1. NATURE OF OPERATIONS

Glacier Lake Resources Inc. (the “Company”) is a resource exploration company focused on acquiring and exploring resource properties in Canada and the USA.

The Company was incorporated on May 28, 2008 under the laws of British Columbia. The Company's head office and registered office is Suite 1588, 609 Granville Street, Vancouver, British Columbia, V7Y 1G5. The Company is listed on the TSX Venture Exchange under the symbol “GLI”.

The condensed consolidated interim financial statements are presented in Canadian dollars, which is the Company and its subsidiary's functional currency.

2. BASIS OF PREPARATION

These condensed consolidated interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”) and in accordance with International Accounting Standards (“IAS”) 34, Interim Financial Reporting. The significant accounting policies applied in these condensed consolidated interim financial statements are based on the IFRS issued and effective as of June 30, 2019.

These condensed consolidated interim financial statements have been prepared on a historical cost basis, except for financial instruments classified as fair value through profit or loss, which are stated at their fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The preparation of these condensed consolidated interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed consolidated interim financial statements and reported amounts of expenses during the year. Actual results could differ from these estimates.

These condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the condensed consolidated interim financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimated uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to the following:

- 1) the carrying value and the recoverability of exploration and evaluation assets, which are included in the statement of financial position;
- 2) realization of deferred income tax assets; and
- 3) measurement of share-based payments.
- 4) the treatment of accounts payable and accrued liabilities realized through the statement of operations and comprehensive loss require certain management judgments. In management's judgment, there is no further obligation associated with these amounts.

2. BASIS OF PREPARATION (continued)

Application of the going concern assumption: the assessment of whether the going concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but is not limited to, 12 months from the end of the reporting period. The Company is aware that material uncertainties related to events or conditions may cast significant doubt upon the Company's ability to continue as a going concern.

The application of the Company's accounting policy for exploration and evaluation expenditures requires judgment in determining whether it is likely that future economic benefits are likely either from future exploitation or sale or where activities have not reached a stage which permits a reasonable assessment of the existence of reserves. The deferral policy requires management to make certain estimates and assumptions about future events or circumstances, in particular whether an economically viable extraction operation can be established. Estimates and assumptions made may change if new information becomes available. If information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in the statement of operations in the period when the new information becomes available.

Going concern

These condensed consolidated interim financial statements have been prepared assuming the Company will continue on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at June 30, 2019, the Company has an accumulated deficit of \$6,584,202 and has not generated any revenues since inception, and expects to incur further losses in the development of its business. The ability of the Company to continue as a going concern depends on its ability to raise adequate financing and to develop profitable operations. Management is actively targeting sources of additional financing through alliances with financial, exploration and mining entities, and other business and financial transactions which would assure continuation of the Company's operations and exploration programs. In addition, management closely monitors commodity prices of precious metals, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company if favorable or adverse market conditions occur. These factors indicate the existence of a material uncertainty that may cast significant doubt the Company's ability to continue as a going concern. These condensed consolidated interim financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

As the Company is in the exploration and evaluation stage, the Company has not identified a known body of commercial grade mineral on any of its properties. The ability of the Company to realize the costs it has incurred to date on these properties is dependent upon the Company identifying a commercial mineral body to finance its development costs and to resolve any environmental, regulatory or other constraints which may hinder the successful development of the property.

Basis of Consolidation

These condensed consolidated interim financial statements include the accounts of the Company, which is incorporated under the laws of British Columbia, and its wholly owned subsidiary, Glacier Lake Resources (Nevada) Inc. which is incorporated in Nevada, USA. All significant intercompany balances and transactions have been eliminated upon consolidation.

2. BASIS OF PREPARATION (continued)

Subsidiaries

Subsidiaries are entities controlled by the Company. Control exists when the Company possesses power over an investee, has exposure to variable returns from the investee and has the ability to use its power over the investee to affect its returns. Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Company.

The subsidiaries of the Company are as follows:

Name of subsidiary	Incorporation	Interest June 30, 2019	Interest March 31, 2019
Glacier Lake Resources (Nevada) Inc.	Nevada, USA	100%	100%

3. SIGNIFICANT ACCOUNTING POLICIES

The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of the audited annual consolidated financial statements as at March 31, 2019. These unaudited condensed consolidated interim financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended March 31, 2019.

