The Gnome zinc project has land claims that encompass 5,429 hectares and are located strategically in the heart of an area home to some of Canada's important zinc deposits and the focus of much past exploration. The Gnome project lies 70 km SE from the Cirque Zn-Pb-Ag deposit and 46 km SE along trend from the Akie Zn-Pb-Ag deposit, all of which are in the Kechika trough, a geological belt northeast of Williston Lake containing these and other sediment-hosted Zn-Pb-Ag prospects along trend. The Company conducted an exploration program during fiscal 2012 and completed the program early fiscal 2013. The Company prepared an updated geological report and is evaluating and assessing the data obtained from the program to determine the next course of action.

The Jean Iron Ore Property ("Jean Property") is an iron ore exploration property located in the Thunder Bay Mining District of Northwestern Ontario, Canada. It is comprised of 17 claims totaling 1,824 hectares and is located approximately 65 kilometres to the southwest of Thunder Bay, approximately 2 kilometres north of the Whitefish Lake on Highway 588.

9. Financial Instruments and Other Instruments (continued)

Financial Risk

(i) Credit Risk

Credit risk arises from non-performance by counterparties of contractual financial obligations. The Company's maximum credit risk is primarily attributable to its cash. The Company limits its exposure to credit loss for cash by placing such instruments with financial institutions.

As at December 31, 2015, the Company's maximum exposure to credit risk is the carrying value of cash of \$9,963.

The Company holds balance in cash in foreign currencies (US dollars) and is therefore exposed to gains or losses on foreign exchange. A significant change in the currency exchange rate between the Canadian dollar relative to the US dollar could have an effect on the Company's results of operations, financial position and/or cash flows. The Company has not hedged its exposure to currency fluctuations.
