment to become a supplier of materials and technologies that will assist in satisfying the world's future energy supply, storage and transmission needs. As such we are considering adopting a new corporate name and identity to better reflect our evolving goals." states Rodney Irwin, CEO and President.

### **ADVISORY BOARD**

As part of the strategic realignment, Stans is seeking to strengthen its advisory board with specialists with expertise in the specialty energy mineral sector. Experts in downstream and upstream fields that can advise and assist the company in acquiring mineral properties and processing technologies that will have an impact in the energy storage and transmission will be sought. Stans is currently considering a number of candidates for the positions.

"This is an exciting time for management as we seek to strengthen the technical team of both our advisory board and Didim Inc., our technological development subsidiary. Our goal is to be able to participate in and contribute to meeting the growing global demand for green energy initiatives," continues Mr. Irwin.

### **LEGAL UPDATE**

On September 23, 2016 a jurisdictional hearing by the UNCINTRAL Arbitration Tribunal took place in Paris, France. The tribunal's ruling is expected by the end of December 2016.

### **About Stans Energy**

**Stans Energy Corp. is a resource development company focused on advancing rare and specialty metals properties and processing technologies. Stans is now transitioning into a supplier of materials and technologies that will assist in satisfying the future energy supply, storage and**

transmission needs of the world. Previously, the Company acquired, among other things, the right to mine the past producing rare earth mine, Kutessay II, in the Kyrgyz Republic. Due to the expropriation actions taken by the Government of the Kyrgyz Republic, the Company is undertaking international arbitration litigation to protect the Company's rights and recover damages estimated at over US\$210,000,000, caused by the Republic.

**We seek safe harbour.**
