

ANGKOR RESOURCES ASSISTS WITH AID EFFORTS FOR DISPLACED CAMBODIANS DUE TO BORDER CONFLICT

GRANDE PRAIRIE, ALBERTA (July 31, 2025): ANGKOR RESOURCES CORP. (TSXV: ANK) (“ANGKOR” OR “THE COMPANY”) announces its contributing aid for displaced residents due to the recent border conflict.

For tens of thousands of Khmer citizens, evacuations and leaving their homes and villages due to the recent border conflict created significant hardship. Many of the displaced personnel live day-to-day and have little savings to replenish basic food and water supplies and necessities for daily life.

Angkor contributed five tonnes of rice and household containers as part of family support for community members that had their villages and homes damaged or were evacuated due to proximity to the conflict. Many of the displaced people were existing at a near subsistence level, so loss of food and water supplies is devastating upon returning home.

Figure 1 Angkor's Administrative Coordinator, Thearum Nguon coordinates donation of rice with other organizers to provide relief to needy community members displaced due to the recent border conflict.

Thailand and Cambodia have been involved in a recent border conflict which flared up in May and escalated to military fighting last week, causing over 260,000 people to be displaced on both sides of the border. The Prime Ministers of both countries met in Malaysia and agreed to a ceasefire on Monday July 28th. Khmer villages are beginning to return to their border villages, many of which were damaged or destroyed during the conflict.

ABOUT ANGKOR RESOURCES CORPORATION:

ANGKOR Resources Corp. is a public company, listed on the TSX-Venture Exchange, and is a leading resource optimizer in Cambodia working towards mineral and energy solutions across Canada and Cambodia. ANGKOR's carbon capture and gas conservation project in Saskatchewan, Canada is part of its long-term commitment to Environmental and Social projects and cleaner energy solutions across jurisdictions. The company's mineral subsidiary, Angkor Gold Corp. in Cambodia holds three mineral exploration licenses in Cambodia and its Cambodian energy subsidiary, EnerCam Resources, was granted an onshore oil and gas license of 7300 square kilometers in the southwest quadrant of Cambodia called Block VIII. The license was reduced to roughly half the size with the Company's voluntary removal of all parks and protected areas in March 2025. Since its initial presence in Cambodia, ANGKOR has set precedents for community and social development across all its projects. Since 2022, Angkor's Canadian subsidiary, EnerCam Exploration Ltd., has been involved in gas/carbon capture and oil and gas production in Evesham, Saskatchewan.
