2 Basis of preparation

These unaudited condensed interim consolidated financial statements were approved by the Board of Directors for issue on June 10, 2015.

Information on numbers of common shares and outstanding and exercisable options to purchase common shares as well as earnings per common share for the 13-week period ended May 4, 2014 presented in these condensed interim consolidated financial statements has been retrospectively restated to reflect the Share Split (refer to Note 8).

The Corporation prepares its condensed interim consolidated financial statements in accordance with generally accepted accounting principles in Canada (“GAAP”) as set out in the CPA Canada Handbook – Accounting under Part I, which incorporates International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”). These unaudited condensed interim consolidated financial statements have been prepared in accordance with IFRS applicable to the preparation of interim financial statements, including IAS 34, “Interim Financial Reporting”. In accordance with GAAP, these financial statements do not include all of the financial statement disclosures required for annual financial statements and should be read in conjunction with the Corporation’s audited annual consolidated financial statements for the year ended February 1, 2015 (“Fiscal 2015”), which have been prepared in accordance with IFRS as issued by the IASB. In management’s opinion, the unaudited condensed interim consolidated financial statements reflect all the adjustments that are necessary for a fair presentation of the results for the interim period presented.

3 Summary of significant accounting policies

These condensed interim consolidated financial statements have been prepared using the accounting policies as outlined in note 3 of the Fiscal 2015 consolidated financial statements.

4 Significant standards and interpretations not yet adopted

The following standards and amendments to existing standards were released by the IASB in May 2014 and July 2014. The Corporation is evaluating whether to early adopt these standards but does not expect any significant changes upon adoption.

- In May 2014, the IASB issued IFRS 15 - Revenue from Contracts with Customers. IFRS 15 replaces all previous revenue recognition standards, including IAS 18 – Revenue. The IASB has decided to propose to defer the effective date of IFRS 15 from its current effective date of January 1, 2017 to annual periods beginning on or after January 1, 2018, with earlier application permitted.
- In July 2014, the IASB issued the final version of IFRS 9, “Financial Instruments” concerning classification and measurement, impairment and hedge accounting, to supersede IAS 39, “Financial Instruments: Recognition and Measurement”. IFRS 9 will be effective for years beginning on or after January 1, 2018 with early adoption permitted.

5 Critical accounting estimates and judgments

The preparation of condensed interim consolidated financial statements requires management to make estimates and assumptions using judgment that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense during the reporting period. Estimates and other judgments are continually evaluated and are based on management’s experience and other factors, including expectations about future events that are believed to be reasonable under the circumstances. Actual results may differ from those estimates.

In preparing these condensed interim consolidated financial statements, the significant estimates and judgments made by management in applying the Corporation’s accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for Fiscal 2015 (refer to note 5 of the Fiscal 2015 consolidated financial statements).

6 Derivative financial instruments

Fair value of financial instruments

The three levels of fair value hierarchy under which the Corporation's financial instruments are valued are the following:

Level 1 – Quoted market prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted market prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and

Level 3 – Inputs for the asset or liability that are not based on observable market data.

A summary of the aggregate contractual nominal value, statement of financial position location and estimated fair values of derivative financial instruments as at May 3, 2015 and February 1, 2015 is as follows:

	Contractual nominal value US\$	Average Contract rate	Statement of financial position Location	Fair value - Asset (Liability) Significant other observable inputs (Level 2)	Nature of hedging relationship Recurring
As at May 3, 2015					
Hedging instruments					
Foreign exchange forward contracts	395,000	1.11	Current assets	43,674	Cash flow hedge
Foreign exchange forward contracts	195,283	1.24	Current liabilities	(4,819)	Cash flow hedge
	<u>590,283</u>	1.15		<u>38,855</u>	
As at February 1, 2015					
Hedging instruments					
Foreign exchange forward contracts	469,828	1.09	Current assets	84,009	Cash flow hedge
	<u>469,828</u>	1.09		<u>84,009</u>	

The Corporation is exposed to certain risks relating to its ongoing business operations. The primary risk managed by using derivative financial instruments is currency risk. Foreign exchange forward contracts are entered into in order to manage the currency fluctuation risk associated with forecasted US dollar merchandise purchases sold in stores.

For foreign exchange forward contracts, the Corporation formally documents the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategies for undertaking hedging transactions.

Foreign exchange forward contracts are designated as hedging instruments and recorded at fair value, determined using market prices and other observable inputs. The Corporation designates its foreign exchange forward contracts as hedges of the variability in highly probable future cash flows attributable to a recognized forecasted transaction (cash flow hedges). The fair value of the foreign exchange forward contracts is determined using the forward exchange rates at the measurement date, with the resulting value discounted back to present values.

During the period ended May 3, 2015, \$8,910 (May 4, 2014 - \$5,842) was reclassified from accumulated other comprehensive income (AOCI) to net earnings. The Corporation has a master netting agreement but no amounts have been netted as at May 3, 2015 or May 4, 2014.

Floating Rate Notes

On April 8, 2015, the Corporation issued additional floating rate senior unsecured notes due May 16, 2017 in the aggregate principal amount of \$125,000 (the "Additional Floating Rate Notes") by way of private placement, in reliance upon exemptions from the prospectus requirements under applicable securities legislation. Once issued, the Additional Floating Rate Notes bear interest at the same rate as the Original Floating Rate Notes, such rate being equal to the applicable 3-month bankers' acceptance rate (CDOR) plus 54 basis points (or 0.54%), to be set quarterly on the 16th day of May, August, November and February of each year. Interest on the Additional Floating Rate Notes is payable in cash quarterly, in arrears, on the 16th day of May, August, November and February of each year until their maturity, concurrently with the payment of interest on the Original Floating Rate Notes. All other terms and conditions applicable to the Original Floating Rate Notes also apply to the Additional Floating Rate Notes. The Additional Floating Rate Notes are treated as a single series with the Original Floating Rate Notes (collectively, the "Floating Rate Notes"), and were assigned the same rating of BBB, with a stable trend, by DBRS Limited.

As at May 3, 2015, the carrying value of the Additional Floating Rate Notes was \$124,956 (February 1, 2015 – n/a). The fair value of the Additional Floating Rate Notes as at May 3, 2015 was determined to be \$125,020 valued as a level 2 in the fair value hierarchy (February 1, 2015 – n/a).

8 Share capital (cont'd)

The weighted average fair value of the share options granted during the 13-week periods ended on the dates provided below was estimated at the grant date based on the Black-Scholes option pricing model using the following assumptions:

	<u>May 3, 2015</u>	<u>May 4, 2014</u>
Dividend yield	0.5%	0.7%
Risk-free interest rate	0.9%	1.9%
Expected life	6.3 years	6.4 years

Weighted average fair value of share options estimated at the grant date	\$13.93	\$9.93 ⁽¹⁾

⁽¹⁾ Retrospectively restated to reflect the Share Split.

The expected life is estimated using the average of the vesting period and the contractual life of the share options. Expected volatility is estimated based on the Corporation's publicly traded share price.

9 Income taxes

The income tax expense is recognized based on management's best estimate of the weighted average annual income tax rate expected for the full fiscal year. The statutory income tax rate for the 13-week period ended May 3, 2015 was 26.7% (May 4, 2014 - 26.7%). The Corporation's effective income tax rate for the 13-week period ended May 3, 2015 was 27.4% (May 4, 2014 - 27.0%).