New Accounting Standards Adopted During the Period

IFRS 16

In January 2016, the IASB issued IFRS 16, Leases which replaces IAS 17, Leases and its associated interpretative guidance. IFRS 16 applies a control model to the identification of leases, distinguishing between a lease and a service contract on the basis of whether the customer controls the asset being leased. For those assets determined to meet the definition of a lease, IFRS 16 introduces significant changes to the accounting by lessees, introducing a single, on-balance sheet accounting model that is similar to current finance lease accounting, with limited exceptions for short-term leases or leases of low value assets. Lessor accounting remains similar to current accounting practice. The standard is effective for annual periods beginning on or after January 1, 2019, with early application permitted for entities that apply IFRS 15. The Company adopted this standard and it did not impact its condensed consolidated interim financial statements, as the Company is not party to any lease agreement.

IFRIC 23

Uncertainty over Income Tax Treatment: New standard to clarify the accounting for uncertainties in income taxes. The interpretation provides guidance and clarifies the application of the recognition and measurement criteria in IAS 12 "Income Taxes" when there is uncertainty over income tax treatments. The interpretation is effective for annual periods beginning on January 1, 2019. The Company adopted this standard and it did not impact its condensed consolidated interim financial statements.

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

Silver Vista Property, British Columbia

On March 15, 2017, the Company entered into an option agreement to acquire a 100% interest in the Silver Vista copper-silver property (the "Property") with Multiple Metals Resources Ltd. The Property consists of a series of 49 mineral claims located in the province of British Columbia. Following the exercise of the option, the Property will remain subject to a 2.5% net smelter return royalty.

The Company's obligations under the agreement include an aggregate of \$230,000 in option payments, the issuance of 75,000 shares of the Company, and incurring exploration expenditures on the Property of not less than \$600,000 as follows:

- (a) Cash to be paid:
- (i) \$10,000 on or before the closing date (paid);
 - (ii) \$10,000 on or before November 11, 2017 (paid);
 - (iii) \$25,000 on or before May 11, 2018 (paid);

11. FINANCIAL INSTRUMENTS AND RISKS

The Company is exposed to various financial instrument risks and assesses the impact and likelihood of this exposure. These risks include liquidity risk, credit risk, currency risk, and interest rate risk. Where material, these risks are reviewed and monitored by the Board of Directors.

(a) Capital management

The Company manages its capital to safeguard the Company's ability to continue as a going concern, so that it can continue to provide adequate returns to shareholders and benefits to other stakeholders, and to have sufficient funds on hand for business opportunities as they arise.

The Company considers the items included in shareholders' equity (deficiency) as capital. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through short-term prospectuses, private placements, sell assets, incur debt, or return capital to shareholders. As at June 30, 2019, the Company is not subject to externally imposed capital requirements.

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. As at June 30, 2019, the Company had a cash balance of \$4,683 (March 31, 2019 - \$18,026) and current liabilities of \$759,087 (March 31, 2019 - \$638,313). The Company is considered to be in the exploration and evaluation stage. Thus, it is dependent on obtaining regular financings in order to continue its exploration and evaluation programs. Despite previous success in acquiring these financings, there is no guarantee of obtaining future financings. The Company's cash is invested in business accounts with quality financial institutions, is available on demand for the Company's programs, and is not invested in any asset-backed commercial paper.

(c) Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and amounts receivable. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions. The Company's cash is held with a major Canadian based financial institution. Amounts receivable is comprised of GST refunds from the Canadian government. The carrying amount of financial assets represents the maximum credit exposure.

(d) Currency risk

The Company's and subsidiary's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. The Company is not exposed to foreign currency risk.

(e) Interest rate risk

The Company is not exposed to interest rate risk.

(f) Price risk

The Company is exposed to price risk with respect to commodity and equity prices. The ability of the Company to explore its mineral properties and future profitability of the Company are directly related to the market price of commodities. The Company monitors commodity prices to determine appropriate actions to be undertaken.

11. FINANCIAL INSTRUMENTS AND RISKS (continued)

(g) Fair values

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; and

Level 3 – Inputs that are not based on observable market data.

The fair value of cash is measured based on level 1 inputs of the fair value hierarchy.

The estimated fair values of other financial instruments, including amounts and share subscriptions receivable, accounts payable and accrued liabilities, loan payable, and amounts due to related parties, are equal to their carrying values due to the short-term nature of these instruments.

12. SEGMENTED INFORMATION

The Company currently conducts substantially all of its operations in Canada and the USA in one business segment being the acquisition and exploration of resource properties.

13. SERVICE AGREEMENT

During the year ended March 31, 2018, the Company entered into an agreement with AGORACOM in exchange for the online advertising, marketing and branding services (“Advertising Services”). Pursuant to the terms of the agreement, the Company issued:
